## **7.1 - Annual MR Strategy**

*(Rev. 313; Issued: 11-20-09; Effective/Implementation Date: 12-21-09)*

Each fiscal year, the contractors shall develop and document a unique annual MR strategy within their jurisdiction. This strategy must be consistent with the goal of reducing the claims payment error rate.

The MR strategy shall detail identified MR issues, activities, projected goals, and the evaluation of activities and goals. It must be a fluid document that is revised, as targeted issues are successfully resolved, and other issues take their place. The initial strategy submitted at the beginning of the fiscal year shall be based on the strategy from the current fiscal year and updated and expanded upon as necessary.

The contractor shall analyze data from a variety of sources in the initial step in updating the MR strategy. The contractor shall use their CERT findings as the primary source of data to base further data analysis in identifying program vulnerabilities. CERT is only a pointer and cannot be relied upon as a single source of information. Contractors should use their internal data to verify that the CERT findings are (or are not) currently problems of sufficient magnitude to be included in their MR strategy in the appropriate priority. Other problems identified from other sources may be of higher priority, but contractors must review the CERT findings in terms of their own data and MR activities. Other data sources can include, but are not limited to, information gathered from other operational areas, such as appeals and inquiries, that interact with MR and provider outreach and education POE.

After information and data is gathered and analyzed, the contractor shall develop and prioritize a problem list. A problem list is a list of the program vulnerabilities that threaten the Medicare Trust Fund that can be addressed through MR activities. The contractor shall consider resources and the scope of each identified medical review issue, when prioritizing their problem list. In addition, the contractor shall identify and address, in the problem list, work that is currently being performed and problems that will carry over to the following fiscal year. Once a problem list is created, the contractor shall develop MR interventions using the PCA process (IOM Pub 100-8, chapter 3, section 14) to address each problem.

The methods and resources used for MR interventions depend on the scope and severity of the problems identified and the action needed to successfully address the problems. For example, if initial MR actions such as an MR notification letter to the provider and placement on prepayment review are insufficient to improve the provider's billing accuracy, a priority referral to POE for potential intervention may be necessary. Alternately, if on initial probe, a medium or high priority problem is identified, MR may determine that the initial issuance of probe result letter is insufficient, and a priority referral to POE, and/or more intensive medical review corrective actions may be required. A priority referral is an indication to the POE department that this is a problem which MR has determined will likely require further educational intervention. If, through communication with POE, it is determined that MR intervention and POE educational

efforts have not effectively resolved the problem, a referral to the PSC BI unit may be indicated.

In addition, all claims reviewed by medical review shall be identified by MR data analysis and addressed as a prioritized problem in the MR strategy and reflected in the SAR. If resources allow, an MR nurse may be shared with another functional area, such as claims processing, as long as only the percentage of the nurses time spent on MR activities is identified in the strategy and accounted for in the appropriate functional area. For example, if MR agrees to share 0.5 of an FTE with claims processing to assist with the pricing of NOC claims, this 0.5 FTE shall be accounted for in claims processing.

The contractor shall develop multiple tools to effectively address identified problems for the local Medicare providers. The MR strategy shall include achievable goals and evaluation methods that test the effectiveness and efficiency of activities designed to resolve targeted medical review problems. These evaluation methods will be dependent upon effective communication between the MR and POE departments. MR shall work with POE to develop an effective system of communication regarding the disposition of problems referred to POE. Within MR, a system shall be used to track referrals to POE, follow-up communication with POE, and MR interventions used to address identified problems. The PSC shall include what information is required in the referrals to POE within the AC or MAC JOA.

As problems are addressed within MR or referred to POE, the MR department shall incorporate processes for follow-up that ensure appropriate resolution of the issue. If aberrancies continue, the contractor shall use the information gathered through communication with POE to determine a more progressive course of action, such as increase in prepay MR, priority referral to POE, or referral to BI in cases of suspected fraud. Effective tracking of MR and POE efforts to resolve identified problems is integral to development of any case referred for potential investigation by the PSC (see PIM, chapter 4, section 4.3). As issues are successfully resolved, the contractor shall continue to address other program vulnerabilities identified on the problem list.

The MR strategy shall include a section that describes the process used to monitor spending in each CAFM II Activity Code. The process shall ensure that spending is consistent with the allocated budget and include a process to revise or amend the plan when spending is over or under the budget allocation. In addition, the strategy shall describe how workload for each CAFM II Activity Code is accurately and consistently reported. The workload reporting process shall also assure the proper allocation of employee hours required for each activity. Program safeguard contractors (PSC) and Medicare administrative contractors (MACs) shall not report cost and workload using the CAFM II system. Instead, the contractor shall report cost and workload in the CMS analysis, reporting, and tracking (ART) system.

In each element of the MR strategy, the contractor shall incorporate quality assurance activities as described below. Quality assurance activities ensure that each element is being performed consistently and accurately throughout the contractor's MR program. In

addition, the contractor shall have in place procedures for continuous quality improvement. Quality improvement builds on quality assurance in that it allows the contractor to analyze the outcomes from their program and continually improve the effectiveness of their processes.

In order to assist contractors in developing their strategies, the CMS has developed the following generic template that can be used to help guide contractor planning and ensure that all activities and expected outcomes are reported. Examples of actions which might be listed in the intervention list include, but are not limited to service-specific probes, notification letters, POE priority referrals, and automated denials based on LCDs.

List all the problems identified and prioritize them. The contractor shall describe the method and criteria used to prioritize the problem list. The contractor should consider using scope of problem and resources available as criteria to prioritize the list. The list should be long while the MR strategy may only address the first few initially. When developing their prioritized list, the contractor shall consider their resources and other operational areas of the contractor with similar goals. The MR strategy is a fluid document and shall be continuously reviewed and adjusted as problems are resolved and new problems take are addressed.

Quality Assurance:

The contractor shall list the data and the metrics used to determine and verify each identified problem. That is, each identified problem should have an explanation of data and other information used to support the decision to include the problem and assign its priority. In addition, the quality assurance process shall ensure that MR consults with POE to ensure that duplicate efforts are not being undertaken or consistently being

overturned on appeal. Furthermore, an effective quality assurance process shall include periodic meetings with other operational areas, including POE.

### **7.1.1 - Data Analysis and Information Gathering**

*(Rev. 313; Issued: 11-20-09; Effective/Implementation Date: 12-21-09)*

The data analysis plan shall list the data resources used in developing the strategy and the MR process. Examples of helpful resources include national database reporting systems, internal claims reports, provider feedback, team meetings with appeals and provider inquiry, SADMERC data, provider tracking tools to identify potential coverage and coding problems, CERT data, SAS 70 findings, benefit integrity (BI) information, and any additional data developed by the contractor. The data analysis plan shall list the data resources and processes used in development of the MR strategy.

#### Quality Assurance:

For quality assurance purposes, the contractor shall develop a process that includes frequent review of data and how the information is used. For example, establish a committee that routinely reviews data results. Document committee members' job titles, qualifications and contract operational areas they represent. Describe the log system or tracking system utilized for data analysis and how this information was developed via meetings and/or brainstorming. The contractor can use the CERT findings to demonstrate how well the contractor is performing their data analysis.

### **7.1.2 - Problem Identification & Prioritization**

*(Rev. 313; Issued: 11-20-09; Effective/Implementation Date: 12-21-09)*

List all the problems identified and prioritize them. The contractor shall describe the method and criteria used to prioritize the problem list. The contractor should consider using scope of problem and resources available as criteria to prioritize the list. The list should be long while the MR strategy may only address the first few initially. When developing their prioritized list, the contractor shall consider their resources and other operational areas of the contractor with similar goals. The MR strategy is a fluid document and shall be continuously reviewed and adjusted as problems are resolved and new problems take are addressed.

#### Quality Assurance:

The contractor shall list the data and the metrics used to determine and verify each identified problem. That is, each identified problem should have an explanation of data and other information used to support the decision to include the problem and assign its priority. In addition, the quality assurance process shall ensure that MR is not focusing on problems that are being addressed by the POE unit or consistently being overturned on appeal. Furthermore, an effective quality assurance process shall include periodic meetings with other operational areas, including POE.

### **7.1.3 - Intervention Planning**

*(Rev. 313; Issued: 11-20-09; Effective/Implementation Date: 12-21-09)*

To address the problems identified in the MR strategy, the contractor shall design a comprehensive plan of interventions. Interventions may involve projected medical review of claims, referral of providers to POE or the PSC BI unit, edit modifications and development or revisions of LCDs.

#### Quality Assurance:

The contractor shall include a quality assurance element in each intervention that checks for effectiveness and progress towards the specified goal. The QA component shall include a projected goal, a timeline to achieve the goal, and an element to assess effectiveness of the intervention and progress towards the stated goal. Examples of QA for interventions include, but are not limited to, tests for edit effectiveness, post-test of educational interventions, claims review after an educational intervention, systematic reviews of LCDs, etc. Finally, the QA component shall include a determination of whether the problem has been resolved or a more progressive course of action is required.

### **7.1.4 - Program Management**

*(Rev. 313; Issued: 11-20-09; Effective/Implementation Date: 12-21-09)*

The MR program management encompasses managerial responsibilities inherent in managing the MR program, including: development, modification, and periodic reporting of MR strategies and quality assurance activities; planning monitoring and adjusting workload performance; budget-related monitoring and reporting; and implementation of CMS MR instructions.

#### Quality Assurance:

The contractor shall describe in detail the quality improvement process. Include the processes employed to assure accuracy and consistency in the reporting of spending, workload and staffing levels. The contractor shall address how to maintain accuracy in decision-making (inter-reviewer reliability) and response to provider inquiries. In addition, the contractor shall describe the system for the review and evaluation of the MR strategy.

### **7.1.5 - Budget and Workload Management**

*(Rev. 313; Issued: 11-20-09; Effective/Implementation Date: 12-21-09)*

In order to effectively determine appropriate budget levels and accurately predict workload, the contractor shall complete the following chart (omitting the shaded areas) for each strategy developed. Note that this chart is only for the purposes of developing an MR strategy. Contractors are expected to report workloads and costs associated with all CAFM II activity codes and assigned workloads. PSCs and MACs shall not report

cost and workload using the CAFM II system. Instead, the PSC shall report cost and workload in the CMS ART system.

ACTIVITY CODE	ACTIVITY	BUDGET	PROJECTED WORKLOAD		
			Workload 1	Workload 2	Workload 3
<b>MEDICAL REVIEW PROGRAM</b>					
21001	Automated Review				
21002	Routine Reviews				
21007	Data Analysis				
21206	Policy Reconsideration/Revision				
21207	MR Program Management				
21208	New Policy Development				
21220	Complex Probe Sample Review				
21221	Prepay Complex Manual Review				
21221/01	Reporting for Advanced Determinations of Medicare Coverage (ADMC)				
21222	Postpay Complex Review				
21901	MIP CERT Support				

**NOTE:** When submitting the Interim Expenditure Report (IER), all defined workloads shall be entered.

In addition:

- The contractor shall explain methods for determining the appropriate amount of review for each CAFM II Activity Code. Contractors may perform automated, routine, and complex prepayment review and post-payment reviews. Contractors shall determine the appropriate amount of review to be performed for each CAFM II code within the constraints of their budget. Consideration shall be given to the cost effectiveness of each tool, as well as the appropriateness of each tool for resolving identified problems in achieving the overall goal of reducing the claims payment error rate.

