## About This Report

## Introduction

Older Americans Update 2006: Key Indicators of Well-Being is the third in a series of reports produced by the Federal Interagency Forum on Aging-Related Statistics (Forum). This series of reports provides data on the overall status of the U.S. population age 65 and over, presents a broad summary of national indicators of well-being for this population, and monitors changes in these indicators over time. By following these data trends, more accessible information will be available to target efforts to improve the lives of older Americans.

Older Americans Update 2006 provides readers with the most recent data available in a timely manner. It differs from the full, more detailed versions, Older Americans 2000 and Older Americans 2004, in the following ways:

- Indicators are updated based on data availability. Out of a total of 37 indicators, 30 are updated in this report. The remaining 7 indicators are shown as they appeared in Older Americans 2004.
- The descriptive text that appears below the charts in the full versions of Older Americans 2000 and 2004 has been replaced with the data tables used to create the charts. In most cases, the tables have been updated and show the new or corrected data in bolded color. Tables updated and adjusted for inflation show only the newly added years of data in color. Tables that did not fit under the chart are included in Appendix A.
- Supporting data for each indicator, including complete tables, PowerPoint slides, and data source descriptions, are available at: www.agingstats.gov.

## Considerations When Examining the Indicators

Indicators in Older Americans Update 2006 are not always comparable to the original indicators in Older Americans 2000 or 2004. Updating certain indicators is sometimes difficult because of changes in data sources,
definitions, questionnaires, or reporting categories. A comparability table is available at www.agingstats.gov to help readers understand the changes that have occurred.

The source of data for each indicator is noted below the chart. Descriptions of the data sources are available at: www.agingstats.gov. In the charts, tick marks along the $x$ axis indicate years for which data are available. The range of years presented in each chart varies because data availability is not uniform across the data sources. To standardize the time frames across the indicators, a timeline has been placed at the bottom of each indicator that reports data for more than 1 year.

Finally, the data in some indicators may not sum to totals because of rounding.

## About the Forum

The Forum's mission is to encourage cooperation and collaboration among Federal agencies to improve the quality and utility of data on the aging population. To accomplish this mission, the Forum provides agencies with a venue to discuss data issues and concerns that cut across agency boundaries, facilitates the development of new databases, improves mechanisms currently used to disseminate information on aging-related data, invites researchers to report on cutting-edge analyses of data, and encourages international collaboration.

Forum members provide funds and valuable staff time to support the activities of the Forum.

## More Information

For more information about Older Americans Update 2006 or other Forum activities, contact:

## Kristen Robinson, Ph.D.

Staff Director
Federal Interagency Forum on Aging-Related Statistics
National Center for Health Statistics
3311 Toledo Road, Room 6321

## Older Americans on the Internet

Supporting material for this report can be found at www.agingstats.gov. The Web site contains:

- Complete data for all of the indicators in Excel spreadsheets (some with standard errors, when available).
- Data source descriptions.
- Glossary.
- Updated PowerPoint slides of the charts.
- A comparability table explaining the changes to the indicators that have taken place between Older Americans 2000, 2004, and Update 2006.

The Forum's Web site also provides:

- Ongoing Federal data resources relevant to the study of the aging.
- Links to aging-related statistical information on Forum member Web sites.
- Past products of the Forum (including Older Americans 2000 and 2004).
- Agency contacts.
- Subject area contact list for Federal statistics.
- Information about the Forum.

# Population 

Indicator 1: Number of Older Americans (partially updated)
Indicator 2: Racial and Ethnic Composition (updated)
Indicator 3: Marital Status (updated)
Indicator 4: Educational Attainment (updated)
Indicator 5: Living Arrangements (updated)
Indicator 6: Older Veterans

## INDICATOR 1

## Number of Older Americans

The growth of the population age 65 and over affects many aspects of our society, challenging policymakers, families, businesses, and health care providers, among others, to meet the needs of aging individuals.

Number of people age 65 and over, by age group, selected years 1900-2000 and projected 2010-2050

Additional information for this indicator can be found at www.agingstats.gov.

Number of people age 65 and over and 85 and over, selected years 1900-2000 and projected 2010-2050 (Last updated in Older Americans 2004)

| Year | 65 and over | 85 and over | Year | 65 and over | 85 and over |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Estimates | In millions |  | Projections | In millions |  |
| 1900 | 3.1 | 0.1 | 2010 | 40.2 | 6.1 |
| 1910 | 3.9 | 0.2 | 2020 | 54.6 | 7.3 |
| 1920 | 4.9 | 0.2 | 2030 | 71.5 | 9.6 |
| 1930 | 6.6 | 0.3 | 2040 | 80.0 | 15.4 |
| 1940 | 9.0 | 0.4 | 2050 | 86.7 | 20.9 |
| 1950 | 12.3 | 0.6 |  |  |  |
| 1960 | 16.2 | 0.9 |  |  |  |
| 1970 | 20.1 | 1.5 |  |  |  |
| 1980 | 25.5 | 2.2 |  |  |  |
| 1990 | 31.2 | 3.1 |  |  |  |
| 2000 | 35.0 | 4.2 |  |  |  |

Additional information for this indicator can be found at www.agingstats.gov.

## INDICATOR 2

## Racial and Ethnic Composition

As the older population grows larger, it will also grow more diverse, reflecting the demographic changes in the U.S. population as a whole over the last several decades. By 2050, programs and services for older people will require greater flexibility to meet the needs of a more diverse population.

Note: The term"non-Hispanic white alone" is used to refer to people who reported being white and no other race and who are not Hispanic. The term "black alone" is used to refer to people who reported being black or African American and no other race, and the term "Asian alone" is used to refer to people who reported only Asian as their race. The use of single-race populations in this report does not imply that this is the preferred method of presenting or analyzing data. The U.S. Census Bureau uses a variety of approaches. The race group "All other races alone or in combination" includes American Indian and Alaska Native, alone; Native Hawaiian and Other Pacific Islander, alone; and all people who reported two or more races.
Reference population: These data refer to the resident population.
Source: U.S. Census Bureau, Population Estimates and Projections, 2004.

## Additional information for this indicator can be found at www.agingstats.gov.

Population age 65 and over, by race and Hispanic origin, 2004 and projected 2050

| Race and Hispanic origin | 2004 estimates | 2050 projections |  |
| :--- | :---: | :---: | :---: |
|  | Percent |  |  |
| Total | $\mathbf{1 0 0 . 0}$ | 100.0 |  |
| Non-Hispanic white alone | $\mathbf{8 1 . 9}$ | 61.3 |  |
| Black alone | $\mathbf{8 . 4}$ | 12.0 |  |
| Asian alone | $\mathbf{2 . 9}$ | 7.8 |  |
| All other races alone or in combination | $\mathbf{1 . 2}$ | 2.7 |  |
| Hispanic (of any race) | $\mathbf{6 . 0}$ | 17.5 |  |

|  |  |  |  |  |  |  |  |  |  |  |  |

## INDICATOR 3

## Marital Status

Marital status can strongly affect one's emotional and economic well-being. Among other factors, it influences living arrangements and the availability of caregivers for older Americans with an illness or disability.

Marital status of the population age 65 and over, by age group and sex, 2004

Note: Married includes married, spouse present; married, spouse absent; and separated.
Reference population: These data refer to the civilian noninstitutionalized population.
Source: U.S. Census Bureau, Current Population Survey, Annual Social and Economic Supplement.

Additional information for this indicator can be found at www.agingstats.gov.
Marital status of the population age 65 and over, by age group and sex, 2004

| Selected characteristic | $65-74$ | $75-84$ | 85 and over |
| :--- | :---: | :---: | :---: |
|  |  | Percent |  |
| Men | 79.4 | 72.4 | 58.3 |
| Married | 7.5 | 18.8 | 35.1 |
| Widowed | 8.7 | 4.8 | 4.2 |
| Divorced | 4.4 | 3.9 | 2.4 |
| Never married |  |  |  |
| Women | 56.6 | 36.4 | 15.1 |
| Married | 28.0 | 53.2 | 77.1 |
| Widowed | 11.7 | 7.0 | 3.2 |
| Divorced | 3.7 | 3.5 | 4.6 |
| Never married |  |  |  |

## INDICATOR 4

## Educational Attainment

Educational attainment influences socioeconomic status, which in turn plays a role in well-being at older ages. Higher levels of education are usually associated with higher incomes, higher standards of living, and above-average health.

Additional information for this indicator can be found at www.agingstats.gov.

Educational attainment of the population age 65 and over, selected years 1965-2004

| Educational attainment | 1965 | 1970 | 1975 | 1980 | 1985 | 1990 | 1995 | 2000 | 2001 | 2002 | 2003 | 2004 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Percent |  |  |  |  |  |  |  |  |  |  |
| High school graduate or more | 23.5 | 28.3 | 37.3 | 40.7 | 48.2 | 55.4 | 63.8 | 69.5 | 70.0 | 69.9 | 71.5 | 73.1 |
| Bachelor's degree or more | 5.0 | 6.3 | 8.1 | 8.6 | 9.4 | 11.6 | 13.0 | 15.6 | 16.2 | 16.7 | 17.4 | 18.7 |

[^0] from the Current Population Survey beginning in 1965.

