¹Percentages shown only for reporting areas with information reported for ≥90% of cases, and indicate the percentage of those who completed therapy within 1 year.

²Most recent year for which data are available.

³Therapy < 1 year indicated in persons alive at diagnosis with an initial regimen of one or more drugs prescribed, who did not die during therapy. Excludes persons with initial isolate rifampin resistant, or patient with meningial disease, or pediatric patient (aged <15) with miliary disease or positive blood culture.

⁴Persons of Hispanic or Latino origin may be of any race.

⁵Excludes New York City.

⁶Not included in U.S. totals.

Note: Case counts and percentage for race categories do not include persons of Hispanic ethnicity. Ellipses indicate data not available. See Technical Notes for description of Completion of Therapy calculation (page 9).