- The contractor shall automate as much review as possible. For those types of review that cannot be automated, the contractor shall be able to justify why they cannot be automated. Only in those instances where reviews cannot be automated and does not require clinical judgment shall the contractor conduct routine reviews.

- The contractor shall identify any support services that will be provided to a PSC. The strategy shall detail the role of the PSC in the overall MR program for the contractor. For the PSCs that perform some medical review functions, they shall be involved with the development of the MR strategy.

- The contractor shall identify the process for determining when the contractor will develop or revise LCD.

**7.1.6 - Staffing and Workforce Management**

*(Rev. 313; Issued: 11-20-09; Effective/Implementation Date: 12-21-09)*

Contractors shall complete and include the following chart to project the number of full-time-equivalent (FTE) employees, their job titles and qualifications.

CAFM II Code	FTE	Description & Qualifications
21001		
21002		
21007		
21010		
21206		
21207		
21208		
21220		
21221		
21221/01 (DMERCs only)		
21222		

The contractor shall submit a MR strategy each fiscal year via the MR system located at CMS’s Local Coverage Systems Portal Web site. The MR strategy shall be updated as required. MAC contractors shall submit a MR strategy within 30 days after contract award and thereafter 30 calendar days prior to option year award.

**7.2 - Program Integrity Management Reports (PIMR)**

*(Rev. 71, 04-09-04)*

**7.2.1 - Background**

*(Rev. 71, 04-09-04)*

This section provides instructions for implementing PIMR for fiscal intermediaries (FIs), carriers, and DMERCs.

The PIMR system changes reporting requirements for medical review (MR) formerly in Publication 83 (Program Integrity Manual) Chapter 7 (MR and BI Reports) sections 1, 5, and 6-10. Before Publication 83, the requirements were in Publication 13 (Intermediary Manual) Part 2 §2301 and Part 3 §3939, and Publication 14 (Carriers Manual) Part 3 §§7504.2, 7535-7537, and 14021.

This system will improve the management of cost, savings, and workload data relative to the MR unit. The PIMR System will replace: The Report of Benefit Savings (RBS); the MR System 1 (MRS-1); the Focused MR (FMR) Report; and the Medicare Focused MR Status Report (MFSR) once it becomes fully operational.

The relevant FMR and MFSR data will be collected through PIMR. Mainly, this data relates to how problems are resolved. Certain aspects of the FMR and MFSR systems will not be continued; for instance, we will not obtain through PIMR data on procedure and diagnostic codes that define aberrancies. However, we will obtain the data (i.e., how aberrancies are resolved) we are currently obtaining on aberrancies on each provider type and provider subtype. The CMS will obtain that information through interfaces with the standard processing systems. The CMS will obtain PIMR data that it cannot extract from existing systems through manual reporting by contractor staff. Those reports will be due monthly within 15 calendar days following the end of the month (See section 2.5 [interactive modules] and 2.8.2.5.2 [Postpayment report] and 2.8.2.6 [Edit Descriptions]). Contractor data centers will transfer most of the data requested directly from contractor standard systems to the central office computer within 15 calendar days following the end of each month.

### **7.2.2 – Interface** **(Rev. 71, 04-09-04)**

The PIMR system will require summarized data from other CMS databases on a monthly basis. The databases include the Contractor Standard Systems, Contractor Reporting of Operational and Workload Data (CROWD), Contractor Administrative Cost and Financial Management System (CAFM II), Fraud Investigative Database (FID), the CMS complaint reporting system, and the CMS overpayment reporting system. CMS will use a data transfer utility to map and transfer the data. Mapping will be the responsibility of CMS.

### **7.2.3 - Policy** **(Rev. 71, 04-09-04)**

Requirements in this section were formerly in Publication 83 (Program Integrity Manual), Chapter 7 (MR and BI Reports), sections 1, 5, and 6-10. Previous to that, they were in

Publication 13 (Intermediary Manual) Part 2 §2301 and Part 3 §3939, and Publication 14 (Carriers Manual) Part 3 §§7504.2, 7535-7537, and 14021.

These instructions are reporting instructions; they are not instructions for how to perform MR or benefit integrity activities, or requirements for performing those activities.

#### **7.2.4 - Interactive Modules** (Rev. 71, 04-09-04)

Some of the required modules have manual interfaces in addition to a batch data transfer capability. They are the postpayment module described in section 2.8.2.5.2 and the edit description module described in section 2.8.2.6.

#### **7.2.5 - Edits CMS Applies To Report Submissions** (Rev. 71, 04-09-04)

The CMS applies two types of edits to PIMR data:

1. Totals by activity type, provider type, and provider subtype for each monthly submission are compared to the totals for the previous month. If a threshold of difference is exceeded, the file is rejected.
2. Submitted data is checked for formats and ranges specified in the CR. If data does not match the CR, the file is rejected.

Specific problems with each file are noted and the files are made available to data centers for correction. Rejected files should be corrected within five working days of the submission date.

#### **7.2.6 - Correcting A Submission** (Rev. 71, 04-09-04)

Errors in submissions are listed in the following datasets:

P#PMR.#PIMR.CXXXXXX.CVTTPAY.REPORT;  
P#PMR.#PIMR.CXXXXXX. CVTCLM. REPORT;  
P#PMR.#PIMR.CXXXXXX. CVTDNL. REPORT; and  
P#PMR.#PIMR.CXXXXXX. CVTOTR. REPORT;

The "XXXXXX" in the above data files is the contractor number. Contractors must access their data sets at the CMS data center each month, work with their data centers to correct the submission, and resubmit the entire file to the CMS data center.

#### **7.2.7 - Reporting Requirements** (Rev. 71, 04-09-04)

See attached Business requirements in Pub. 100-08 Medicare Program Integrity Manual. See section 2.8.11 for a suggested hierarchy of how maintainers should assign activity types when multiple activity types occur for the same claim line.

## **7.2.8 - Exhibits** **(Rev. 71, 04-09-04)**

### **7.2.8.1 - Definitions** **(Rev. 174, Issued: 11-17-06, Effective: 10-01-06, Implementation: 10-06-06)**

General data definitions. (See section 7.2.8.5.2 for a crosswalk between definitions and data items.)

The new system will require standard system data that can be classified under four different categories of activity measures: Effort, Workload, Denials, and Referrals. All definitions including the ones for fully automated edits and Correct Coding Initiative (CCI) edits apply to all program integrity activities and not just medical review (MR).

**Definition 1 - MR:** For the purposes of Program Integrity Management Reporting (PIMR) system, MR is defined as review of claims that occurs when review staff:

1) Make a coverage decision (benefit category, statutory exclusion, or reasonable and necessary) and a coding decision to determine the appropriate payment for claims;

or

2) Investigate complaints to determine whether a corrective action was effective (e.g., an MR activity such as provider notification letter), or identify situations that require prepayment edits or the development of a local coverage determination (LCD).

The MR requires the application of clinical judgment either as part of a review, in writing policies, or in the development of guidelines and processing instructions. For local edits, that input must be from the contractor staff. For national edits, input from the contractor medical/clinical staff is not necessary.

The MR can be performed either before or after the claim has been paid.

Generally, a line cannot result in MR workload or savings if it is not referred to MR. A line that potentially involves both MR and claims processing work should suspend to a claims processing reviewer, and that reviewer should refer the line to MR only if the claims processing reviewer cannot make a decision based on guidelines available to that reviewer.

- Do NOT consider the review as MR if it requires:

1. Pricing Only;
2. Coding Only; or
3. Pricing and Coding only.

- Consider the review as MR if:
  1. Pricing is based on medical review determination;
  2. Coding is based on medical review determination; or
  3. Coding and Pricing are based on medical review determination.
  
- If the review always results in the same conclusion when the same characteristics exist and all characteristics are enumerated or if it is a one-step routine decision, it should NOT be defined as routine medical review.

For example: "Always pay code J3490 when accompanied with the note Zantac," consider this claims processing review. If you must make the decision based upon the diagnosis that accompanies the claim, consider it MR.

- If an automated claims processing edit has already made a decision to pay, and the claim only suspends for pricing, consider the review automated claims processing and do not count it for MR workload or costs.

**Definition 2 – Part B only:** When this document refers to "Part B only", it means the requirement applies only to carriers and DMERCs.

**Definition 3 - Units:** Reporting units may be reviews, claims, services, referrals, etc. Units are defined for each item. Units are usually reviews. Where they are not, the instructions clearly indicate the units contractors are to report.

**Definition 4 - Coding Decisions:** Where used in this PM, the term "coding decisions" generally refers to MR decisions. For example, coding decisions include each of the following:

A contractor reviews product information for a durable medical equipment prosthetics, orthotics, and supplies (DMEPOS) item, finds that the wrong code has been billed based upon the review of diagnoses codes and narrative information included on the claim/bill, changes the code to the correct code, and completes the claim.

In the situation described above, the contractor denies the claim line with the wrong code and uses the message that the supplier has incorrectly coded the item.

A local DMEPOS rebundling edit automatically denies a Column II code billed on the same date of service as a Column I code.

The contractor determines that a service billed as a bilateral x-ray is a single view x-ray and indicates a down code to a single view x-ray in the remittance advice.

Include only coding decisions that require the application of clinical judgment as part of a review, in writing policies, or in the development of guidelines and processing instructions. For decisions based on local edits, that input must be from the contractor staff. For decisions based on national edits, input from the contractor medical/clinical staff is not necessary.

**Definition 5 - Effort Data:** Effort is the number of claims, line items, reviews, etc. to be reported.

**Definition 5a - Cost** - Dollars extracted from the Contractor Administrative and Financial Management (CAFM) system directly associated with each of the activities types described in later sections. Round to the nearest dollar.

**Definition 5b - FTE** - Full-time-equivalent (FTE) personnel counts extracted from CAFM directly associated with the direct personnel cost of each of the activity types described in later sections.

**Definition 6 - Workload Data:** Workload is the number of full-time-equivalents required to perform a task.

**Definition 6a - Units** - The number of workload units vary by activity types. Units may include the counts of edits, MRs, special studies, fraud cases, and data analysis. Where a unit is not specified, the unit desired is the number of reviews.

**Definition 6b - Total No. of Claims** - Number of claims a specific activity reviews during the reporting period.

**Definition 6c - No. of Line Items** - Number of individual lines a specific activity reviews during the reporting period.

**Definition 6d - Billed Dollars** - The actual charges submitted by providers or suppliers during the reporting period. Round to the nearest dollar.

**Definition 6e - Allowed Dollars** -The amount of the charges that are approved for payment on claims prior to MR. Round to the nearest dollar.

**Definition 7 - Denial Data:** Denials are our measure of savings in both dollars and workload units.

A denial is a claim for which a portion or all of the Medicare approved amount (initial charges allowed) was subsequently denied due to MR. The amount reported is not affected by reduction to zero due to offsetting, i.e., if what is paid after MR is reduced to zero by an offset, the difference between the approved amount and the amount before offset is the savings the contractor reports.

**Definition 7a – Technical Denial:** A technical denial for PIMR purposes, is defined as a denial that results because the claim cannot be read by the processing system or a payment decision cannot be made because sufficient information is not included on the claim. Examples of unreadable claims are ones that do not include a Health Insurance Claim Number or provider number. Examples of claims with insufficient information are claims that do not include a billed amount or procedure code.