Educational attainment of the population age 65 and over, by race and Hispanic origin, 2004

Note: The term "non-Hispanic white alone" is used to refer to people who reported being white and no other race and who are not Hispanic. The term "black alone" is used to refer to people who reported being black or African American and no other race, and the term "Asian alone" is used to refer to people who reported only Asian as their race. The use of single-race populations in this report does not imply that this is the preferred method of presenting or analyzing data. The U.S. Census Bureau uses a variety of approaches.
Reference population: These data refer to the civilian noninstitutionalized population.

| :--- |
| Total |
| Non-Hispanic white alone |
| Black alone |
| Asian alone |
| Hispanic (of any race) |

## INDICATOR 5

## Living Arrangements

The living arrangements of America's older population are important indicators because they are linked to income, health status, and the availability of caregivers. Older people who live alone are more likely than older people who live with their spouses to be in poverty. ${ }^{1}$

Additional information for this indicator can be found at www.agingstats.gov.

Living arrangements of the population age 65 and over, by sex and race and Hispanic origin, 2004

| Selected characteristic | With spouse | With other relatives | With nonrelatives | Alone |
| :--- | :---: | :---: | :---: | :---: |
| Men |  | Percent |  |  |
| Total | 72.4 | 6.1 | 2.7 |  |
| Non-Hispanic white alone | 74.3 | 4.5 | 2.4 | 18.8 |

| 2004 | 15.5 | 23.1 | 29.4 | 49.9 |

## INDICATOR 6

## Older Veterans

According to Census 2000, there were 9.8 million veterans age 65 and over in the United States and Puerto Rico, composed mainly of the sizeable World War II, Korean War, and, increasingly, Vietnam era cohorts; two of three men age 65 and over were veterans.

Percentage of men age 65 and over who are veterans, by age group, United States and Puerto Rico, 1990 and 2000

Reference population: These data refer to the resident population of the United States and Puerto Rico.
Source: U.S. Census Bureau, Decennial Census.

Additional information for this indicator can be found at www.agingstats.gov.

> Percentage of men age 65 and over who are veterans, by age group, United States and Puerto Rico, 1990 and 2000 (Last updated in Older Americans 2004)

| Year | 65 and over | $65-74$ | $75-84$ | 85 and over |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Percent |  |  |
| 1990 | 54.2 | 69.7 | 30.0 |  |
| 2000 | 64.9 | 66.3 | 70.7 | 32.3 |

## Economics

Indicator 7: Poverty (updated)<br>Indicator 8: Income (updated)<br>Indicator 9: Sources of Income (updated)<br>Indicator 10: Net Worth (updated)<br>Indicator 11: Participation in the Labor Force (updated)<br>Indicator 12: Housing Expenditures

## INDICATOR 7

## Poverty

Poverty rates offer one way to evaluate economic well-being. The official poverty definition is based on annual money income before taxes and does not include capital gains and noncash benefits. To determine who is poor, the U.S. Census Bureau compares family income (or an unrelated individual's income) with a set of poverty thresholds that vary by family size and composition and are updated annually for inflation. People identified as living in poverty are at risk of having inadequate resources for food, housing, health care, and other needs.

Additional information for this indicator can be found at www.agingstats.gov.

Percentage of the population living in poverty, by age group, 2003-2004

| Year | 65 and over | Under 18 | $18-64$ | $65-74$ | $75-84$ | 85 and over |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Percent |  |  |  |  |
| 2003 | 10.2 | 17.6 | 10.8 | 9.0 | 11.0 | 13.8 |
| 2004 | 9.8 | 17.8 | 11.3 | 9.4 | 9.7 | 12.6 |

Data for this indicator's chart can be found in table 7 a on pages 61 and 62.

## INDICATOR 8

## Income

The percentage of people living below the poverty line does not give a complete picture of the economic situation of older Americans. Examining the income distribution of the population age 65 and over and their median income provides additional insights into their economic well-being.

Additional information for this indicator can be found at www.agingstats.gov.

> Income distribution of the population age 65 and over, 2003-2004

| Year | Poverty | Low income | Middle income | High income |
| :---: | ---: | ---: | :---: | :---: |
| Percent |  |  |  |  |
| 2003 | 10.2 | 28.5 | 33.8 | 27.5 |
| 2004 | 9.8 | 28.1 | 34.6 | 27.5 |

Data for this indicator's chart can be found in table 8 on page 62 and 63.

## INDICATOR 9

## Sources of Income

Most older Americans are retired from full-time work. Social Security was developed as a floor of protection for their incomes, to be supplemented by other pension income, income from assets, and to some extent, continued earnings. Over time, Social Security has taken on a greater importance to many older Americans.

Aggregate income by source for the population age 65 and over, selected
years 1962-2004

Note: The definition of "other" includes, but is not limited to, public assistance, unemployment compensation, worker's compensation, alimony, child support, and personal contributions.
Reference population: These data refer to the civilian noninstitutionalized population.
Source: Social Security Administration, 1963 Survey of the Aged, 1968 Survey of Demographic and Economic Characteristics of the Aged; U.S. Census Bureau, Current Population Survey, Annual Social and Economic Supplement, 1976-2004.

Additional information for this indicator can be found at www.agingstats.gov.

## Aggregate income by source for the population age 65 and over, 2003-2004

| Year | Total | Social Security | Asset income | Pensions | Earnings | Other |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Percent |  |  |  |  |  |
| 2003 | 100 | 39 | 14 | 19 | 25 | 2 |  |
| 2004 | 100 | 39 | 13 | 20 | 26 | 2 |  |

Data for this indicator's chart can be found in table 9a on page 63.

## Aggregate income for the population age 65 and over, by source and income quintile, 2004

Note: The definition of "other" includes, but is not limited to, public assistance, unemployment compensation, worker's compensation, alimony, child support, and personal contributions. Quintile limits are $\$ 10,399$ for the lowest quintile, $\$ 16,363$ for the second quintile, $\$ 25,587$ for the third quintile, $\$ 44,129$ for the fourth quintile, and open-ended for the highest quintile.
Reference population: These data refer to the civilian noninstitutionalized population.
Source: U.S. Census Bureau, Current Population Survey, Annual Social and Economic Supplement.

Additional information for this indicator can be found at www.agingstats.gov.

Aggregate income for the population age 65 and over, by source and income quintile, 2004

|  | Lowest <br> fifth | Second <br> fifth | Third <br> fifth | Fourth <br> fifth | Highest <br> fifth |  |

## INDICATOR 10

## Net Worth

Net worth (the value of real estate, stocks, bonds, and other assets minus outstanding debts) is an important indicator of economic security and well-being. Greater net worth allows a family to maintain its standard of living when income falls because of job loss, health problems, or family changes such as divorce or widowhood.

## Median household net worth, by race of head of household age 65 and over, in 2003 dollars, selected years 1984-2003

Note: Net worth data do not include pension wealth. This excludes private defined-contribution and defined-benefit plans as well as rights to Social Security wealth. Data for 1984-2001 have been inflation-adjusted to 2003 dollars. Reference population: These data refer to the civilian noninstitutionalized population.
Source: Panel Study of Income Dynamics.

## Additional information for this indicator can be found at www.agingstats.gov.

Median household net worth, by race of head of household age 65 and over, in 2003 dollars, selected years 1984-2003

Note: Data for 1984-2001 have been inflation-adjusted to 2003 dollars.

## INDICATOR 11

## Participation in the Labor Force

The labor force participation rate is the percentage of a group that is in the labor force-that is, either working (employed) or actively looking for work (unemployed). Some older Americans work out of economic necessity. Others may be attracted by the social contact, intellectual challenges, or sense of value that work often provides.

Labor force participation rates of men age 55 and over, by age group, annual averages, 1963-2005

Note: Data for 1994 and later years are not strictly comparable with data for 1993 and earlier years due to a redesign of the survey and methodology of the Current Population Survey. Beginning in 2000, data incorporate population controls from Census 2000.
Reference population: These data refer to the civilian noninstitutionalized population.
Source: Bureau of Labor Statistics, Current Population Survey.

Additional information for this indicator can be found at www.agingstats.gov.

## Labor force participation rates of men age 55 and over, by age group, annual averages, 2004-2005

|  | Men |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Year | $55-61$ | $62-64$ |  | $65-69$ |
|  | Percent |  |  |  |
| 2004 | 74.4 | 50.8 | 32.6 | 12.8 |
| 2005 | 74.7 | 52.5 | 33.6 | 13.5 |

Data for this indicator's chart can be found in table 11 on page 64.

## Labor force participation rates of women age 55 and over, by age group, annual averages, 1963-2005

Additional information for this indicator can be found at www.agingstats.gov.

Labor force participation rates of women age 55 and over, by age group, annual averages, 2004-2005

|  | Women |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Year | $55-61$ | $62-64$ |  | $65-69$ |
|  |  | Percent |  |  |
| 2004 | 62.1 | 38.7 |  | 23.3 |
| 2005 | 62.7 | 40.0 | 23.7 | 6.7 |
|  |  |  |  |  |

Data for this indicator's chart can be found in table 11 on page 64.

