Subject: Comments on A-76 Circular No. A-76 (revised) Sub-paragraphs B.c.2. (15) and B.3.a (6) Quality Control Plan

December 18, 2002

Dear OMB Staff:

Below are some comments on the draft revised OMB Circular A-76. I base my comments on experience with conducting studies at an aviation maintenance depot that has an ISO 9000-based quality program. The issue presented below is important to the depot and probably others that do not rely solely on traditional quality assurance/quality control.

Sincerely,

James Edward Giles III