**Definition 7b - No. Denied Claims** - Number of claims denied or reduced by each activity during the reporting period.

**Definition 7c - No. Denied Line Items** - Number of line items denied or reduced by each activity during the reporting period.

**Definition 7d - Denied Dollars** - The portion of the Medicare-approved amount (initial charges allowed) subsequently denied or reduced after MR. Include dollars saved through cutbacks or down codes that result from MR in this amount. Round to the nearest dollar. Standard systems are required to develop procedures to determine this amount by line item for each activity code and edit.

**Definition 7e - Eligible Dollars** - Amount of charges initially billed by the provider, supplier or beneficiary and eligible for payment on valid claims after MR. Count dollars eligible for MR even if they are subsequently denied by CWF processing. Round to the nearest dollar.

**Definition 7f - Reversed Claims** - Number of claims reversed during this period from claims denied or reduced during this or a prior period. We recognize that reversals always occur postpayment. The contractor is not required to match a reversal to the period in which the payment denial occurred.

More specifically, reversed claims are claims containing one or more edit denied/reduced items/services that were allowed as the result of contractor reviews, administrative law judge hearings, or civil court hearings during the quarter being reported. CMS includes re-openings in our definition of reviews. Reversals offset savings/denials to produce net savings/denials in the PIMR reporting.

Report reversals in the section that the denial that was reversed occurred, i.e., if the denial occurred prepayment, report its reversal in the prepayment section; if the denial occurred postpayment, report the reversal in the postpayment section.

**Definition 7g - Reversed Line Items** - Number of line items reversed during this period from or reduced during this or a prior period. We recognize that reversals always occur postpayment. The contractor is not required to match a reversal to the period in which the payment denial occurred.

Report reversals in the section that the denial that was reversed occurred, i.e., if the denial occurred prepayment, report its reversal in the prepayment section; if the denial occurred postpayment, report the reversal in the postpayment section.

**Definition 7h - Reversed Dollars** - Amount of dollars reversed during this period from dollars denied or reduced during this or a prior period. Round to the nearest dollar. We recognize that reversals always occur postpayment. The contractor is not required to match a reversal to the period in which the payment denial occurred.

Report reversals in the section that the denial that was reversed occurred, i.e., if the denial occurred prepayment, report its reversal in the prepayment section; if the denial occurred postpayment, report the reversal in the postpayment section.

**Definition 7i - Denial Reasons** - Categories explaining why a claim was denied or reduced, or why an edit was developed. A listing is included in the reporting specifications. Current reason codes are used where possible; some existing reason codes may have to be mapped to the new codes for reporting purposes.

We summarized denial reasons for reporting at a very high level. That level gives us sufficient information to meet our current needs. We also attempted to stay at a high enough level of summary that contractors can easily comply with our requirements without having to revise their denial reason codes. Use the codes for both prepayment and postpayment reporting. To assist in assigning codes, section 2.8.4 contains a crosswalk between denial reason codes and the Medicare Summary Notice (MSN) codes used for remittance notices.

The denial reason codes are unique six character codes. Reason codes are:

### **APPLIES TO ALL CONTRACTORS**

- 100001 = Documentation does not support service,
- 100002 = Investigational/experimental
- 100003 = Items/services excluded from Medicare coverage,
- 100004 = Requested information not received,
- 100005 = Services not billed under the appropriate revenue or procedure code (include denials due to unbundling in this category),
- 100006 = Services not documented in record,
- 100007 = Services not medically reasonable and necessary,
- 100008 = Skilled Nursing Facility demand bills,
- 100009 = Daily nursing visits are not intermittent/part time,
- 100010 = Specific visits did not include personal care services,
- 100011 = Home Health demand bills,
- 100012 = Ability to leave home unrestricted,
- 100013 = Physician's order not timely,
- 100014 = Service not ordered/not included in treatment plan,

100015 = Services not included in plan of care,  
100016 = No physician certification (e.g., home health), and  
100017 = Incomplete physician order, and  
100018 = No individual treatment plan  
100019 = Other.

Where a denial is due to multiple reasons, use the code for the reason that was most responsible for the denial.

**Definition 7j - Overpayment Assessments Dollars** - Amount in dollars from those that were paid in error and should be collected from the provider, supplier or beneficiary. Report extrapolated dollars. Round to the nearest dollar.

**Definition 7k - Overpayment Assessments Claims** - This item applies to postpayment reporting. Number of claims from those that were paid in error and should be collected from the provider, supplier, or beneficiary. Report number of claims from the sample that were in error.

**Definition 7l - Overpayment Collected Dollars** - Amount in dollars from those paid in error and collected from the provider, supplier, or beneficiary during the reporting period. Round to the nearest dollar. Where collected dollars attributable to MR cannot be distinguished from collected dollars attributable to other activities, allocate collected dollars based on cumulative overpayments assessed and not collected in each category.

**Definition 7m - Overpayment Collected Claims** - Number of claims from those paid in error and collected from the provider, supplier, or beneficiary during the reporting period. Round to the nearest dollar. Collected overpayments do not have to be linked to the specific claims from which they resulted. Include interest in amounts reported.

**Definition 8 - Referral Data:** Referrals are the number of issues or cases transferred between entities internal (e.g., the MR unit to professional relations) or external (e.g., the MR unit to a state licensing agency) to the contractor. Accumulate referral data by claim. The program safeguard contractor (PSC) may be required to supply CMS with data on the outcome of referrals, i.e., accepted and referred to OIG. A referral does not include such activities as a medical reviewer calling a provider to clarify or correct a billing error. MR units do not have to report on referrals made by the PSC BI unit. A referral occurs only when one entity refers a provider or case to an entity other than a provider. In most instances, referrals occur postpayment; however, they may occur prepayment. Report referrals in the section (i.e., prepayment or postpayment) to which they apply.

**Definition 8a - \$ Referred to BI Unit or PSC** - Dollar amount (i.e., questioned dollars) referred to the BI unit or PSC. These are referrals within the contractor's organization. A referral may be an individual claim; a number of claims or line items; one or more providers; an issue; or a problem. The dollar value of all fraud related referrals made by the contractor should be included in this count.

**Definition 8b - # Referred to BI unit or PSC** - Number of referrals made to the BI unit or PSC at the contractor. A referral may be an individual claim; a number of claims or line items; one or more providers; an issue; or a problem. Report the number of referrals, not the number of claims; line items; or providers. These are referrals within the contractor's organization. All fraud related referrals made by the contractor should be included in this count.

**Definition 8c - # Referrals Accepted** - Number of referrals accepted by the PSC BI unit. These are referrals within the contractor's organization. A referral may be an individual claim; a number of claims or line items; one or more providers; an issue; or a problem. Report the number of referrals, not the number of claims; line items; or providers.

**Definition 8d - \$ Referrals Accepted** - Dollar amount (i.e., questioned dollars) of referrals accepted by the BI unit or PSC. These are referrals within the contractor's organization.

**Definition 8e.1 - Other Referrals** - Include actions, such as a referral for provider education based on MR, if you determine that the provider or supplier needs further claim submission education, either individually or in a group setting. The referral may be from either prepayment or postpayment review and occurs internal to the contractor organization.

Generally, if the work of the person or unit to which you refer a claim line is charged to the same MR line as your work is charged, do not count the referral as an "Other referral." If the work of the person or unit to which you make the referral is not charged to the MR line as your, count it as an "Other referral."

For example: A referral for continuation of PCA should not be considered other referral. Count each prepayment PCA as a manual review.

**Definition 8e.2 - Other Referral Reason Codes** - These are unique character codes that apply to Other Referrals or Actions. Reason codes include:

200001 = Develop a local coverage determination (LCD)

200002 = Overpayment recovery - Overpayment recovery occurs when a contractor assesses an overpayment and refers an account for overpayment recovery. Overpayment recovery does not have to have occurred for this code to be used. An example of prepayment overpayment recovery is the denial of a claim previously paid when a contractor determines that a submitted claim results in a provider exceeding five surgeries in one day and there is a multiple surgery indicator of 2 for the claim. For postpayment reporting, enter this code and overpayment amount, where applicable. If this code is used, an amount for

overpayments assessed should be entered for either the prepayment section 1 or in the postpayment report,

200003 = Requirement of a corrective action plan (e.g., clarifications of coding guidelines),

200004 = Suspension of Payment,

200005 = Education

200006 = Development of denial rationales (clarification as of 01/17/01).

This code is used when a claim is referred for the development of internal comments for a claim denial. This code should be used when a contractor is developing a rationale for denial of new benefit types prepayment or for denial of claims with payment problems that the contractor has newly identified postpayment,

200010 = Additional or provider specific MR,

200011 = Comprehensive MR,

200012 = Focusing MR because of percent increase in a measure of provider activity,

200013 = Continuous prepay MR (e.g., requiring that a percentage of or all claims from a provider that meet a given criteria; be reviewed regardless of whether they fail any other edit, and someone other than the staff who makes the decision implements the action),

200014 = Referral to a PSC BI unit,

200015 = Develop an edit,

200016 = Other,

210017 = Data analysis, and

210018 = Special studies.

This field may be blank if there were no referrals for reasons other than fraud.

**Definition 8e.3 - Dollars Referred to Other** - Dollar amount (i.e., questioned dollars) referred as a result of actions, such as a referral for provider education based on MR, if you determine that the provider or supplier needs further claim submission education, either individually or in a group setting. The referral may be from either prepayment or postpayment review and occurs internal to the contractor organization.

### **Definition 9 - General Reporting Levels**

Depending on the situation, the data elements defined above are reported by several different categories or levels of detail. These levels include: Contractor Number, Year/Month, Provider Type, Bill/Subtype, Edit Code, and Activity Type. The levels are defined below.

**Definition 9a - Contractor Number** - A unique number CMS assigned to each contractor for Contractor Reporting of Operational and Workload Data (CROWD) reporting purposes. You must report for each contract number served by the standard system. Zero fill this field to the left where necessary.

**Definition 9b - Year/Month** - The fiscal year and month in which the data is reported. The format is YYYY/MM. For example, the first month (i.e., October, 1998) of fiscal year 1999 is 199901. **Note that the date for the example is not a calendar date.**

**Definition 9c - Provider Type** - Provider types are defined in section 2.8.3. For Part B, code as "Physician" if the study addresses both physicians and suppliers. Zero fill this field to the left where necessary.

**Definition 9d - Bill/Subtype** - Bill types will be used in the future for Part A, and Subtypes are for Part B. These are the second level of indenture for the type of entity providing the services or supplies (e.g., surgery). Subtypes and bill types may be based on procedure codes. Procedure code modifiers are not used to identify bill type or bill subtype. In deciding on the bill types for Part B, base the decision on the specialty of the performing (i.e., rendering) provider if there is a billing number for that provider. Otherwise, use the specialty of the rendering provider if there is no performing provider billing number. (See section 2.8.3). Zero fill this field to the left where necessary.

**Definition 9e - Edit Code** - Locally developed edits are edits for which the contractor developed some or all of the logic. These do not include correct coding initiative (CCI) or national edits unless the contractor modified the edit to include other logic; report a modified CCI, or National edit as a local edit only and do not include it in the CCI or national categories. The data for locally developed edits must be reported for each individual edit by edit code. Data at the automated edit level applies only to specific prepayment activity types. That decision reflects the current needs of CMS, i.e., to identify the effectiveness and costs of manual edits. We do not need the same level of detail on national edits as we do on local edits. If additional needs arise in the future, we will either revise PIMR (if the requirement is long term) or make a special request (immediate and short term needs).