## INDICATOR 12

## Housing Expenditures

Most older people live in adequate, affordable housing, ${ }^{2}$ but some older Americans are allocating a large proportion of their total expenditures to housing. When housing expenditures comprise a relatively high proportion of total expenditures, less money is available for health care, savings, and other vital goods and services.

Percentage of total annual expenditures allocated to housing costs in households headed by people age 65 and over, by income level, 1987 and 2002

Note: Housing expenditures include mortgage payments (interest, property taxes, and insurance), rent, and utilities.
Reference population: These data refer to the resident noninstitutionalized population.
Source: Bureau of Labor Statistics, Consumer Expenditure Survey.

## Additional information for this indicator can be found at www.agingstats.gov.

## Percentage of total annual expenditures allocated to housing costs in households

 headed by people age 65 and over, by income level, selected years 1987-2002(Last updated in Older Americans 2004)

| Income level | 1987 | 1989 | 1992 | 1994 | 1996 | 1998 | 2002 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Percent |  |  |  |
| Lowest fifth | 33.4 | 34.8 | 37.5 | 34.5 | 36.2 | 36.0 | 40.3 |
| Second fifth | 33.0 | 31.4 | 32.5 | 35.5 | 34.0 | 35.3 | 35.3 |
| Third fifth | 28.8 | 28.3 | 30.0 | 26.3 | 29.8 | 28.7 | 32.6 |

| Highest fifth | 20.5 | 21.8 | 23.3 | 23.6 | 24.1 | 25.8 | 28.0 |

## Health Status

Indicator 13: Life Expectancy (updated)<br>Indicator 14: Mortality (updated)<br>Indicator 15: Chronic Health Conditions (updated)<br>Indicator 16: Sensory Impairments and Oral Health (updated)<br>Indicator 17: Memory Impairment<br>Indicator 18: Depressive Symptoms<br>Indicator 19: Disability (partially updated)<br>Indicator 20: Respondent-Assessed Health<br>Status (updated)

## INDICATOR 13

## Life Expectancy

Life expectancy is a summary measure of the overall health of a population. It represents the average number of years of life remaining to a person at a given age if death rates were to remain constant. In the United States, improvements in health have resulted in increased life expectancy and contributed to the growth of the older population over the past century.

Life expectancy at ages 65 and 85, by sex, selected years 1900-2003

Reference population: These data refer to the resident population.
Source: Centers for Disease Control and Prevention, National Center for Health Statistics, National Vital Statistics System.

Additional information for this indicator can be found at www.agingstats.gov.

Life expectancy, by age and sex, selected years 1900-2003

| Age and sex | 1900 | 1910 | 1920 | 1930 | 1940 | 1950 | 1960 | 1970 | 1980 | 1990 | 2000 | 2001 | 2002 | 2003 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  | Years |  |  |  |  |  |  |  |
| At age 65 |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Men | 11.5 | 11.2 | 12.2 | 11.7 | 12.1 | 12.7 | 13.0 | 13.0 | 14.2 | 15.1 | 16.2 | 16.4 | 16.6 | 16.8 |
| Women | 12.2 | 12.0 | 12.7 | 12.8 | 13.6 | 15.0 | 15.8 | 16.8 | 18.4 | 19.0 | 19.3 | 19.4 | 19.5 | 19.8 |
| At age 85 |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Men | 3.8 | 3.9 | 4.1 | 4.0 | 4.1 | 4.4 | 4.4 | 4.7 | 5.1 | 5.3 | 5.6 | 5.7 | 5.7 | 6.0 |
| Women | 4.1 | 4.1 | 4.3 | 4.3 | 4.5 | 4.9 | 4.7 | 5.6 | 6.4 | 6.7 | 6.8 | 6.9 | 6.9 | 7.2 |

## INDICATOR 14

## Mortality

Overall, death rates in the U.S. population have declined during the past century. But for some diseases, death rates among older Americans have increased in recent years.

Additional information for this indicator can be found at www.agingstats.gov.

Death rates for selected leading causes of death among people age 65 and over, 2002-2003

| Year | Diseases of heart | Malignant neoplasms | Cerebrovascular diseases | Chronic lower respiratory diseases | Influenza and pneumonia | Diabetes mellitus | Alzheimer's disease |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Number per 100,000 population |  |  |  |  |  |  |
| 2002 | 1,585.2 | 1,090.9 | 393.2 | 300.6 | 160.7 | 152.0 | 158.7 |
| 2003 | 1,524.9 | 1,073.0 | 372.8 | 299.1 | 154.8 | 150.7 | 167.7 |

Data for this indicator's chart can be found in table 14a on page 65.

## Chronic Health Conditions

Chronic diseases are long-term illnesses that are rarely cured. Chronic diseases such as heart disease, stroke, cancer, and diabetes are among the most common and costly health conditions. ${ }^{4}$ Chronic health conditions negatively affect quality of life, contributing to declines in functioning and the inability to remain in the community. ${ }^{5}$ Many chronic conditions can be prevented or modified with behavioral interventions. Six of the seven leading causes of death among older Americans are chronic diseases. (See "Indicator 14: Mortality.")

Percentage of people age 65 and over who reported having selected chronic conditions, by sex, 2003-2004

Note: Data are based on a 2-year average from 2003-2004. The question used to estimate the percentage of people who report having arthritis is "Have you EVER been told by a doctor or other health professional that you have some form of arthritis, rheumatoid arthritis, gout, lupus, or fibromyalgia?" This differs from the questions that were asked to estimate the percentage of people who report having "arthritic symptoms" in Older Americans 2004.
Reference population: These data refer to the civilian noninstitutionalized population.
Source: Centers for Disease Control and Prevention, National Center for Health Statistics, National Health Interview Survey.

Additional information for this indicator can be found at www.agingstats.gov.

Percentage of people age 65 and over who reported having selected chronic conditions, by sex, 2003-2004

| Sex | Heart <br> disease | Hyper- <br> tension | Stroke | Emphy- <br> sema | Asthma | Chronic <br> bronchitis | Any <br> cancer | Diabetes | Arthritis |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | Percent |  |  |  |  |  |
| Total | 31.7 | 51.9 | 9.2 | 5.2 | 8.9 | 6.0 | 20.6 | 17.0 | 49.9 |
| Men | 37.2 | 48.1 | 10.1 | 6.7 | 7.6 | 4.6 | 23.8 | 19.5 | 42.9 |
| Women | 27.7 | 54.7 | 8.5 | 4.1 | 9.9 | 7.1 | 18.2 | 15.1 | 55.0 |

## INDICATOR 16

## Sensory Impairments and Orall Health

Vision and hearing impairments and oral health problems are often thought of as natural signs of aging. Often, however, early detection and treatment can prevent, or at least postpone, some of the debilitating physical, social, and emotional effects these impairments can have on the lives of older people. Glasses, hearing aids, and regular dental care are not covered services under Medicare.

Percentage of people age 65 and over who reported having any trouble hearing, any trouble seeing, or no natural teeth, by sex, 2004

Note: Respondents were asked "Which statement best describes your hearing without a hearing aid: good, a little trouble, a lot of trouble, deaf?" For the purposes of this indicator the category "Any trouble hearing" includes "a little trouble, a lot of trouble, and deaf." Regarding their vision, respondents were asked "Do you have any trouble seeing, even when wearing glasses or contact lenses?" The category "Any trouble seeing" also includes those who in a subsequent question report themselves as blind. Lastly, respondents were asked, in one question,"Have you lost all of your upper and lower natural (permanent) teeth?"
Reference population: These data refer to the civilian noninstitutionalized population.
Source: Centers for Disease Control and Prevention, National Center for Health Statistics, National Health Interview Survey.

## Additional information for this indicator can be found at www.agingstats.gov.

> Percentage of people age 65 and over who reported having any trouble hearing, any trouble seeing, or no natural teeth, by sex, 2004

| Sex | Any trouble hearing | Any trouble seeing | No natural teeth |
| :--- | :---: | :---: | :---: |
|  | Percent |  |  |
| Men | 47.7 | 14.4 | 24.2 |
| Women | 33.9 | 18.7 | 26.8 |

## INDICATOR 17

## Memory Impairment

Memory skills are important to general cognitive functioning, and declining scores on memory tests are indicators of general cognitive loss for older adults. Low cognitive functioning (i.e., memory impairment) is a major risk factor for entering a nursing home. ${ }^{6,7}$

Percentage of people age 65 and over with moderate or severe memory impairment, by age group and sex, 2002

Note: The definition of "moderate or severe memory impairment" is four or fewer words recalled (out of 20) on combined immediate and delayed recall tests among self-respondents. Self-respondents who refused either the immediate or delayed word recall test were excluded from the analysis. Proxy respondents with an overall memory rating of "poor" were included as having moderate or severe memory impairment. Because of some changes in methods from the 2000 edition of Older Americans, no inference should be made about longitudinal trends.
Reference population:These data refer to the civilian noninstitutionalized population.
Source:Health and Retirement Study.

