

Qualified Registries for the 2012 Physician Quality Reporting System (PQRS) and Electronic Prescribing (eRx) Incentive Programs

CMS is pleased to announce the registries that have become “qualified” to submit quality data to CMS on behalf of their eligible professionals for 2012 PQRS reporting. Each of these registries has completed a thorough vetting process which includes: checking their capability to provide the required PQRS data elements, reviewing measure flows and algorithms to perform use case calculations (this checks to see whether the registry calculates the measure’s reporting and performance rates correctly), and transmitting the required information in the requested file format (XML).

If you do not see that name of a registry you worked with in the past, please check the list of 2012 qualified Data Submission Vendors.

Eligible professionals who wish to participate in 2012 PQRS using one of the registry-based options may contact the registries listed below for additional details on participation options.

Disclaimer: While CMS makes every effort, by way of a vigorous testing process, to ensure that these registries will be able to submit their eligible professional’s quality measures data to CMS, CMS cannot guarantee that any individual eligible professional will be successful. Each vendor has reviewed their organization’s information below and provided confirmation of accuracy. Information included in this document was accurate at the time posting; however CMS cannot guarantee that these services will be available during the submission period.

*CMS encourages registries to disclose cost information incurred by their clients but it is not required from the 2012 Qualified Registries. Cost disclosure will be required from Qualified Registry vendors in the 2013 program year.
