Re: A- 76 Revisions

Erdman Anthony strongly support the A-76 revisions. Erdman Anthony and our team of highly trained professionals have been in the business of "geospatial activietes" such as photogrametry, surveying, mapping, and more for over 40 years. Erdman Anthony specificly support the provisions that eliminate unfair competition under agency to agency agreements. Erdman Anthony strongly support the provisions in the Circular that eliminate the currnet practice that permits agencies to do work for other federal agencies, and for state and local governments.