Additional information for this indicator can be found at www.agingstats.gov.

Percentage of people age 65 and over with moderate or severe memory impairment, by age group and sex, 2002 (Last updated in Older Americans 2004)

|  | Both sexes | Men | Women |
| :--- | :---: | :---: | ---: |
|  |  | Percent |  |
| 65 and over | 12.7 | 14.9 | 11.2 |
| $65-69$ | 5.1 | 7.8 | 3.1 |
| $70-74$ | 8.2 | 10.9 | 6.1 |
| $75-79$ | 13.6 | 17.2 | 11.2 |
| $80-84$ | 18.8 | 21.8 | 17.0 |
| 85 and over | 32.1 | 33.9 | 31.2 |

## INDICATOR 18

## Depressive Symptoms

Depressive symptoms are an important indicator of general well-being and mental health among older adults. People who report many depressive symptoms often experience higher rates of physical illness, greater functional disability, and higher health care resource utilization. ${ }^{6,8}$

> Percentage of people age 65 and over with clinically relevant depressive symptoms, by age group and sex, 2002

Note: The definition of "clinically relevant depressive symptoms" is four or more symptoms out of a list of eight depressive symptoms from an abbreviated version of the Center for Epidemiological Studies Depression Scale (CES-D) adapted by the Health and Retirement Study. The CESD scale is a measure of depressive symptoms and is not to be used as a diagnosis of clinical depression. A detailed explanation concerning the
"4 or more symptoms" cut-off can be found in the following documentation, hrsonline.isr.umich.edu/docs/userg/dr-005.pdf.
Reference population: These data refer to the civilian noninstitutionalized population.
Source: Health and Retirement Study.

Additional information for this indicator can be found at www.agingstats.gov.

Percentage of people age 65 and over with clinically relevant depressive symptoms, by age group and sex, 2002 (Last updated in Older Americans 2004)

|  | Both sexes | Men | Women |
| :--- | :---: | :---: | :---: |
|  |  | Percent |  |
| 65 and over | 15.0 | 10.9 | 17.8 |
| $65-69$ | 13.1 | 9.7 | 15.6 |
| $70-74$ | 14.2 | 9.6 | 17.6 |
| $75-79$ | 14.9 | 9.9 | 18.2 |
| $80-84$ | 16.9 | 15.0 | 18.1 |
| 85 and over | 19.6 | 14.9 | 21.9 |

## INDICATOR 19

## Disability

Functioning in later years may be diminished if illness, chronic disease, or injury limits physical and/ or mental abilities. Changes in disability rates have important implications for work and retirement policies, health and long-term care needs, and the social well-being of the older population.

Additional information for this indicator can be found at www.agingstats.gov.
Age-adjusted percentage of Medicare enrollees age 65 and over who are chronically disabled, by level and category of disability, 1984, 1989, 1994, and 1999 (Last updated in Older Americans 2004)

| Selected characteristic | 1984 | 1989 | 1994 | 1999 |
| :--- | :---: | :---: | :---: | :---: |
|  | Percent |  |  |  |
| Both sexes total | 24.5 | 23.1 | 21.1 | 19.7 |
| $\quad$ Living in the community | 5.5 |  |  |  |
| IADL only | 6.7 | 3.6 | 3.1 | 2.6 |
| 1-2 ADLs | 3.0 | 3.5 | 6.0 | 5.8 |
| 3-4 ADLs | 3.3 | 3.3 | 3.4 |  |
| 5-6 ADLs | 6.0 | 6.2 | 3.1 | 3.1 |
| Living in an institution |  |  | 5.6 | 4.8 |

Different indicators can be used to monitor disability, including limitations in activities of daily living (ADLs) and instrumental activities of daily living (IADLs) and measures of physical, cognitive, and social functioning. Aspects of physical functioning such as the ability to lift heavy objects, walk 23 blocks, or reach up over one's head are more closely linked to physiological capabilities than are ADLs and IADLs, which may be influenced by social and cultural role expectations and by changes in technology.

Percentage of Medicare enrollees age 65 and over who are unable to perform certain physical functions, by sex, 1991 and 2003

Note: Rates for 1991 are age-adjusted to the 2003 population.
Reference population: These data refer to Medicare enrollees.
Source: Centers for Medicare \& Medicaid Services, Medicare Current Beneficiary Survey.

Additional information for this indicator can be found at www.agingstats.gov.

Percentage of Medicare enrollees age 65 and over who are unable to perform certain physical functions, by sex, 1991 and 2003

| Function | 1991 | 2003 |
| :--- | ---: | :---: |
| Percent |  |  |

| Walk 2-3 blocks | 31.8 | 31.5 |
| Lift 10 lbs. |  |  |
| Any of these five |  |  |

[^2]

## INDICATOR 20

## Respondent-Assessed Heallth Status

Asking people to rate their health as excellent, very good, good, fair, or poor provides a common indicator of health easily measured in surveys. It represents physical, emotional, and social aspects of health and well-being. Respondent-assessed health ratings of good, very good, and excellent correlate with lower risks of mortality. ${ }^{9}$

Percentage of people age 65 and over who reported having good to excellent health, by age group and race and Hispanic origin, 2002-2004

Note: Data are based on a 3-year average from 2002-2004. People of Hispanic origin may be of any race.
Reference population: These data refer to the civilian noninstitutionalized population.
Source: Centers for Disease Control and Prevention, National Center for Health Statistics, National Health Interview Survey.

## Additional information for this indicator can be found at www.agingstats.gov.

Respondent-assessed health status among people age 65 and over, by age group and race and Hispanic origin, 2002-2004

## INDICATOR 21

## Vaccinations

Vaccinations against influenza and pneumococcal disease are recommended for older Americans, who are at increased risk for complications from these diseases compared with younger individuals. ${ }^{10,11}$ Influenza vaccinations are given annually, and pneumococcal vaccinations are usually given once in a lifetime. The costs associated with these vaccinations are covered under Medicare Part B.

Percentage of people age 65 and over who reported having been vaccinated against influenza and pneumococcal disease, by race and Hispanic origin, selected years 1989-2004

Note: People of Hispanic origin may be of any race. For influenza, the percentage vaccinated consists of people who reported having a flu shot during the past 12 months. For pneumococcal disease, the percentage refers to people who reported ever having a pneumonia vaccination. Reference population: These data refer to the civilian noninstitutionalized population.
Source: Centers for Disease Control and Prevention, National Center for Health Statistics, National Health Interview Survey.

Additional information for this indicator can be found at www.agingstats.gov.

## INDICATOR 22

## Mammography

Health care services and screenings can help prevent disease or detect it at an early, treatable stage. Mammography has been shown to be effective in reducing breast cancer mortality among women age 40 and over, especially for the $50-69$ age group. ${ }^{12}$

Percentage of women age 65 and over who had a mammogram in the past 2 years, by race and Hispanic origin, selected years 1987-2003

Note: People of Hispanic origin may be of any race.
Estimates for 2000 have been revised and may differ from what was reported in Older Americans 2004.
Reference population: These data refer to the civilian noninstitutionalized population.
Source: Centers for Disease Control and Prevention, National Center for Health Statistics, National Health Interview Survey.

## Additional information for this indicator can be found at www.agingstats.gov.

Percentage of women age 65 and over who reported having had a mammogram within the past 2 years, by selected characteristics, selected years 1987-2003

| Selected characteristic | 1987 | 1990 | 1991 | 1993 | 1994 | 1998 | 1999 | 2000 | 2003 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Percent |  |  |  |  |  |  |
| All women 65 and over | 22.8 | 43.4 | 48.1 | 54.2 | 55.0 | 63.8 | 66.8 | 67.9 | 67.7 |
| White, not Hispanic or Latino | 24.0 | 43.8 | 49.1 | 54.7 | 54.9 | 64.3 | 66.8 | 68.3 | 68.1 |
| Black, not Hispanic or Latino | 14.1 | 39.7 | 41.6 | 56.3 | 61.0 | 60.6 | 68.1 | 65.5 | 65.4 |
| Hispanic or Latino | 13.7 | 41.1 | 40.9 | 35.7 | 48.0 | 59.0 | 67.2 | 68.3 | 69.5 |

[^3]Estimates for 2000 have been revised and may differ from what was reported in Older Americans 2004.

## Dietary Quality

Dietary quality plays a major role in preventing or delaying the onset of chronic diseases such as coronary heart disease, certain types of cancer, stroke, and Type 2 diabetes. ${ }^{13}$ A healthy diet can reduce some major risk factors for chronic diseases, such as obesity, high blood pressure, and high blood cholesterol. ${ }^{14}$

Dietary quality ratings of people age 45 and over, as measured by the Healthy Eating Index, by age group and poverty status, 1999-2000

Note: Dietary quality was measured using the Healthy Eating Index (HEI).The HEI consists of 10 components, each representing a different aspect of a healthful diet based on the U.S. Department of Agriculture's Food Guide Pyramid and the Dietary Guidelines for Americans. Scores for each component are given equal weight and added to calculate an overall HEI score with a maximum value of 100 . An HEI score above 80 indicates a good diet, an HEI score between 51 and 80 signals a diet that needs improvement, and an HEl score below 51 indicates a poor diet. Reference population: These data refer to the civilian noninstitutionalized population.
Source: Centers for Disease Control and Prevention, National Center for Health Statistics, National Health and Nutrition Examination Survey.