Each contractor assigns their own numbers to the edits and describes the edits (i.e., specify procedure, diagnosis, and type of provider) in a registry that is a separate part of the system. Edit numbers are not standardized across contractors.

An edit code is described in the manual entry database based on procedure code, diagnosis code, and specialty. A narrative description of each code is also entered as part of the description. The description includes a description of criteria applied by the edit. The lists of procedure codes and diagnosis codes may be given in the form of ranges of codes. The edit code should correspond to an action

code where possible. In the case of procedure code/diagnosis code pair edits, ranges may be used to describe the edits.

One edit may describe both physician and non-physician services. For example, if an edit tests for the number of laboratory tests a provider may perform on a beneficiary, the limit applies to both physicians and non-physicians.

If a claim suspends for manual review for reasons other than failing a MR automated edit, report it in the automated edit category.

Classification of edit data into Categories I, II, and III no longer applies in PIMR. We currently do not have a need for that information. The edit description provided for each edit indicates if the edit is provider specific. If the need arises to obtain data by provider specific edits, we can do that on an ad hoc basis.

The DMERC rebundling edits are defined as locally developed edits for purposes of these requirements.

Do not include information on global surgery edits that are part of the Medicare Fee Schedule database in PIMR reporting.

Zero fill this field to the left where necessary.

Other names contractors use for edit codes are: "medical policy screen number," "UR screen number," and "UR edit number."

**Definition 9f - Activity Type** - A set of MR activities performed by the contractor. There are essentially five different categories of activities:

Prepayment MRs, Other Prepayment Reviews, Postpayment MRs, Claims Processing, and Other Activities. They are defined below:

**Definition 9f.1 - Prepayment MR** - These reviews occur prior to payment decisions. A manual prepay MR is a manual review of claim data or supporting documentation, when necessary, by health professionals or trained MR staff. They include manual reviews that result from automated edits (not automated reviews) fully or partially suspending claims for MR. These are reviews that result in human review whether reviewed initially by automated MR edits or not. If a claim suspends for manual review for reasons other than failing a MR automated edit, report it in the automated edit category.

The above data elements are transferred for the reporting period for each of the following activities:

**Definition 9f.1a - Automated Edits:** An automated edit is one that never suspends for human intervention. It is an edit that pays or denies claims, i.e.,

processes the claim to completion without stopping for resolution. See PIM, Chapter 3, section 5.1 for further discussion of automated prepayment review.

Some automated edits automatically request documentation from a provider without human intervention. If such an edit requests documentation and none is received, consider the review automated. If documentation is received and medical review is performed, consider the review complex manual.

Determine if a claim falls into the automated edit category on a claim by claim basis. Report the number of denials that result from automated edits where this element is required. Note that PIMR does not ask for reports on automated edit payments; it asks only for reports on automated edit denials.

Fully automated MR edits result in a claim or line item being paid or denied without manual review. It is implemented with systems edits that compare two or more data fields on the claim or other file (e.g., history file). For example, automated edits can be established to compare the procedure code to diagnosis code or the procedure code to a patient's sex. In those instances where prepayment review is automated, the contractor may specify, through their local medical review policy, the circumstance under which they will deny the service. When a national coverage policy or local coverage determination clearly indicates that under certain circumstances a service is never covered, contractors may also automatically deny the services under those circumstance without stopping the claim for manual review, even if documentation is attached.

An automated review occurs when a claim/line item passes through the contractor's claims processing system or any adjunct system and is denied in whole or in part because the service(s) is non-covered or not coded correctly; that means that an automated review is reported in PIMR only when it denies a part or all of a line item. The data referred to here is any resulting data that does not become associated with a manual MR. Specific data elements are transferred for the reporting period categorized as one of the following edit types:

**Definition 9f.1a.1 - Locally Developed** - edits for which the contractor developed some or all of the logic. This does not include CCI or National edits unless the contractor has modified the edit to include other logic. The data for locally developed edits must be reported for each individual edit by edit code.

**Definition 9f.1a.2 - National** - fully automated MR edits that CMS creates and the contractors do not modify. They are exactly the same for all FIs; they allow no deviations whatsoever. Basically, these edits encompass all

(A) Non-covered services, i.e., services (1) specifically stated as non-covered by the Coverage Issues Manual (CIM) (2) for which a

CPT code has been assigned and (3) that can be fully automated without any manual intervention, or

(B) Any covered service where CIM extends coverage only for certain conditions.

Examples of national automated edits include:

Any National Policy driven by diagnosis.  
(Example: 23 new National Lab Policies that have not been issued),

The OCE module triggers an edit that sets a reason code for medical review.

Edits set up for services that are always non covered. (example: routine physicals, V code denials as routine, etc), and

Edits that auto-deny for assistants at surgery.

In other instances where CMS has specified coverage conditions but latitude is given to the contractor to limit coverage (i.e., develop LCD to apply diagnoses) in order to auto-adjudicate, consider those services as automated locally developed edits because diagnoses could be slightly different in each State.

See section 2.8.6 for further discussion of national edits based upon program documents as of February 25, 2002.

The data reported for national edits are not reported for each individual edit, but as a sum. Only data from claims denied by national edits are required for national edits.

Activity code 21001N, national automated edits, includes all edits specifically required by CMS except CCI. National automated edits never suspend for manual review. All criteria in them may be applied via computer.

**Definition 9f.1a.3 - CCI** - CCI edits that some contractors may operate as partially automated MR edits (ones that sometimes suspend for manual review) and that are developed under the CCI and are provided to the contractor. CMS considers CCI edits fully automated even if a contractor operates them as partially automated. The data reported for CCI edits will not be reported for each individual edit, but will be reported as a sum.

Only data from claims denied by CCI edits will be required for “CCI edits.”

### **Definition 9f.1b - Manual Edits**

**Definition 9f.1b.1 - Manual Routine Reviews** - Routine review uses human intervention, but only to the extent that the claim reviewer reviews a claim or any attachment submitted by the provider. This includes a review of any of the contractor's internal documentation, such as claims history file or policy documentation. It does not include extensive review of medical records. A review is considered routine if a medical record is requested from a provider and not received. Routine reviews refer to routine MRs conducted on a continuing basis and target all claims that meet an established or pre-existing set of criteria. Include prior authorization reviews in this category. Include in this category adjustments for which you 1) did not request medical records and 2) did no medical review previous to the adjustment.

**Definition 9f.1b.2 - Manual Complex Reviews** - Complex review goes beyond routine review. It includes the request for, collection of, and evaluation of medical records or any other documentation in addition to the documentation on the claim, attached to the claim, or contained in the contractor's history file. Review requiring use of the contractor's history file does not make the review a complex review. A review is not considered complex if a medical record is requested from a provider and not received. Manual Complex Reviews are complex MRs conducted on a continuing basis and targeted at all claims that meet an established or pre-existing set of criteria. If sufficient documentation accompanies a claim to allow complex review to be done without requesting additional documentation, count the review as complex. For instance if all relative pages from the patient's medical record are submitted with the claim, complex MR could be conducted without requesting additional documentation. Only clinician reviewers may perform complex review (i.e., review that involves extensive evaluation of medical records) for the purpose of making a coverage or coding determination. Include in this category adjustments for which you: 1) did request medical records; and 2) did no medical review previous to the adjustment. Include DMERC Advanced Determinations of Medicare Coverage (ADMC) reviews in this category.

**Definition 9f.1b.3 - Prepay Complex Probe Reviews** - Error validation reviews, also known as "probe" reviews. See PIM chapter 3, section 2 for more information about probe reviews.

**Definition 9f.1b.4 - Prepay Complex Provider Specific Reviews.** This is complex manual prepay review that determines if a provider or a group of

providers are providing non-covered or medically unnecessary services. They are not probe reviews

**Definition 9f.1b.5 - Prepay Complex Service Specific Reviews** - This is complex manual prepay review that determines if a service or a group of services are providing non-covered or medically unnecessary services. They are not probe reviews. Include DMERC ADMC reviews in this category.

**Definition 9f.1b.6 - Re-openings** - This is complex or routine review that is done as a result of re-review of the automated review of a previously denied or partially denied claim. Do not count more than one re-opening per claim. Re-openings include both additional documentation requests that contractors decide to process and denials returned from the formal appeals process that contractor MR staff might need to re-process.

**Definition 9f.1c - Other Prepayment Reviews**

There are other prepay reviews that are not a result of partially automated or manual edits suspending claims for manual review. Those reviews are the result of special requests.

The PIMR will not require specific review activities such as directed OIG reviews or directed law enforcement reviews. Review requirements will be set by other program instructions or, as in the case with the examples, by requests from agencies outside of CMS. The PIMR instructions indicate only what contractors are required to report.

The following provides a definition of each review:

**Definition 9f.1c.1 - Court Ordered MRs** - A court ordered MR is a review that is required by a judicial order as evidenced by a subpoena or writ and not requested by law enforcement, the OIG, a PRO, or the PSC BI unit.

**Definition 9f.1c.2 - Directed BI unit or PSC Reviews** - Prepay reviews directed by or directly supporting the BI unit or PSC. These are reviews that the MR unit did not start or that the BI unit or PSC requested after the MR unit started the review.

**Definition 9f.1c.3 - Directed Law Enforcement Reviews** - Prepay reviews directed by or directly supporting law enforcement. These are reviews that the MR unit did not start or that law enforcement requested after the MR unit started the review.

**Definition 9f.1c.4 - Directed OIG Reviews** - Prepay reviews directed by or directly supporting, the HHS Office of the Inspector General. These are

reviews that the MR unit did not start or that the OIG requested after the MR unit started the review. Include CFO audit activities in this category.

**Definition 9f.1c.5 - Directed QIO** - Prepay reviews directed by or directly supporting the quality improvement organization. These are reviews that the MR unit did not start or that the QIO requested after the MR unit started the review.

**Definition 9f.1c6 - Third Party Liability (TPL) or Demand Bill Claim Review** - Demand bills are bills submitted by the SNF at the beneficiary's request because the beneficiary disputes the provider's opinion that the bill will not be paid by Medicare and wishes the bill to be submitted for a payment determination. The demand bill is identified by the presence of a condition code 20. The SNF must have a written request from the beneficiary to submit the bill, unless the beneficiary is deceased or incapable of signing. In this case, the beneficiary's guardian, relative, or other authorized representative may make the request. See the PIM, chapter 6.1.1B, for additional detail.

**Definition 9f.2 - Postpayment MRs** - Postpayment reviews occur after a decision to pay is made. They include:

Postpayment routine manual review (see definition below);

Postpayment complex provider specific reviews (see definition below);

Postpayment complex service specific reviews (see definition below);

Postpayment complex probe reviews (see definition below);

Reviews of claims for purposes other than CMR, such as investigating a complaint or following up to determine if an educational contact resulted in changed behavior;

Reviews that provide the basis for a decision to initiate suspension of payment for a given provider;

Reviews that identify situations that require prepayment edits or LCDs; and

Reviews that result in referrals to the PSC BI unit with recommendations for administrative sanctions (including civil and criminal prosecution) for providers who fail to correct their inappropriate practices.

