Email: Jeffrey.Hofmann@pw.utc.com
Phone: 860-557-0933
Fax: 860-353-3666
Organization: PW Power Systems

General Comment

Where in BIS do we find an exact definition for criteria of a "portable electric generator" (ECCN 2A994). We have email coorespondence with a BIS official that stated:
"The generators that are in 2A994 are portable---5,000 lbs or less on wheels or transportable in a 2 1/2 ton truck with not special set up requirement. "

However - we have been unable to find the CFR or otherwise source for this clarification.

Thx