## Additional information for this indicator can be found at www.agingstats.gov.

Dietary quality ratings of people age 45 and over, as measured by the Healthy Eating Index, by age group and poverty status, 1999-2000 (Last updated in Older Americans 2004)

|  | Age group |  |  | Poverty status among <br> people age 65 and over |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Rating | $45-64$ | 65 and over |  | Below poverty | Above poverty |
|  |  | Percent |  |  |  |
| Good | 12.4 | 19.4 | 8.8 | 21.3 |  |
| Needs improvement | 69.0 | 66.7 | 77.2 | 64.8 |  |
| Poor | 18.6 | 13.9 | 14.0 | 13.9 |  |

## INDICATOR 24

## Physical Activity

Physical activity is beneficial for the health of people of all ages, including the 65 and over population. It can reduce the risk of certain chronic diseases, may relieve symptoms of depression, helps to maintain independent living, and enhances overall quality of life. ${ }^{15,16}$ Research has shown that even among frail and very old adults, mobility and functioning can be improved through physical activity. ${ }^{17}$

Percentage of people age 45 and over who reported engaging in regular leisure time physical activity, by age group, 1997-2004

Note: Data are based on 2-year averages. "Regular leisure time physical activity" is defined as "engaging in light-moderate leisure time physical activity for greater than or equal to 30 minutes at a frequency greater than or equal to 5 times per week, or engaging in vigorous leisure time physical activity for greater than or equal to 20 minutes at a frequency greater than or equal to 3 times per week."
Reference population: These data refer to the civilian noninstitutionalized population
Source: Centers for Disease Control and Prevention, National Center for Health Statistics, National Health Interview Survey.

## Additional information for this indicator can be found at www.agingstats.gov.

## INDICATOR 25

## Obesity

Obesity and overweight have reached epidemic proportions in the United States and may soon rival cigarette smoking as a major cause of preventable disease and premature death. ${ }^{18}$ Both are associated with increased risk of coronary heart disease; Type 2 diabetes; endometrial, colon, postmenopausal breast, and other cancers; asthma and other respiratory problems; osteoarthritis; and disability. ${ }^{19,20}$ The increase in prevalence of obesity among older adults has been especially dramatic. ${ }^{21}$

## Percentage of people age 65 and over who are obese, by sex and age group, selected years 1976-2004

Note: In Older Americans 2004 data were combined for 1999-2002; two-year estimates are shown here. Confidence intervals associated with these two-year estimates are larger than those associated with four-year estimates. Data for people age 75 and over are not available for 1976-1980.
Reference population: These data refer to the civilian noninstitutionalized population.
Source: Centers for Disease Control and Prevention, National Center for Health Statistics, National Health and Nutrition Examination Survey

[^4]
## INDICATOR 26

## Cigarette Smoking

Smoking has been linked to an increased likelihood of cancer, cardiovascular disease, chronic obstructive lung diseases, and other debilitating health conditions. Among older people, the death rate for chronic lower respiratory diseases (the fourth leading cause of death among people age 65 and over) has increased since $1980 .{ }^{22}$ This increase reflects, in part, the effects of cigarette smoking. ${ }^{23}$

Percentage of people age 65 and over who are current cigarette smokers, by sex, selected years 1965-2004

Reference population: These data refer to the civilian noninstitutionalized population.
Source: Centers for Disease Control and Prevention, National Center for Health Statistics, National Health Interview Survey.

Additional information for this indicator can be found at www.agingstats.gov.

| 1993 | 13.5 | 10.5 |  |  |  |

## INDICATOR 27

## Air Quality

As people age, their bodies are less able to compensate for the effects of environmental hazards. Air pollution can aggravate heart and lung disease, leading to increased medication use, more visits to health care providers, admissions to emergency rooms and hospitals, and even death. An important indicator for environmental health is the percentage of older adults living in areas that have measured air pollutant concentrations above the Environmental Protection Agency's (EPA) established standards. Ozone and particulate matter (PM) (especially smaller, fine particle pollution called PM 2.5) have the greatest potential to affect the health of older adults. Fine particle pollution has been linked to premature death, cardiac arrhythmias and heart attacks, asthma attacks, and the development of chronic bronchitis. Ozone, even at low levels, can exacerbate respiratory diseases such as chronic obstructive pulmonary disease or asthma. ${ }^{24-28}$

Note: The term "Poor air quality" is defined as air quality concentrations above the level of the National Ambient Air Quality Standards (NAAQS). The term "Any standard" refers to any NAAQS for ozone, particulate matter, nitrogen dioxide, sulfur dioxide, carbon monoxide, and lead. Reference population:These data refer to the resident population.
Source: U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards, Air Quality System; U.S. Census Bureau, Population Projections; Woods and Poole Population Projections, 2000-2004.

## Additional information for this indicator can be found at www.agingstats.gov.

Percentage of people age 65 and over living in counties with "Poor air quality," 2000-2004

| Pollutant measures | 2000 | 2001 | 2002 | 2003 | 2004 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Percent |  |  |  |  |  |
| Particulate matter (PM 2.5) | 27.3 | 24.3 | 19.4 | 16.6 | 13.6 |
| 8hr Ozone | 26.2 | 37.5 | 45.7 | 32.7 | 11.9 |
| Any standard | 41.0 | 44.9 | 48.8 | 39.5 | 23.4 |

Air quality varies across the United States; thus, where people live can affect their health risk. Each State monitors air quality and reports findings to the EPA. In turn, the EPA determines whether pollutant measurements are above the standards that have been set to protect human health.

Counties with "Poor air quality" for any standard in 2004

Note: The term "Poor air quality" is defined as air quality concentrations above the level of the National Ambient Air Quality Standards (NAAQS). The term "Any standard" refers to any NAAQS for ozone, particulate matter, nitrogen dioxide, sulfur dioxide, carbon monoxide, and lead. Reference population: These data refer to the resident population.

## Health Care

Indicator 28: Use of Health Care Services (updated)
Indicator 29: Health Care Expenditures (updated)
Indicator 30: Prescription Drugs (updated)
Indicator 31: Sources of Health Insurance (updated)
Indicator 32: Out-of-Pocket Health Care Expenditures (updated)
Indicator 33: Sources of Payment for Health Care Services (updated)
Indicator 34: Veterans' Health Care (updated)
Indicator 35: Nursing Home Utilization
Indicator 36: Residential Services (updated)
Indicator 37: Caregiving and Assistive Device Use

## INDICATOR 28

## Use of Health Care Services

Most older Americans have health insurance through Medicare. Medicare covers a variety of services, including inpatient hospital care, physician services, hospital outpatient care, home health care, skilled nursing facility care, hospice services, and (beginning in January 2006) prescription drugs. Utilization rates for many services change over time because of changes in physician practice patterns, medical technology, Medicare payment amounts, and patient demographics.

Medicare-covered hospital and skilled nursing facility stays per 1,000 Medicare enrollees age 65 and over in fee-for-service, 1992-2002

Note: Data are for Medicare enrollees in fee-for-service only. Beginning in 1994, managed care enrollees were excluded from the denominator of all utilization rates because utilization data are not available for them. Prior to 1994, managed care enrollees were included in the denominators; they comprised 7 percent or less of the Medicare population
Reference population: These data refer to Medicare enrollees.
Source: Centers for Medicare \& Medicaid Services, Medicare claims and enrollment data.

Additional information for this indicator can be found at www.agingstats.gov.

Use of Medicare-covered health care services by Medicare enrollees age 65 and over in Fee-For-Service, 1992-2002

| Utilization measure | 1992 | 1993 | 1994 | 1995 | 1996 | 1997 | 1998 | 1999 | 2000 | 2001 | 2002 |

| Rate per thousand |  |  |  |  |  |  |  |  |  |  |  |
| Physician visits | 11,359 | 11,600 | 12,045 | 12,372 | 12,478 | na | 13,061 | na | 13,346 | 13,685 | na |
| Home health care visits | 3,822 | 4,648 | 6,352 | 7,608 | 8,376 | 8,227 | 5,058 | 3,708 | 2,913 | 2,295 | 2,358 |
| na Data not available. |  |  |  |  |  |  |  |  |  |  |  |

## INDICATOR 29

## Health Care Expenditures

Older Americans use more health care than any other age group. Health care costs are increasing rapidly at the same time the Baby Boom generation is approaching retirement age.

Additional information for this indicator can be found at www.agingstats.gov.