**Definition 9f.2a - Postpayment Routine Manual Review** - For routine manual postpayment review, the claim reviewer reviews a claim or any attachment submitted by the provider. This includes a review of any of the contractor's internal documentation, such as claims history file or

policy documentation. It does not include review of medical records by a clinician. If a non-clinician performs review of medical records, report it as routine review. A review is considered routine if, after routine manual medical review, a medical record is requested from a provider and not received. Routine reviews refer to routine MRs that target all claims that meet an established criteria. Include prior authorization reviews in this category.

**Definition 9f.2b - Postpayment Complex Manual Review** - Complex review goes beyond routine review. It includes the request for, collection of, and evaluation of medical records or any other documentation in addition to the documentation on the claim, attached to the claim, or contained in the contractor's history file. Review requiring use of the contractor's history file does not make the review a complex review. A review is not considered complex if a medical record is requested from a provider and not received. Manual complex reviews are complex MRs that targeted at all claims that meet an established set of criteria. If sufficient documentation accompanies a claim to allow complex review to be done without requesting additional documentation, count the review as complex. For instance if all relevant pages from the patient's medical record are submitted with the claim, complex MR could be conducted without requesting additional documentation.

Complex MR is a process that includes the review of medical records and other documentation to determine if a provider or a group of providers are providing non-covered or medically unnecessary services; or, if a specific service or a group of services is non-covered or medically unnecessary. Complex MRs are usually targeted at providers or services that have demonstrated aberrant billing or practice patterns. They also serve as the basis for overpayment assessment and projection. You may perform Complex MRs at the contractor's facility or at a provider's or supplier's facility. Location does not determine if the review is complex. Include all progressive corrective action (PCA) postpayment reviews in complex postpayment MRs. There are three types of complex postpayment review:

**Definition 9f.2b.1 Postpayment Complex Provider Specific Reviews** - This is Complex Manual Postpay Review that determines if a provider or a group of providers are providing non-covered or medically unnecessary services. This is not a probe review.

**Definition 9f.2b.2 - Postpayment Complex Service Specific Reviews** -

This is Complex Manual Postpay Review that determines if a specific service or a group of services is non-covered or medically unnecessary. This is not a probe review.

**Definition 9f.2b.3 - Postpayment Complex Probe Reviews** - Error validation reviews, also known as "probe" reviews (see PIM chapter 3, section 2, for more information about probe reviews)

The PIMR does not require specific review activities, such as postpayment reviews. Review requirements will be set by other program instructions or by requests from agencies outside CMS. PIMR instructions only indicate what contractors are required to report.

**Definition 9f.2c - Directed Reviews** - Postpay reviews directed by or directly supporting a unit outside of the MR unit. These are reviews that the MR unit did not start or that the outside unit requested after the MR unit started the review. The different types of directed reviews are described below.

**Definition 9f.2c.1 - Directed PSC BI unit Reviews** - Postpay reviews directed by or directly supporting the BI unit or PSC. These are reviews that the MR unit did not start or that the BI unit or PSC requested after the MR unit started the review.

**Definition 9f.2c.2 - Directed CMS CFO Reviews** - Postpay reviews directed by or directly supporting the CFO Audit. These are reviews that the MR unit did not start or that CMS or OIG requested to support the CFO audit after the MR unit started the review.

**Definition 9f.2c.3 - Directed OIG Reviews** - Postpay reviews directed by or directly supporting the Department of Health and Human Services Office of the Inspector General (DHHS OIG). These are reviews that the MR unit did not start or that the OIG requested after the MR unit started the review. Include CFO audit activities in this category.

**Definition 9f.2c.4 - Directed Law Enforcement Reviews** - Postpay reviews directed by or directly supporting law enforcement other than the DHHS OIG. These are reviews that the MR unit did not start or that law enforcement other than the DHHS OIG requested after the MR unit started the review.

**Definition 9f.2c.5 - Directed ORT or Wedge Reviews** - Postpay reviews performed under Operation Restore Trust (ORT) or reviews that support joint agency/State MR activities. These are reviews that the MR unit did not start or that ORT requested after the MR unit started the review.

**Definition 9f.2c.6 - Directed PRO** - Postpay reviews directed by or directly supporting the peer review organization (PRO). These are reviews that the MR unit did not start or that the RO requested after the MR unit started the review.

**Definition 10 - Claims Processing** - Claims processing involves information from a contractor's claim processing system. A claim is an electronic or paper request submitted in the prescribed CMS format to contractors for payment for Part B health services rendered by a provider (e.g., physician, or supplier) to a Medicare beneficiary. Data is required for specific data elements for the following categories:

**Definition 10a - Claims Received** - The number of provider/supplier/beneficiary requests for payment received within a given period that undergo review in accordance with CMS regulations and manual instructions. The claims are paid, denied ((clarification 01/17/01) or reduced), or suspended.

**Definition 10b - Claims Paid** - Claims reviewed and adjudicated that meet the claims payment and MR criteria for payment for the reporting period.

**Definition 10c - Claims Available for MR** - Claims considered valid by the contractor's claims processing function, i.e., claims that would have been paid if they had not gone to MR. Not included in this total are claims that are technically denied for reasons such as incomplete provider or patient demographic data or claims that are not subject to MR by the contractor.

**Definition 10d - Line Items Paid** - Line items reviewed and adjudicated that meet the claims payment and MR criteria for payment for the reporting period.

**Definition 11 - Other Activities** - Other activities that contractors perform require specific data. Those activities are described below:

**Definition 11a - Data Analysis** - Data analysis is defined as the review of claims information and other related data sources to identify patterns of over utilization or abuse by claim characteristics individually or in the aggregate.

Operationally, data analysis is all activities needed to identify aberrancies and to monitor the effectiveness of certain PI activities. Data analysis activities are:

- (1) **Definition 11a.1 - Detection analysis** - This analysis is conducted for the purpose of identifying where PI problems exist. It includes the following activities:
- Identification of problems requiring prepayment edits, including the determination of measurements to be used in an edit;
  - Analysis of claims information in the form of a table to identify or verify aberrancies, e.g., profiling of physicians or other provider profiling. Specific examples are Ratios I or II or Focused MR reports, up coding reports, over utilization reports, or concurrent care reports;
  - Identification of problems requiring LCDs, including all activities required identify the problems and to identify problems that necessitate the development of an LCD;
  - Acquiring data needed to decide if an edit is necessary;
  - Requesting and receiving claims data necessary to identify the values to which submitted information is to be compared;
  - Conducting training for staff involved in PI data analysis; and
  - Participation on CMS PI data analysis workgroups.
- (2) **Definition 11a.2 - Effectiveness analysis** -- This analysis is conducted for the purpose of evaluating the effectiveness of contractor actions to correct PI problems once the problems have been verified. It includes the following activities:
- Analysis of claims information in the form of a table to monitor the effectiveness of LCDs, and referrals from the MR unit to the PSC BI unit, or overpayment collection unit, e.g., profiling of physicians or other provider profiling. Specific examples are Ratios I or II or Focused MR reports, up coding reports, over utilization reports, or concurrent care reports.
  - Initial evaluation and quarterly reevaluation of edits to decide their effectiveness. In this category, include the gathering of data and analysis of information in the form of a table, as well as computer time needed to produce information in table form.

- Conduct of evaluations to determine the overall effectiveness of PI activities.

**Definition 11b - Special Studies** - Special studies are defined as activities or projects with unique identifications designed to develop and demonstrate a new approach to fraud, abuse, or waste protection. Special studies include data collections, analyses, and surveys at the request of central office or ROs that are classified in other categories for PIMR reporting.

**Definition 11c - Edit Development** - Edit development is the effort necessary to create a computerized logic test developed with the assistance of health professionals that compares the data elements on a Medicare claim for the purposes of: (1) making a coverage or local coding determination; or (2) suspending a claim so such determinations can be made by health professionals or trained MR staff prior to payment of the claim. Use the term edit instead of “screen or audit.”

**Definition 11d - Contractor Policy Development** - Contractor policy development involves determining that a local coverage decision (LCD) is needed, using or adapting an existing LCD or model policy, or developing an LCD using medical consultants, input from professional organizations, and information from medical literature to address aberrant utilization under benefit category for an item/service.

## **Definition 12 - Miscellaneous Postpayment Definitions**

**Definition 12a - Review ID** - This is a number PIMR automatically assigns as records enter the system. Contractors should leave this field blank. PIMR uses the number to uniquely identify each study.

**Definition 12b - Claims Reviewed** - This is number of claims reviewed as part of a postpayment review. This is the number of claims not the number of line items or providers. This figure will give CMS and idea of the amount of effort required to request medical records for a study and a claims level estimate of the number of lines per record when combined with the number of line items entered in a lines reviewed field (S8).

**Definition 12c - Review Date** - The beginning date of the postpayment review, i.e., the date that medical records are requested for the study.

**Definition 12d - Updated by** - The PIMR user ID of the person who last updated the record for the study.

**Definition 12e - Case Code** - The contractor supplies and tracks this number. It could be the control number the contractor uses in their case

tracking system or a number assigned by the MR staff to manually track reviews. The purpose of the number is to make it easy for contractors to find studies in the PIMR system and update them as the contractor obtains additional information, e.g., results of appeals or overpayment collections, on the study.

## 7.2.8.2 - Contractor/Standard System Interfaces and Manual Data Requirements (Rev. 71, 04-09-04)

Sections 2.8.2.1 through 2.8.2.4 identify the data elements contractor standard systems are required to collect and transfer to the Program Integrity Management Reporting (PIMR) system database on a monthly schedule. The names, definitions, and physical descriptions reflect those currently designed for the PIMR system.

### 7.2.8.2.1 - Prepayment Reporting Based on Line Counts (Rev. 71, 04-09-04)

The following table provides a definition of the Prepay MR data required by the PIMR system from the contractor standard systems.

**NOTE:** The ideal interface is a flat file exported from the standard system. The format and order of the file is defined in the table below.

### 7.2.8.2.5 - Postpayment Report (Rev. 71, 04-09-04)

Section 2.8.2.5.1 is a table that provides a definition of the Postpay MR data required by the PIMR system and that may be obtained from the contractor standard systems. Section 5B is a module that allows contractors to manually enter postpayment data into the system.

#### 7.2.8.2.5.1 - File Layout For Dataset Transmission (Rev. 71, 04-09-04)

These specifications are provided for standard systems maintainers that wish to develop modules to transfer post payment data directly to PIMR from the standard system. Standard systems are not required to develop such modules

Initially, enter the data for this module when a study is completed, i.e., when an overpayment is identified. Updates to the initial report for overpayment collection and reversals must be made manually using the interactive module provide in PIMR. Updates can be done as they occur (enter cumulative amounts) or they may be made once an activity is completed, i.e., the overpayment is collected or the time limit for appeals expires.

**NOTE:** The ideal interface is a flat file exported from the standard system. The format and order of the file is defined in the table below.

**7.2.8.2.5.2 - Description of the Manual Postpay Module  
(Rev. 71, 04-09-04)**

The following table provides a definitions for the Postpay MR data required by the PIMR module. The data may be entered into the PIMR interactively by contractors. The item

number in this table shows a reference to section 7.2.8.4.1, a crosswalk between data items and definitions.

