Map Notes

- This map was developed solely for the purpose of determining whether mapping is useful for making management decisions.
- Income level is only one factor in determining client eligibility, set at or below 125% of the poverty level. Other factors may include: asset ceilings, alien status, citizenship, conflict of interest, recipient resources, or unique client circumstances that allow recipients to use their discretion in providing services. See 45 CFR Parts 1601-1644.
- On this map Brief Service is defined as LSC Counsel Advice (A) and Brief Service (B) CSR categories. Extended Service cases are defined as Negotiated Settlement with (G) or without (F) Litigation, Agency (H) or Court Decision (I) or Other (K). Referrals are Referred after Assessment (C) cases. Not shown on this map are Insufficient Merit (D), Client Withdrew (E) and Change in Eligibility Status (J) cases.

- Inset maps are not to scale.
- Some extreme changes may be due to the realignment and splitting of Census Tracts by the Bureau of Census between the 1990 and 2000 Censuses.
- 1989 income was adjusted to 1999 dollars.
- Dots are placed randomly within Census Block Group.