Average annual health care costs for Medicare enrollees age 65 and over, in 2003 dollars, by age group, 1992-2003

| Age group | 1992 | 1993 | 1994 | 1995 | 1996 | 1997 | 1998 | 1999 | 2000 | 2001 | 2002 | 2003 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Dollars |  |  |  |  |  |  |  |  |  |  |  |  |
| 65 and over \$ | \$ 8,417 \$ | \$ 9,020 \$ | \$ 9,723 | \$10,171 \$ | \$10,284 | \$10,514 | \$10,262 | \$10,547 | \$10,949 | \$11,555 | \$12,402 | \$12,510 |
| 65-74 | 6,264 | 6,543 | 7,184 | 7,401 | 7,444 | 7,428 | 7,179 | 8,007 | 8,153 | 8,785 | 9,559 | 9,473 |
| 75-84 | 9,211 | 10,310 | 10,769 | 11,130 | 11,576 | 11,679 | 11,416 | 11,184 | 11,935 | 12,848 | 13,468 | 13,981 |
| 85 and over | 16,281 | 16,874 | 18,221 | 19,238 | 18,830 | 19,049 | 19,172 | 18,522 | 18,877 | 19,277 | 20,104 | 19,658 |

Health care costs can be broken down into different types of goods and services. The amount of money older Americans spend on health care and the type of health care that they receive provide an indication of the health status and needs of older Americans in different age and income groups.

Major components of health care costs among Medicare enrollees age 65 and over, 1992 and 2003

```
Note: Data include both out-of-pocket costs and costs covered by insurance. "Other" includes short-term institutions, hospice services,
and dental care
Reference population: These data refer to Medicare enrollees.
Source: Centers for Medicare & Medicaid Services, Medicare Current Beneficiary Survey.
```

Additional information for this indicator can be found at www.agingstats.gov.

[^5]

## INDICATOR 30

## Prescription Drugs

Prescription drug costs have increased rapidly in recent years, as more new drugs have become available. Lack of prescription drug coverage has created a financial hardship for many older Americans. Medicare coverage of prescription drugs began in January 2006, including a low income subsidy.

> Average annual prescription drug costs and sources of payment among noninstitutionalized Medicare enrollees age 65 and over, in 2002 dollars, 1992-2002.

Note: Dollars have been inflation-adjusted to 2002 using the Consumer Price Index (Series CPI-U-RS). Public programs include Medicare, Medicaid, Department of Veterans Affairs, and other State and Federal programs.
Reference population: These data refer to Medicare enrollees.
Source: Centers for Medicare \& Medicaid Services, Medicare Current Beneficiary Survey.

Additional information for this indicator can be found at www.agingstats.gov.

## Average annual prescription drug costs and sources of payment among noninstitutionalized Medicare enrollees age 65 and over, in 2002 dollars, 1992-2002

| Payment source | 1992 | 1993 | 1994 | 1995 | 1996 | 1997 | 1998 | 1999 | 2000 | 2001 | 2002 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Average cost in dollars |  |  |  |  |  |  |  |  |  |  |
| Total | \$542 | \$719 | \$764 | \$801 | \$864 | \$944 | \$1,092 | \$1,222 | \$1,399 | \$1,568 | \$1,740 |

| 3-4 | 44.0 |
| 5 or more | 60.6 |
| Prescription drug coverage (2002) |  |
| Yes | 35.5 |
| No | 21.1 |

## INDICATOR 31

## Sources of Health Insurance

Nearly all older Americans have Medicare as their primary source of health insurance coverage. Medicare covers mostly acute care services and requires beneficiaries to pay part of the cost, leaving about half of health spending to be covered by other sources. Many beneficiaries have supplemental insurance to fill these gaps and to obtain services not covered by Medicare. Beginning in January 2006, beneficiaries have had the option of receiving prescription drug coverage through stand-alone prescription drug plans or through some Medicare Advantage health plans.

## Percentage of noninstitutionalized Medicare enrollees age 65 and over with

 supplemental health insurance, by type of insurance, 1991-2003

* Includes people with private supplement of unknown sponsorship.

Note: Estimates are based on enrollees' insurance status in the fall of each year. Categories are not mutually exclusive (i.e., individuals may have more than one supplemental policy). Chart excludes enrollees whose primary insurance is not Medicare (approximately 1 percent of enrollees). Starting with 1999 data, the methods to measure Medicaid eligibility differ from what was used in Older Americans 2004. Buy-in data obtained from administrative data are no longer used to define Medicaid eligibility in order to obtain a consistent measure for the entire time series. This change also affects the measurement of "no supplement."
Reference population: These data refer to Medicare enrollees.
Source: Centers for Medicare \& Medicaid Services, Medicare Current Beneficiary Survey.
Additional information for this indicator can be found at www.agingstats.gov.

## Out-of-Pocket Health Care Expenditures

Large out-of-pocket expenditures for health care service use have been shown to encumber access to care, affect health status and quality of life, and leave insufficient resources for other necessities. ${ }^{29,30}$ The percentage of household income that is allocated to health care expenditures is a measure of health care expense burden placed on older people.

Out-of-pocket health care expenditures as a percentage of household income, among people age 65 and over, by age and income category, 1977 and 2003

Note: Out-of-pocket health care expenditures exclude personal spending for health insurance premiums. Including expenditures for out-ofpocket premiums in the estimates of out-of-pocket spending would increase the percentage of household income spent on health care in all years. People are classified into the "poor/near poor" income category if their household income is below 125 percent of the poverty level; otherwise, people are classified into the "other" income category. The poverty level is calculated according to the U.S. Census Bureau guidelines for the corresponding year.
The ratio of a person's out-of-pocket expenditures to their household income was calculated based on the person's per capita household income. For people whose ratio of out-of-pocket expenditures to income exceeded 100 percent, the ratio was capped at 100 percent. For people with out-of-pocket expenditures and with zero income (or negative income) the ratio was set at 100 percent. For people with no out-of-pocket expenditures the ratio was set to zero. These methods differ from what was used in Older Americans 2004, which excluded persons with no out-of-pocket expenditures from the calculations ( 17 percent of the population age 65 and over in 1977, and 5 percent of the population age 65 and over in 2003). Reference population: These data refer to the civilian noninstitutionalized population.
Source: Agency for Healthcare Research and Quality, Medical Expenditure Panel Survey (MEPS) and MEPS predecessor surveys.
Additional information for this indicator can be found at www.agingstats.gov.

Note: Data from the 1987 survey have been adjusted to permit comparability across years; for details see Zuvekas and Cohen. ${ }^{31}$ For details on additional methods see note under chart.

## Sources of Payment for Health Care Services

Medicare covers about half of the health care costs of older Americans. Medicare's payments are focused on acute care services such as hospitals and physicians. Nursing home care, prescription drugs, and dental care have been primarily financed by other payers. Medicare coverage of prescription drugs began in January 2006, including a low income subsidy.

Additional information for this indicator can be found at www.agingstats.gov.

## INDICATOR 34

## Veterans' Health Care

The number of veterans age 65 and over who receive health care from the Veterans Health Administration (VHA), within the Department of Veterans Affairs, has been steadily increasing. This increase may be because VHA fills important gaps in older veterans' health care needs not currently covered or fully covered by Medicare, such as prescription drug benefits, mental health services, long-term care (nursing home and community-based care), and specialized care for the disabled.

Total number of veterans age 65 and over who are enrolled in or receiving care from the Veterans Health Administration, 1990-2004

[^7]Additional information for this indicator can be found at www.agingstats.gov.

## INDICATOR 35

## Nursing Home Utilization

Residence in a nursing home is an alternative to long-term care provided in one's home or in other community settings. Recent declines in rates of nursing home residence may reflect broader changes in the health care system affecting older Americans. Other forms of residential care and services, such as assisted living and home health care, have become more prevalent as rates of nursing home admissions have declined.

Rate of nursing home residence among people age 65 and over, by age group, 1985, 1995, 1997, and 1999

Note: Beginning in 1997, population figures are adjusted for net underenumeration using the 1990 National Population Adjustment Matrix from the U.S. Census Bureau. People residing in personal care or domiciliary care homes are excluded from the numerator. Reference population: These data refer to the resident population.
Source: Centers for Disease Control and Prevention, National Center for Health Statistics, National Nursing Home Survey.

Additional information for this indicator can be found at www.agingstats.gov.

> Rate of nursing home residence among people age 65 and over, by age group, 1985, 1995, 1997, and 1999 (Last updated in Older Americans 2004)

Percentage of nursing home residents age 65 and over receiving assistance with activities of daily living, by sex, 1985, 1995, 1997, and 1999

Note: The six activities of daily living (ADLs) included are bathing, dressing, eating, walking, toileting, and transferring in and out of bed or chairs. The resident's receipt of assistance with these activities refers to personal help received from facility staff at the time of the survey (for current residents) or the last time care was provided (for discharges). Help that a resident may receive from people who are not staff of the facility (e.g., family members, friends, or individuals employed directly by the patient and not by the facility) is not included.
Reference population: These data refer to the population residing in nursing homes. People residing in personal care or domiciliary care homes are excluded.
Source: Centers for Disease Control and Prevention, National Center for Health Statistics, National Nursing Home Survey.

Additional information for this indicator can be found at www.agingstats.gov.