Initially, enter the data for this module when a study is completed, i.e., when an overpayment is identified. Updates to the initial report for overpayment collection and reversals must be made manually using the interactive module provide in PIMR. Updates can be done as they occur (enter cumulative amounts) or they may be made once an activity is completed, i.e., the overpayment is collected or the time limit for appeals expires.

**7.2.8.2.6 - Edit Descriptions**  
(Rev. 71, 04-09-04)

The edit description module is an interactive PIMR module. The standard system does not collect this data, contractor MR staff manually enter the data into the system. The requirements for this module are described below.

Make an entry in this module for each MR edit you currently have in your claims processing system. Once you enter information on an edit, you do not need to enter information on the edit again during the life of the edit. You must revise information on an edit if there are changes to the edit. An edit should not and cannot be removed from the system by a user.

Instructions and definitions for entering each item on the screen are provided below. Separate definitions for most edit module items are not included in the definitions section of this chapter (section 7.2.8.1) since these items are unique to the edit module. Where any of the definitions for edit module items are in section 7.2.8.1, they are referenced in the edit module item description below.

<b>Attribute Name</b>	<b>Definition</b>	<b>Data Type</b>
E01 CONTRACTOR NUMBER	A unique number CMS assigned to each contractor for CROWD reporting purposes. You must report for each contract number served by the shared system. Zero fill this field to the left where necessary.	CHAR(5)
E02 EDIT CODE	Enter up to five characters to uniquely identify the edit. You may use a	CHAR(5)

Attribute Name	Definition	Data Type
	combination of letters and numbers to identify the edits. Right justify the code and left fill it with 0s, e.g., enter edit code 45 as '00045.'	
E19 RECORD TYPE	A code used to distinguish record format type in the contractor edit file. Codes include 0 = Edit Code, 1 = LMRP, 2 = Specialty/Provider Type Code, 3 = Revenue Code, 4= Occurrence Code, 5 = Condition Code, 6 = Value Code, 7= Edit Procedure Code, 8 = Edit Diagnosis Code, 9 = Reason Code (THIS IS THE COMPLETE DEFINITION – NOT DEFINED ELSEWHERE FOR PIMR)	CHAR(1)
E03 DESCRIPTION	Provide a description of the edit. The description should reflect the purpose of the edit and the unacceptable billing practice for which the edit tests. For example, the description for an edit to detect unnecessary EKGs might read: 'Allow a maximum of one EKG every 30 days.' The description should be no longer than three lines, i.e., 255 characters including blanks. For Part A, use the standard or external description of the edits.	CHAR(255)
E04 EDIT STATUS	<p>Use the following definitions to complete this item.</p> <p>ACTIVE -- You <u>planned</u> to apply the edit to one or more claims during the current quarter. Active = '1'.</p> <p>INACTIVE -- You <u>did not plan</u> to apply the edit to at least one claim during the current quarter. Edits should not be considered inactive until all use of the code is terminated, e.g., all controls of a Part A edit are terminated or all criteria associated with a particular Part B edit code are terminated. Inactive = '0'.</p>	CHAR(1)
E05 POLICY NO	Enter an unlimited number of identifiers assigned to policies that justify and/or explain the edit. Leave these fields blank if you have no local medical review policies that support the edit.	CHAR(12)
E06 LEVEL OF AUTOMATION	<p>Mark the box that best describes the extent to which the edit is computerized. Use the following definitions to determine into which category the edit fits:</p> <p>MANUAL -- An MR edit that always suspends for human review (see definition 9f.1b for more detail). Manual = '0'.</p> <p>PARTIALLY -- An MR edit that is somewhat automated but may result in suspension of claims for manual review (see definition 9f.1a for more detail). Partially = '1'.</p> <p>FULLY -- An MR edit that never results in a claim suspending for manual review (see definition 9f.1a for more detail). Fully = '2'.</p>	CHAR(1)
E07 TYPE OF EDIT	<p>(MARK ALL THAT APPLY): Indicate what class of Medicare requirements you use the edit to test. Use the following definitions to classify the edits:</p> <p>BENEFIT CATEGORY -- An edit used to determine if a service fits one of the benefit categories described in Title XVIII of the Social Security Act (the Act) and Medicare program manuals. Benefit Category = '0'.</p> <p>STATUTORY EXCLUSION -- An edit used to determine if the Act excludes a service. Statutory Exclusion = '1'.</p>	CHAR(4)

Attribute Name	Definition	Data Type
	<p>MEDICAL NECESSITY -- An edit used to determine if a service is reasonable and necessary within the meaning of §1862(a)(1) of the Act for the diagnosis or treatment of illness or injury, or to improve the functioning of a malformed body member. This determination includes decisions you make concerning whether a provider who bills a service that appears to be covered has inaccurately or untruthfully billed that service. Medical Necessity = '2'</p> <p>LOCAL CODING -- An edit that decides whether a service meets the requirements listed in the local coding guidelines. Local coding guidelines are stated in the section of the local MR policy that describes the relationships between codes and defines how providers should bill services. It includes a description of non-physician rebundling rules as well as information about how and when to report units of service, place of service, Health Care Common Procedure Coding System (HCPCS) modifiers, etc. This determination includes decisions you make concerning whether a provider who bills a service that appears to be correctly coded has inaccurately or untruthfully billed that service. Local Coding = '3'</p>	
E08 SPECIALTY/ PROVIDER TYPE CODE	Enter all specialty (Part B) or provider type (Part A) identifications for which the item/service is allowed to occur. Right justify codes that are less than five characters long.	CHAR(5)
E09 REASON CODE	If there is an expected outcome from the edit, enter all reason codes for this item. The outcome could be a denial (use the codes from definition 7i) or a referral (use the codes from definition 8e.2).	CHAR(6)
E10 PER	Enter (a) the number of times the item/service is allowed to occur or (b) the dollars in thousands (include a dollar sign) per number of days, number of locations, a given Specialty/Provider Type, number of miles, number of dollars, or provider (conditional upon a given procedure code not appearing on the claim). If there are multiple criteria that require a "PER," enter "99999."	NUMERIC (5)
E11 TIME PERIOD UNITS	Enter the type of period during which the item/service is allowed to occur the number of times specified in 'PER' Daily = '0', Weekly = '1', Monthly = '2', Quarterly = '3', Yearly = '4' Lifetime = '5'	NUMERIC(1)
E12 POS	Enter the place of service code at which the item/service is allowed to occur the number of times specified in 'PER.' If there are multiple criteria that require a "POS," enter "99" in the POS field.	CHAR(2)
E20 TIME PERIOD OCCURRENCE	Enter the number of occurrences allowed during the time period units specified in 'PER'. (THIS IS THE COMPLETE DEFINITION – NOT DEFINED ELSEWHERE FOR PIMR)	CHAR(4)

E21 TYPE OF BILL FROM	For Part A, enter all Type of Bill (TOB) code criteria used by the edit. TOB is a three-digit alphanumeric code that gives three specific pieces of information. The first digit identifies the type of facility. The second classifies the type of care. The third indicates the sequence of this bill in this particular episode of care. It is referred to as "frequency" code. ‘Type of Bill code from’ may exist as a single value or the beginning value of a range of Type of Bill codes. If it exists as the beginning range of applicable Type of Bill codes, then a “Type of Bill code to’ must be entered. (THIS IS THE COMPLETE DEFINITION – NOT DEFINED ELSEWHERE FOR PIMR)	CHAR(3)
E21 TYPE OF BILL TO	‘Type of Bill code to’ defines the ending value of a range of Type of Bill codes defined by ‘Type of Bill code from’. ‘Type of Bill code to’ exists only when the Type of Bill code specified in ‘Condition code from’ exists as the beginning of a range of Type of Bill. (THIS IS THE COMPLETE DEFINITION – NOT DEFINED ELSEWHERE FOR PIMR)	CHAR(3)
E22 REVENUE CODE FROM	For Part A, enter all Revenue Code criteria used by the edits. Revenue codes are defined in the description of the CMS 1450 - Medicare Claims Processing Manual – Pub 100-4 – chapter 25 – section 60 - Form Locator 42. ‘Revenue code from’ may exist as a single value or the beginning value of a range of revenue codes. If it exists as the beginning range of applicable revenue codes, then a “revenue code to’ must be entered. (THIS IS THE COMPLETE DEFINITION – NOT DEFINED ELSEWHERE FOR PIMR)	CHAR(4)
E22 REVENUE CODE TO	‘Revenue code to’ defines the ending value of a range of revenue codes defined by ‘revenue code from’. ‘Revenue code to’ exists only when the revenue code specified in ‘revenue code from’ exists as the beginning of a range of revenue codes.	CHAR(4)
E23 OCCURRENCE CODE FROM	For Part A, enter all occurrence code criteria used by the edit. 33.1	The ambulatory surgical center must bill for this service.	NOT PI
34.1	Of the total ( \$ ) paid on this claim, we are paying you ( \$ ) because you paid your provider more than your 20 percent co-insurance on Medicare approved services. The remaining ( \$ ) was paid to the provider. (NOTE: Mandated message - This message should print claim level on all assigned claims generating payment to the beneficiary.)	NOT PI
34.2	The amount in the "You May Be Billed" column has been reduced by the amount you paid the provider at the time the services were rendered. (NOTE: Mandated message - This message should print claim level on all assigned claims with a beneficiary paid amount that does not exceed coinsurance and deductible and for all unassigned claims submitted with a beneficiary paid amount.)	NOT PI
34.3	After applying Medicare guidelines and the amount you paid to the provider at the time the services were rendered, our records indicate you are entitled to a refund. Please contact your provider. (NOTE: Mandated message: This message should print claim level on assigned claims with a split payment to the beneficiary under \$1.00.) (NOTE: Use this message only when your system cannot plug the dollar amount in message 34.8.)	NOT PI
34.4	We are paying you ( \$ ) because the amount you paid the provider was more than you may be billed for Medicare approved charges.	NOT PI
34.5	The amount owed you is ( \$ ). Medicare does not routinely issue checks for amounts under \$1.00. This amount due will be included in your next check. If you want this money issued immediately, please contact us at the address or phone number in the Customer Service Information Box.	NOT PI

- 36.1 Our records show that you were informed in writing, before receiving the service, that Medicare would not pay. You are liable for this charge. If you do not agree with this statement, you may ask for a review. NOT PI
- 36.2 It appears that you did not know that we would not pay for this service, so you are not liable. Do not pay your provider for this service. If you have paid your provider for this service, you should submit to this office three things: 1) a copy of this notice, 2) your provider's bill; and 3) a receipt or proof that you have paid the bill. You must file your written request for payment within 6 months of the date of this notice. Future services of this type provided to you will be your responsibility. 100007
- 36.3 Your provider has been notified that you are due a refund if you paid for this service. If you do not receive a refund from the provider within 30 days from your receipt of this notice, please write our office and include a copy of this notice. Your provider has the right to appeal this decision, which may change your right to a refund. NOT PI
- 36.4 This payment refunds the full amount you paid to your provider for the services previously processed and denied. You are entitled to this refund because your provider did not tell you in writing before providing the service(s) that Medicare would not pay for the denied service (s). In the future, you will have to pay for this service when it is denied. NOT PI
- 36.5 This payment refunds the full amount you are entitled to for services previously processed and reduced. You are entitled to this refund because your provider did not tell you in writing before providing the service (s) that Medicare would approve it at a lower amount. In the future, you will have to pay for the service as billed when it is reduced. NOT PI
- 36.6 Medicare is paying this claim, this time only, because it appears that neither you nor the provider knew that the service(s) would be denied. Future services of this type provided to you will be your responsibility. NOT PI

### **7.2.8.6 - National Edits (Rev. 71, 04-09-04)**

National edits are defined in the Coverage Issues Manual (CIM) when it contains specific requirements defined as HCPCS or ICD9-CM codes and in the annual update of the fee schedules (e.g. CRs A-01-162 (Clinical labs), A-01-10 (Part B), B-01-78 (Parenteral and enteral), AB-01-178 (DME), A-01-165 (Ambulance), and A-01-135 (SNF)).

