Grants Application Status

Research.gov's Grants Application Status service provides transparency into the grant-making process. Grants Application Status offers a single, electronic location where applicants can quickly and easily check up-to-date application status information for grant applications submitted to the National Science Foundation (NSF).

Grants Application Status displays all applications submitted to NSF via Grants.gov or FastLane. With Grants Application Status, you can:

- View detailed application status history from submission to review to decision

- View a consolidated list of grant applications submitted to NSF

- Maintain a single log-in to view applications

- Search and sort applications by multiple fields (e.g., agency, tracking number, and received date)

- View panel reviews (Principal Investigators only)

Grants Application Status will help you:

- Gain easy access to grant application status information

- Check grant applications in a single location

- Communicate with NSF about the status of your application

- Manage your grant portfolio

What is Research.gov?

Research.gov enables organizations and grantees to access streamlined grants management services and other resources for multiple federal agencies in one location. Led by NSF, Research.gov is the modernization of FastLane and evolves NSF's grants management systems to increase the quality and scope of services for the research community. The modernization will include moving legacy FastLane capabilities to a new, modern portal platform.