## INDICATOR 36

## Residential Services

Some older Americans living in the community have access to various services through their place of residence. Such services may include meal preparation, laundry and cleaning services, and help with medications. Availability of such services through the place of residence may help older Americans maintain their independence and avoid institutionalization.

## Percentage of Medicare enrollees age 65 and over residing in selected residential settings, by age group, 2003

Note: Community housing with services applies to respondents who reported they lived in retirement communities or apartments, senior citizen housing, continuing care retirement facilities, assisted living facilities, staged living communities, board and care facilities/homes, and other similar situations, AND who reported they had access to one or more of the following services through their place of residence:meal preparation, cleaning or housekeeping services, laundry services, help with medications. Respondents were asked about access to these services but not whether they actually used the services. A residence is considered a long-term care facility if it is certified by Medicare or Medicaid; or has 3 or more beds and is licensed as a nursing home or other long-term care facility and provides at least one personal care service; or provides 24 -hour, 7 -day-a-week supervision by a caregiver.
Reference population: These data refer to Medicare enrollees.
Source: Centers for Medicare \& Medicaid Services, Medicare Current Beneficiary Survey.

Additional information for this indicator can be found at www.agingstats.gov.

## Percentage of Medicare enrollees age 65 and over residing in selected residential settings, by age group, 2003

| Long-term care facilities |  |  |  |  |

## Percentage of Medicare enrollees age 65 and over with functional limitations, by residential setting, 2003

Percent

Note: Community housing with services applies to respondents who reported they lived in retirement communities or apartments, senior citizen housing, continuing care retirement facilities, assisted living facilities, staged living communities, board and care facilities/homes, and other similar situations, AND who reported they had access to one or more of the following services through their place of residence:meal preparation, cleaning or housekeeping services, laundry services, help with medications. Respondents were asked about access to these services but not whether they actually used the services. A residence is considered a long-term care facility if it is certified by Medicare or Medicaid; or has 3 or more beds and is licensed as a nursing home or other long-term care facility and provides at least one personal care service; or provides 24 -hour, 7 -day-a-week supervision by a caregiver. IADL limitations refer to difficulty performing (or inability to perform, for a health reason) one or more of the following tasks: using the telephone, light housework, heavy housework, meal preparation, shopping, managing money. ADL limitations refer to difficulty performing (or inability to perform, for a health reason) the following tasks: bathing, dressing, eating, getting in/out of chairs, walking, using the toilet. Long-term care facility residents with no limitations may include individuals with limitations in certain IADLs: doing light or heavy housework or meal preparation. These questions were not asked of facility residents. Reference population: These data refer to Medicare enrollees.
Source: Centers for Medicare \& Medicaid Services, Medicare Current Beneficiary Survey.

## Additional information for this indicator can be found at www.agingstats.gov.

Percentage of Medicare enrollees age 65 and over with functional limitations, by residential setting, 2003

|  | Traditional <br> community | Community <br> housing with <br> services | Long-term <br> carefacility |
| :--- | :---: | :---: | :---: |
| Punctional status | 100.0 | 100.0 | 100.0 |
| Total | 59.3 | 31.0 | 3.8 |
| No functional limitations | 13.4 | 21.9 | 13.8 |

| 3 or more ADL limitations |  |  |  |

## INDICATOR 37

## Caregiving and Assistive Device Use

Although most long-term care spending in the United States is for nursing home and other institutionalized care, the majority of older people with disabilities live in the community and receive assistance from spouses, adult children, and other family members. Most of this care is unpaid, although an increasing number of older Americans with disabilities rely on a combination of unpaid and paid long-term care.

Distribution of Medicare enrollees age 65 and over receiving personal care for a chronic disability, by type of care, 1984, 1989, 1994, and 1999

Note: Informal care refers to unpaid assistance provided to a person with a chronic disability living in the community. Formal care refers to paid assistance.
Reference population: These data refer to Medicare enrollees living in the community who report receiving personal care from a paid or unpaid helper for a chronic disability
Source: National Long Term Care Survey.
Additional information for this indicator can be found at www.agingstats.gov.
Distribution of Medicare enrollees age 65 and over receiving personal care for a chronic disability, by type of care, 1984, 1989, 1994, and 1999 (Last updated in Older Americans 2004)

| Type of care | 1984 | 1989 | 1994 | 1999 |
| :---: | :---: | :---: | :---: | :---: |
|  | Number |  |  |  |
| Total Medicare enrollees | 27,967,944 | 30,871,346 | $33,125,154$ | 34,459,236 |
| Total Medicare enrollees receiving personal care | 4,094,565 | 3,946,598 | 3,844,871 | 3,700,889 |
|  | Percent |  |  |  |
| Total percentage of Medicare enrollees receiving personal care | 14.6 | 12.8 | 11.6 | 10.7 |
| Distribution of type of personal care | 100.0 | 100.0 | 100.0 | 100.0 |
| Informal only | 68.9 | 64.5 | 57.1 | 65.5 |
| Informal and formal | 26.0 | 28.4 | 36.1 | 25.9 |
| Formal only | 5.1 | 7.1 | 6.8 | 8.5 |

Possible reasons for the decline in the use of long-term care in the community include improvements in the health and disability of the older population, changes in household living arrangements (e.g., the move toward assisted living and other residential care alternatives), and greater use of special equipment and assistive devices that help older disabled people living in the community maintain their independence.

Distribution of Medicare enrollees age 65 and over using assistive devices and/ or receiving personal care for a chronic disability, 1984, 1989, 1994, and 1999

Note: Personal care refers to paid or unpaid assistance provided to a person with a chronic disability living in the community. Reference population: These data refer to Medicare enrollees living in the community who report receiving personal care from a paid or unpaid helper, or using assistive devices, or both, for a chronic disability.
Source: National Long Term Care Survey.
Additional information for this indicator can be found at www.agingstats.gov.

## INDICATOR 8 Income

Table 8. Income distribution of the population age 65 and over, 1974-2004

| Year | Poverty | Low income | Middle income | High income |
| :---: | :---: | :---: | :---: | :---: |
|  | Percent |  |  |  |
| 1974 | 14.6 | 34.6 | 32.6 | 18.2 |
| 1975 | 15.3 | 35.0 | 32.3 | 17.4 |
| 1976 | 15.0 | 34.7 | 31.8 | 18.5 |
| 1977 | 14.1 | 35.9 | 31.5 | 18.5 |
| 1978 | 14.0 | 33.4 | 34.2 | 18.5 |
| 1979 | 15.2 | 33.0 | 33.6 | 18.2 |
| 1980 | 15.7 | 33.5 | 32.4 | 18.4 |
| 1981 | 15.3 | 32.8 | 33.1 | 18.9 |
| 1982 | 14.6 | 31.4 | 33.3 | 20.7 |
| 1983 | 13.8 | 29.7 | 34.1 | 22.4 |
| 1984 | 12.4 | 30.2 | 33.8 | 23.6 |
| 1985 | 12.6 | 29.4 | 34.6 | 23.4 |
| 1986 | 12.4 | 28.4 | 34.4 | 24.8 |
| 1987 | 12.5 | 27.8 | 35.1 | 24.7 |
| 1988 | 12.0 | 28.4 | 34.5 | 25.1 |
| 1989 | 11.4 | 29.1 | 33.6 | 25.9 |
| 1990 | 12.2 | 27.0 | 35.2 | 25.6 |
| 1991 | 12.4 | 28.0 | 36.3 | 23.3 |
| 1992 | 12.9 | 28.6 | 35.6 | 22.9 |
| 1993 | 12.2 | 29.8 | 35.0 | 23.0 |
| 1994 | 11.7 | 29.5 | 35.6 | 23.2 |
| 1995 | 10.5 | 29.1 | 36.1 | 24.3 |
| 1996 | 10.8 | 29.5 | 34.7 | 25.1 |

[^9]
## INDICATOR 8 Income continued

Table 8. Income distribution of the population age 65 and over, 1974-2004 (continued)

| Year | Poverty | Low income | Middle income | High income |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Percent |  |  |
| 1997 | 10.5 | 28.1 | 35.3 |  |
| 1998 | 10.5 | 26.8 | 35.3 | 26.0 |
| 1999 | 9.7 | 26.2 | 36.4 | 27.5 |
| 2000 | 9.9 | 27.5 | 35.5 | 27.7 |
| 2001 | 10.1 | 28.1 | 35.2 | 27.1 |
| 2002 | 10.4 | 28.0 | 35.3 | 26.7 |
| 2003 | 10.2 | 28.5 | 33.8 | 26.2 |
| 2004 | 9.8 | 28.1 | 34.6 | 27.5 |

Note: The income categories are derived from the ratio of the family's income (or an unrelated individual's income) to the corresponding poverty threshold. Being in poverty is measured as income less than 100 percent of the poverty threshold. Low income is between 100 percent and 199 percent of the poverty threshold. Middle income is between 200 percent and 399 percent of the poverty threshold. High income is 400 percent or more of the poverty threshold.
Reference population: These data refer to the civilian noninstitutionalized population.
Source: U.S. Census Bureau, Current Population Survey, Annual Social and Economic Supplement, 1975-2005.