#### Coverage Issues Manual (CIM)

As an aid, the national edits defined in the CIM (Pub 6) as of February 25, 2002, are described below. The following sections of the CIM contained requirements for national codes; they are further described in the information found in the following the list. Please check the most current version of the CIM for up-to-date information on national edits.

#### 35-16 VITRECTOMY

#### 35-30.1 STEM CELL TRANSPLANTATION

#### 35-41 DIATHERMY TREATMENT

#### 35-82 PANCREAS TRANSPLANTS

#### 35-85 IMPLANTATION OF AUTOMATIC DEFIBRILLATORS

#### 35-91 LAPAROSCOPIC CHOLECYSTECTOMY

#### 35-100 PHOTODYNAMIC THERAPY

#### 45-30 PHOTSENSITIVE DRUGS

#### 50-20 DIAGNOSTIC PAP SMEARS

#### 50-20.1 SCREENING PAP SMEARS AND PELVIC EXAMINATIONS FOR EARLY

#### 50-34 OBSOLETE OR UNRELIABLE DIAGNOSTIC TESTS

50-55 PROSTATE CANCER SCREENING TESTS-COVERED  
55-50 B. SCREENING DIGITAL RECTAL EXAMINATIONS  
60-11 HOME BLOOD GLUCOSE MONITORS  
60-16. PNEUMATIC COMPRESSION DEVICES

### **7.2.8.7 - History of Codes** **(Rev. 71, 04-09-04)**

#### **ACTIVITY TYPE CODES**

A unique 6 character code associated with each prepay MR activity to allow reporting by Activity. Prepay activities include:

##### Prepayment

21001L = Automated Locally Developed Edit (In initial specifications),  
21001N = Automated National Edit (In initial specifications),  
21001C = Automated COTS Edit (In initial specifications),  
21001 I = Automated CCI Edit (In initial specifications),  
21002 = Manual Routine Review (added 10/1/02),  
21002F = Manual Routine Focused Review (In initial specifications),  
21002R = Manual Routine Random Review (In initial specifications),  
21002R = Prepay Routine Reconsiderations (This requirement is for VIPS only – added 1/1/04)  
21003F = Manual Complex Focused Review (In initial specifications),  
21003R = Manual Complex Random Review (In initial specifications),  
21016 = Directed Fraud Unit Review (In initial specifications),  
21017 = Directed OIG Review (In initial specifications),  
21018 = Directed Law Enforcement Review (In initial specifications),  
21019 = Directed by PRO. (In initial specifications)  
21201R = Prepay Complex Reconsiderations (This requirement is for VMS only).  
(added 1/1/04)  
21201 = Prepay Complex Probe Review (added 10/1/02)  
21201R= Reconsideration (added 10/1/02)  
21202 = Prepay Complex Provider Specific Review (added 10/1/02)  
21203 = Prepay Complex Service Specific Review (added 10/1/02)  
21010 = TPL or Demand Bill Claim Review (added 4/1/03)  
21221 = Prepay Complex Manual Review (added 1/1/04)

##### Postpayment Review

21004 = Postpay Non-CMR (In initial specifications),  
21005 = Postpay Onsite CMRs (In initial specifications),  
21006 = In-house CMRs (In initial specifications),  
21020 = Postpay Directed Fraud Unit Review (In initial specifications),  
21021 = Postpay CMS CFO Review (In initial specifications),

- 21022 = Postpay Directed OIG Review (In initial specifications),
- 21023 = Postpay Directed Law Enforcement Review (In initial specifications),
- 21024 = Postpay Directed by PRO (In initial specifications),
- 21025 = Postpay Directed ORT (In initial specifications),
- 21027 = Court Ordered Postpayment MR (In initial specifications),
- 21028 = Postpayment Fraud review (In initial specifications),
- 21030 = Routine Manual Postpay (In initial specifications)
- 21031 = Complex Manual Provider-Specific Postpay Review (In initial specifications)
- 21032 = Complex Manual Service-Specific Postpay Review (In initial specifications)
- 21205 = Postpay Complex Probe Review (In initial specifications)
- 21222 = Postpay Complex Manual Review (added 1/1/04)

**Either prepayment or postpayment MR**

- 28000 = Special Studies (effective 1/1/01 – 9/30/02)
- 210018 = Special Studies (changed 10/1/02)
- 21220 = Complex Manual Probe Sample Review (added 1/1/04)
- 21100 = Program Safeguard Contractor Support Services that involve use of the standard system (added 1/1/04)

**Indirect MR activities**

- 21007= Data Analysis (In initial specifications),
- 21008 = Policy Development (In initial specifications),
- 21026 = Edit Development (In initial specifications),
- 21026S = Edit Development Setup (In initial specifications),
- 21026T = Edit Development - Test (In initial specifications),
- 21029 = Fraud Sources (In initial specifications)

**DENIAL REASON CODES**

**APPLIES TO ALL CONTRACTORS**

- 100001 = Documentation does not support service,
- 100002 = Service is not otherwise covered clinical trial service,
- 100003 = Items/services excluded from Medicare coverage,
- 100004 = Requested information not received,
- 100005 = Services not billed under the appropriate revenue or procedure code, (include denials due to unbundling in this category),
- 100006 = Services not documented in record,
- 100007 = Services not medically reasonable and necessary,
- 100016 = No physician certification (e.g., DME or Home Health), and
- 100019 = Other.

**APPLIES MAINLY TO INTERMEDIARIES**

- 100008 = Skilled nursing facility demand bills,

100009 = Daily nursing visits are not intermittent/part time,  
100010 = Specific visits did not include personal care services,  
100011 = Home Health Demand Bills,  
100012 = Ability to leave home unrestricted,  
100013 = Physician's order not timely,  
100014 = Service not ordered/not included in treatment plan,  
100015 = Services not included in plan of care,  
100017 = Incomplete physician order, and  
100018 = No individual treatment plan

#### OTHER REFERRAL REASON CODE

200001 = Develop LMRP,  
200002 = Overpayment recovery. Clarification as of January 17, 2001: Overpayment recover occurs when a contractor assesses an overpayment and refers an account for overpayment recovery. Over payment recovery does not have to have occurred for this code to be used. An example of prepayment overpayment recovery is the denial of a claim previously paid when a contractor determines that a submitted claim results in a provider exceeding five surgeries in one day and there is multiple surgery indicator of 2 for the claim. For postpayment, reporting, enter this code and overpayment amount where applicable. If this code is used, an amount for overpayments assessed should be entered for either the prepayment section 1 or in the postpayment report,  
200003 = Requirement of a corrective action plan (e.g., clarifications of coding guidelines),  
200004 = Suspension of Payment,  
200005 = Education (e.g., referral to the Medical Director for a follow-up call),  
**200006 = Development of denial rationales for each claim denied.**  
**Clarification as of January 17, 2001: This code is used when a claim is referred for the development of internal comments for a claim denial. This code should be used when a contractor is developing a rational for denial of new benefit types prepayment or for denial of claims with payment problems that the contractor has newly identified postpayment,**  
200007 = Individual provider training (e.g., formal training, a structure course given for an individual provider),  
200008 = Provider bulletin issued,  
200009 = Provider seminar/workshop,  
200010 = Additional or provider specific MR,  
200011 = Comprehensive MR,  
200012 = Focused MR because of percent increase in a measure of provider activity,  
200013 = Continuous prepay MR,  
200014 = Referral to a fraud unit,  
200015 = Develop an edit,  
200016 = Other,  
210017 = Data Analysis, and

210018 = Special Studies.

### **7.2.8.9 - Responsibilities Of Maintainers, Data Centers, and Contractors (Rev. 71, 04-09-04)**

**Responsibility for PIMR is divided among standard system maintainers, contractors, and data centers as follows:**

Standard System Maintainers are responsible for developing standard system modifications that meet PIMR requirements for sections 2.8.2.1 through 2.8.2.4 and providing them to contractor data centers.

Contractor Data Centers are responsible for implementing, operating, and maintaining the standard system modules provided by standard system maintainers; sending to CMS on a monthly basis reports that sections 2.8.2.1 through 2.8.2.4 require; and correcting errors in their submissions that the PIMR system identifies.

Contractors are responsible for data entering the information that the interactive PIMR modules, i.e., the postpayment and edit modules, require; insuring that standard system maintainers correctly implement codes dependent on local contractor definitions and used

by the standard system modules (sections 2.8.2.1 through 2.8.2.4), entering manual data (sections 2.8.2.5.2 and 2.8.2.6), and making certain that data submissions are correct.

## **7.2.8.10 - PIMR Activity Codes for FY 2004** **(Rev. 71, 04-09-04)**

### **7.2.8.10.1 - PIMR Prepayment Activity Codes** **(Rev. 71, 04-09-04)**

A unique code associated with each prepay MR activity to allow reporting by activity. Standard systems should provide for the collection and reporting of these codes where appropriate.

Prepay activities include:

21001L = Automated Locally Developed Edit

21001N = Automated National Edit

21001I = Automated CCI Edit

**21002 = Manual Routine Review (MCS should include prepay routine reconsiderations for this code. Reconsiderations include both additional documentation requests that contractors decide to process and denials returned from the formal appeals process that contractor MR staff may need to re-process.).**

21002R = Prepay Routine Reconsiderations (This requirement is for VIPS Medicare System (VMS) only. Reconsiderations include both additional documentation requests that contractors decide to process and denials returned from the formal appeals process that contractor MR staff may need to re-process. VMS contractors should report prepay routine reconsiderations here rather than und 21002.)

**21010 = TPL or Demand Bill Claim Review (Required only for FIs)**

21100 = Program Safeguard Contractor Support Services that involve use of the standard system

21201R= Prepay Complex Reconsiderations (This requirement is for the (VMS) only. Reconsiderations include both additional documentation requests that contractors decide to process and denials returned from the formal appeals process that contractor MR staff may need to re-process. VMS contractors should report prepay complex reconsiderations here rather than und 21221)

21220 = Complex Manual Probe Sample Review

21221 = Prepay Complex Manual Review

**23007 = MR for Benefit Integrity Unit reviews (For VMS only. The code is only for Durable Medical Equipment Regional Carriers (DMERCs) that are not transitioning to PSCs. It is a code that DMERCs requested to facilitate tracking of reviews required by their benefit integrity units. Contractors are not required to report the code to PIMR.**

Left justify activity types less than six positions.

See section 7.2.8.12 for a comparison of old and new PIMR codes.

