

## **ARIZONA NOXIOUS WEED REPORTING FORM**

### **Instructions:**

**The following form can be copied and used to report new noxious weed infestations in Arizona. Please fill out the form as completely as possible and send it to the address listed on the form. It is important to also send a sample of the weed you have identified (in a plastic bag) along with the form. Include as much of the weed as possible in the bag. Finally, please sketch a detailed map (on the reverse side of form) so that the location can be easily be found by others to implement the best eradication, control, and monitoring program for each particular site and species.**

**Please help us to control noxious, invasive weeds. Whether controlling weeds by manually hand pulling or by applying herbicides, be sure to take appropriate precautions. Always wear protective gloves and safety glasses when manually removing weeds because many species have spines and/or toxic or irritating substances. Before applying herbicides, always read the label and follow instructions!**

## Arizona Noxious Weed Reporting Form

Date: \_\_\_\_\_

Surveyor: \_\_\_\_\_  
(Name and affiliation)

Phone: \_\_\_\_\_  
(Daytime)

Weed Species (if known):

Estimate of Infestation (acreage and density):

Specific Location (for example):