## INDICATOR 9 Sources of Income

Table 9a. Aggregate income by source for the population age 65 and over, selected years 1962-2004

| Year | Total | Social Security | Asset income | Pensions | Earnings | Other |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Percent |  |  |  |  |  |
| 1962 | 100 | 31 | 16 | 9 | 28 | 16 |
| 1967 | 100 | 34 | 15 | 12 | 29 | 10 |
| 1976 | 100 | 39 | 18 | 16 | 23 | 4 |
| 1978 | 100 | 38 | 19 | 16 | 23 | 4 |
| 1980 | 100 | 39 | 22 | 16 | 19 | 4 |
| 1982 | 100 | 39 | 25 | 15 | 18 | 3 |
| 1984 | 100 | 38 | 28 | 15 | 16 | 3 |
| 1986 | 100 | 38 | 26 | 16 | 17 | 3 |
| 1988 | 100 | 38 | 25 | 17 | 17 | 3 |
| 1990 | 100 | 36 | 24 | 18 | 18 | 4 |
| 1992 | 100 | 40 | 21 | 20 | 17 | 2 |
| 1994 | 100 | 42 | 18 | 19 | 18 | 3 |
| 1996 | 100 | 40 | 18 | 19 | 20 | 3 |
| 1998 | 100 | 38 | 20 | 19 | 21 | 2 |
| 1999 | 100 | 38 | 19 | 19 | 21 | 3 |
| 2000 | 100 | 38 | 18 | 18 | 23 | 3 |
| 2001 | 100 | 39 | 16 | 18 | 24 | 3 |
| 2002 | 100 | 39 | 14 | 19 | 25 | 3 |
| 2003 | 100 | 39 | 14 | 19 | 25 | 2 |
| 2004 | 100 | 39 | 13 | 20 | 26 | 2 |

[^10]INDICATOR 11 Participation in the Labor Force
Table 11. Labor force participation rates of people age 55 and over, by age group and sex, annual averages, 1963-2005

| Year | Men |  |  |  | Women |  |  |  |

## INDICATOR 14 Mortality

Table 14a. Death rates for selected leading causes of death among people age 65 and over, 1981-2003

| Year | Diseases of heart | Malignant neoplasm | Cerebrovascular diseases | Chronic lower respiratory diseases | Influenza and pneumonia | Diabetes mellitus | Alzheimer's disease |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Number per 100,000 population |  |  |  |  |  |  |  |
| 1981 | 2,546.7 | 1,055.7 | 623.8 | 185.8 | 207.2 | 105.8 | 6.0 |
| 1982 | 2,503.2 | 1,068.9 | 585.2 | 186.1 | 181.2 | 102.3 | 9.2 |
| 1983 | 2,512.0 | 1,077.5 | 564.4 | 204.3 | 207.2 | 104.4 | 16.3 |
| 1984 | 2,449.5 | 1,087.1 | 546.2 | 210.8 | 214.0 | 102.6 | 23.5 |
| 1985 | 2,430.9 | 1,091.2 | 531.0 | 225.4 | 242.9 | 103.4 | 31.0 |
| 1986 | 2,371.7 | 1,101.2 | 506.3 | 227.7 | 244.7 | 100.8 | 35.0 |
| 1987 | 2,316.4 | 1,105.5 | 495.9 | 229.7 | 237.4 | 102.3 | 41.8 |
| 1988 | 2,305.7 | 1,114.1 | 489.4 | 240.0 | 263.1 | 104.7 | 44.7 |
| 1989 | 2,171.8 | 1,133.0 | 463.7 | 240.2 | 253.3 | 120.4 | 47.3 |
| 1990 | 2,091.1 | 1,141.8 | 447.9 | 245.0 | 258.2 | 120.4 | 48.7 |
| 1991 | 2,045.6 | 1,149.5 | 434.7 | 251.7 | 245.1 | 120.8 | 48.7 |
| 1992 | 1,989.5 | 1,150.6 | 424.5 | 252.5 | 232.7 | 120.8 | 48.8 |
| 1993 | 2,024.0 | 1,159.2 | 434.5 | 273.6 | 247.9 | 128.4 | 55.3 |
| 1994 | 1,952.3 | 1,155.3 | 433.7 | 271.3 | 238.1 | 132.6 | 59.8 |
| 1995 | 1,927.4 | 1,152.5 | 437.7 | 271.2 | 237.2 | 135.9 | 64.9 |
| 1996 | 1,877.6 | 1,140.8 | 433.1 | 275.5 | 233.5 | 139.4 | 65.9 |
| 1997 | 1,827.2 | 1,127.3 | 423.8 | 280.2 | 236.3 | 140.2 | 67.7 |
| 1998 | 1,791.5 | 1,119.2 | 411.9 | 286.8 | 247.4 | 143.4 | 67.0 |
| 1999 | 1,767.0 | 1,126.1 | 433.2 | 313.0 | 167.4 | 150.0 | 128.8 |
| 2000 | 1,694.9 | 1,119.2 | 422.7 | 303.6 | 167.2 | 149.6 | 139.9 |
| 2001 | 1,631.6 | 1,100.2 | 404.1 | 300.7 | 154.9 | 151.1 | 148.3 |
| 2002 | 1,585.2 | 1,090.9 | 393.2 | 300.6 | 160.7 | 152.0 | 158.7 |
| 2003 | 1,524.9 | 1,073.0 | 372.8 | 299.1 | 154.8 | 150.7 | 167.7 |

Note: Death rates for 1981-98 are based on the 9 ${ }^{\text {th }}$ revision of the International Classification of Disease (ICD-9). Starting in 1999, death
rates are based on ICD-10. For the period 1981-98, causes were coded using ICD-9 codes that are most nearly comparable with the 113 cause list for ICD-10 and may differ from previously published estimates. Population estimates for July 1, 2000, and July 1, 2001, are post-censal estimates and have been bridged to be consistent with the race categories used in the 1990 Decennial Census. These estimates were produced by the National Center for Health Statistics under a collaborative arrangement with the U.S. Census Bureau Population estimates for 1990-1999 are intercensal estimates, based on the 1990 Decennial Census and bridged estimates for 2000. These estimates were produced by the Population Estimates Program of the U.S. Census Bureau with support from the National Cancer Institute (NCI). For more information on the bridged race population estimates for 1990-2001, see www.cdc.gov/nchs/about/ major/dvs/popbridge/popbridge.htm. Death rates for 1990-2001 may differ from those published elsewhere because of the use of the bridged intercensal and post-censal population estimates. Rates are age-adjusted using the 2000 standard population.
Reference population: These data refer to the resident population.

| Michigan | Wayne | Wyoming | Sweetwater |

[^12]The Historical Experience of Three Cohorts of Older Americans: A Timeline of Selected Events

[^0]:    Note: Decennial Census data from 1950 to 2000 used to construct this indicator in Older Americans 2000 and 2004 have been replaced with data

[^1]:    Note: Data for 1984-2001 have been inflation-adjusted to 2003 dollars.

[^2]:    Note: Rates for 1991 are age-adjusted to the 2003 population.

[^3]:    Note: People of Hispanic origin may be of any race.

[^4]:    na Data not available.
    Note: In Older Americans 2004 data were combined for 1999-2002; two-year estimates are shown here. Confidence intervals associated with these two-year estimates are larger than those associated with four-year estimates.

[^5]:    Note: Dollars are not inflation-adjusted.

[^6]:    Note: OOP refers to out-of-pocket payments.

[^7]:    Note: Department of Veterans Affairs (VA) enrollees are veterans who have signed-up to receive health care from the Veterans Health Administration (VHA), and VA patients are enrollees who have received care in each year through VHA. Reference population: These data refer to the total veteran population, VHA enrollment population, and VHA patient population. Source: Department of Veterans Affairs, Office of the Actuary, Vet Pop 2001 adjusted by Census 2000 (February 2003) and Vet Pop 2004 (January 2005); and VHA Enrollment and Patient Files.

[^8]:    Reference population: These data refer to the resident population.
    Source: U.S. Census Bureau, July 1, 2004 Population Estimates.

[^9]:    See footnotes at end of table.

[^10]:    Note: The definition of "other" includes, but is not limited to, public assistance, unemployment compensation, worker's compensation, alimony, child support, and personal contributions.
    Reference population: These data refer to the civilian noninstitutionalized population.
    Source: Social Security Administration, 1963 Survey of the Aged, 1968 Survey of Demographic and Economic Characteristics of the Aged; U.S. Census Bureau, Current Population Survey, Annual Social and Economic Supplement, 1976-2004.

[^11]:    Note: People of Hispanic or Latino origin may be of any race. For influenza, the percentage vaccinated consists of people who reported having a flu shot during the past 12 months. For pneumococcal disease, the percentage refers to people who reported ever having a pneumonia vaccination. See Appendix B in Older Americans 2004 for the definition of race and ethnicity in the National Health Interview Survey.
    Reference population: These data refer to the civilian noninstitutionalized population.