**7.2.8.10.2 - PIMR Postpayment Activity Codes**  
**(Rev. 71, 04-09-04)**

A unique identification code associated with the postpay review activity. This code is used to track workload, denials, and referrals resulting from each activity. Left justify activity types less than six positions. Contractors will collect and report this information outside of the standard system.

Postpay activities include:

- 21220 = Complex Manual Probe Sample Review
- 21222 = Postpay Complex Manual Review
- 21100 = Program Safeguard Contractor Support Services that do not involve use of the standard system

### **7.8 – The Strategy Analysis Report (SAR)**

**(Rev. 229, Issued: 11-23-07, Effective: 04-01-08, Implementation: 04-07-08)**

The problem-focused, outcome-based strategy (IOM 100-8, Chapter 1) provides a continuous feedback process that will assist the contractor with the management of their MR program. To assist in the feedback process, the contractor shall utilize a SAR. The PSC's and MAC's shall follow the SAR guidelines to the extent they can report on the elements they are responsible per their individual SOW. The goals of the SAR are to:

- Provide CMS with more specific information on how program funds are being used to reduce the claims payment error rate.
- Assist the contractor in performing analyses of the MR program and the allocation of resources.
- Assist the contractor in monitoring progress toward resolution of targeted problems.
- Improve the quality of information that will assist in the creation of outcome-based strategies.

The SAR shall address each problem identified in the strategy and the progress toward the projected outcomes. Monitoring the actions taken toward rectifying targeted problems will allow for early evaluation of the effectiveness of the interventions used. Close monitoring of the progress toward projected outcomes is crucial in alerting the contractor's MR management of when shifts in workload, targets, or resources will be needed. Shifts in the strategy are expected and should be identified in the SAR.

The contractor shall develop and submit a SAR that focuses on the progress made in the implementation of the contractor's MR strategy. The SAR will be problem-focused, and outcome-based, and will continually assess and evaluate the interventions being performed during the next 6 months to rectify the problems. The contractor shall also address quality assurance (QA) monitoring activities being performed in concurrence with the strategy and chosen interventions. QA activities shall include any follow-up activities performed to ensure resolution of problems addressed in the past.

In analyzing the activities for each problem, it may become evident that there needs to be a shift in workload or focus. Any shift in strategy should be identified in the SAR. If a shift in strategy impacting workload and/or dollars becomes evident, the contractor shall identify the specific activity line(s) impacted (increased or decreased) and provide the rationale for any redistribution of workload and funds amongst the activity lines and contractor sites in the SAR. Any shift of this nature impacting workload and/or costs would necessitate an MR strategy revision. In addition, the contractor shall provide an analysis of any site-specific variance between the fiscal year 2007 (FY 07) notice of budget approval (NOBA) and the reported quarterly cumulative Interim Expenditure

Report (IER) workload and costs. Furthermore, the contractor shall provide explanations for variances as defined by the parameters in the following chart.

<b>Required Variance Analysis Reporting for Medical Review (MR) Activity Codes</b> (use this as a guideline for Variance Analysis reporting <u>only</u> )					
		<b>Cost</b>	<b>Wrkld #1</b>	<b>Wrkld #2</b>	<b>Wrkld #3</b>
<b>21001</b>	<b>Automated Review</b>	+/- 5%			
<b>21002</b>	<b>Routine Manual Review</b>	+/- 5%	+/- 10%		
<b>21007</b>	<b>Data Analysis</b>	+/- 5%			
<b>21010</b>	<b>TPL</b>	+/- 5%	+/- 10%		
<b>21100</b>	<b>PSC Support Services</b>	+/- 5%			
<b>21206</b>	<b>Policy Reconsideration/Revision</b>	+/- 5%	+/- 10%		
<b>21207</b>	<b>MR Program Management</b>	+/- 5%			
<b>21208</b>	<b>New Policy Development</b>	+/- 5%	+/- 10%		
<b>21210</b>	<b>MR Reopenings</b>	+/- 5%			
<b>21220</b>	<b>Complex Manual Probe Review</b>	+/- 5%	+/- 10%		
<b>21221</b>	<b>Prepay Complex Review</b>	+/- 5%	+/- 10%		
<b>21222</b>	<b>Postpay Complex Review</b>	+/- 5%	+/- 10%		

- 1) The contractor shall provide explanations for variances that fall outside of the above parameters
- 2) Please note that a variance analysis may not be required for NOBA/IER variance amounts < \$5,000
- 3) Please note that the variance analysis should be site specific.
- 4) A copy of the variance analysis should be sent to the regional office.

This chart is included as a guideline to contractors for variance analysis reporting, and is not a required form to be completed or submitted with the SAR. The contractor shall include with the variance analysis any corrective actions that are planned or implemented. This process will allow the SAR to be the MR operations tool for analysis and reporting of variances by contractors, while the Variance Analysis Report (VAR) in CAFM II will be a contractor budget function. Contractor MR management shall review the budget VAR and add or expound upon the explanations provided their by budget staff. Since the PSC's and MAC's are not responsible for reporting their costs by CAFM

code, they are not required to follow the CAFM II reporting and variance elements of the SAR. However, if there is a variation in workload that will effect the MR strategy at the MAC, PSC, or the AC, the PSC shall be sure this is reflected in the SAR. The contractor shall submit the SAR by May 15 of each year via the MR system located at CMS's Local Coverage Systems Portal Web site. MAC contractors shall submit the SAR 7 ½ months after contractor award or 7 ½ months after option is exercised.

### **7.8.1 - The SAR Format**

**(Rev. 203, Issued: 05-25-07; Effective: 07-01-07; Implementation: 07-02-07)**

The cover page shall contain the following information:

Contractor name;  
Contractor number;  
Contractor site;  
Reporting period;  
Report coordinator contact information (name, telephone number and e-mail address);  
and  
Date submitted.

#### **7.8.1.1 – Executive Summary**

**(Rev. 203, Issued: 05-25-07; Effective: 07-01-07; Implementation: 07-02-07)**

The SAR is an outgrowth of the MR strategy. The executive summary of the SAR shall provide a high-level summation of overall program requirements enacted, and any progress, changes or updates since the submission of the MR Strategy. Program requirements include things such as program management, continuous quality improvement activities, and the Comprehensive Error Rate Test (CERT) findings. This allows contractors an opportunity to address important projects and CMS requirements that are not captured under the prioritized MR problem list and addressed in the Problem Specific Activities, section 7.8.1.3, and to provide additional information on problem specific activities that are not covered under the SAR criteria. For contractor specific error rates, the contractor shall list actions that have already been taken and that are currently in effect, as well as those actions planned for implementation in the future. The contractor shall utilize this analysis tool as the MR reporting mechanism for the CERT Error Rate Reduction Plan (ERRP). This section should include the above-mentioned analysis of cost and workload from the quarterly variance report. The quarterly variance report is not required by the PSCs.

#### **7.8.1.2 – Problem Specific Activities**

**(Rev. 203, Issued: 05-25-07; Effective: 07-01-07; Implementation: 07-02-07)**

In accordance with the MR strategy process (IOM 100-8, chapter1), contractors shall develop a prioritized medical review problem list. The SAR will summarize the activities taken to address each of the problems identified in the MR strategy that the contractor focused on. For each problem the contractor shall report on the following:

- Problem Description (include problem number as identified in the strategy)
- Probe Reviews
  - o Number Identified
  - o Number Initiated
  - o Number Completed
- Targeted Reviews
  - o Number Identified
  - o Number Initiated
  - o Number Completed

A spreadsheet shall track the progress made on each problem addressed until the problem is resolved. The spreadsheet should not be greater than one page per problem. Refer to the following chart for the recommended spreadsheet format.

**7.8.1.2.1 - Problem Specific Activity Definitions**

(Rev. 203, Issued: 05-25-07; Effective: 07-01-07; Implementation: 07-02-07)

**A. Probe Reviews**

**1. Number Identified:** The number of probe reviews cases that have been identified by the contractor through data analysis and earmarked as part of the medical review activities to address the particular medical review problem. A probe review case is a random sample of 20 to 40 claims in the case of a provider-specific problem, or 100 randomly sampled claims for a widespread or service-specific problem (see IOM 100-8, chapter 3, §14).

**2. Number Initiated:** The number of probe review cases identified to address the particular medical review problem area for which substantive medical review resources have been deployed. In general, initiation of a probe case is usually the date a request for medical records is sent to the provider(s).

**3. Number completed:** For the purposes of reporting in the SAR, a probe case is considered completed when the medical review is concluded and corrective actions have been initiated. Examples of corrective action initiation include:

- a) Initial feedback on the review findings and results have been supplied to the provider along with instructions on how to correct the problems and notification of any other corrective actions to be implemented as a result of the review,
- b) Referrals for overpayment collection (as applicable) have been made,
- c) Referrals for targeted prepayment medical review (as applicable) have been made,
- d) Referrals for follow-up action (as applicable) have been made (e.g., in the case of no prepay review, a referral has been made to the data analysis area for follow-up; or referral for follow-up probe review has been made to the appropriate medical review area),
- e) Referrals for quality of care or QIO (as applicable) have been made, and
- f) Referrals for any other category of corrective action have been made.

## **B. Targeted Review**

**1. Number Identified:** The number of providers that have been identified through probe review (or other method) as billing in error for a particular service or services, and referred for placement on targeted medical review as a means of corrective action to address the particular medical review problem area. In the case of more than one service, the range of services must all be part of a general heading of services that can be grouped under the particular medical review problem (e.g., physical medicine & rehabilitation as a medical review problem area may include a range of services being supplied by a provider such as 97110-97112, 97116, 97140, and 97530).

In addition, targeted medical review could also be directed toward a specific service or group of services that can be included under the general heading of the particular medical

review problem, having been validated as a widespread problem through probe review. For example, with physical medicine & rehabilitation as a widespread medical review problem area and the range of services including 97110-97112, 97116, 97140, and 97530, the number of services identified for this problem area would 5.

**2. Number Initiated:** The number of providers or services identified for placement on targeted medical review to address the particular medical review problem area and for which a screen or suspension of claims has been initiated.

**3. Number Completed:** For the purposes of reporting in the SAR targeted medical review case is considered completed when data analysis shows there is no longer an aberrance in billing patterns, denial rates for claims included in the targeted review are at or below an acceptable threshold, and the screen has been deactivated for the provider or service(s).

### **7.8.1.3 – Narrative**

**(Rev. 203, Issued: 05-25-07; Effective: 07-01-07; Implementation: 07-02-07)**

In a narrative for each problem, the contractor shall provide feedback for that particular problem. The narrative will be the mechanism for the contractor to communicate changes in problem priority, rational for variances, or any other item the contractor feels would be beneficial to the problem at hand. The contractor shall include in the narrative any QA initiatives performed during the 6 months. In particular, the contractor shall discuss the effectiveness of interventions performed. The contractor shall include actions that will continue or begin in the next 6 months. In addition, the contractor shall indicate when follow-up activities will occur, and the actions that will be taken. The contractor shall update the analysis after the follow-up is complete and describe the results to provide closure to the problem. Furthermore, the contractor shall indicate whether a LCD was generated or revised during the quarter as it relates to the problem addressed. In addition, this section shall identify those problems being addressed as a result of CERT findings.

Finally, as problems are resolved and closed, the problem list should be evaluated, re-prioritized and a new problem(s) initiated. The contractor shall address the evaluation process and problem selection in the SAR.
