

## Evaluation

Your group's performance will be evaluated according to the criteria in this rubric:

| <b>Objectives</b>                           | <b>Advanced<br/>(4 points)</b>  | <b>Mastery<br/>(3 points)</b>   | <b>Moderate<br/>(2 points)</b>  | <b>Basic<br/>(1 point)</b>  |
|---|---|---|---|---|
| <b>Investigation</b>                        | Research pages complete and show synthesis of information from numerous sites to answer all questions posed in the WebQuest | Research pages complete; notes include information from multiple sites and address most questions posed in the WebQuest | Research pages are partially complete and address some of the questions posed in the WebQuest   | Research pages are incomplete and WebQuest questions were not answered  |
| <b>Plan of Action</b>                       | Demonstrated understanding of Guinea worm life cycle and proposed 3 feasible actions for combating the disease              | Demonstrate understanding of Guinea worm life cycle and proposed 1-2 feasible actions for combating the disease         | Demonstrated partial understanding of Guinea worm life cycle and proposed some actions for combating the disease                                | Did not demonstrate understanding of the Guinea worm life cycle and did not propose actions for combating the disease |
| <b>Public Service Announcement: Format</b>  | PSA explained the proposed action plan (what, why, and how) exceptionally clearly and concisely                             | PSA explained the proposed action plan (what, why, and how) adequately  | PSA explained the proposed action plan (what, why, and how), but some elements of the plan were unclear   | PSA does not explain a proposed action plan (what, why, and how) or proposed plan is unclear from the PSA             |
| <b>Public Service Announcement: Content</b> | PSA clearly demonstrates extensive knowledge of Guinea worm disease and the Guinea worm life cycle                          | PSA demonstrates some knowledge of Guinea worm disease and the Guinea worm life cycle                                   | PSA demonstrates some knowledge of Guinea worm disease, but it is unclear how the proposed plan of action relates to the Guinea worm life cycle | PSA demonstrates limited understanding of Guinea worm disease or the Guinea worm life cycle                           |
| <b>Team Work</b>                            | Group shared responsibilities and worked cooperatively on all parts of the task   | Groups shared responsibilities and worked cooperatively most of the time  | Some members contributed more than others; group worked cooperatively on some parts of the tasks  | Group did not divide share responsibilities or work cooperatively for most of the tasks                               |
