<b>Notes:</b>	Totals for Facilities with Inspections and Actions/Events may not be additive because EPA and states can take an activity against the same facility. Generally, EPA counts will include activities conducted at facilities on Tribal lands. Facility counts and other data are from 2008 Frozen Data used under the State Review Framework (SRF) - the information may differ from the updated/live data pulled from ECHO or other sources.											
<b>Footnotes:</b>												
1	Active in this report indicates facility is either operating, temporarily closed, seasonally operated or, for columns on activity counts, had one of this activities conducted in FY2008.											
2	Synthetic Minor (SM) facilities are those who have special permits sometimes called Federally Enforceable State operating Permits (FESOPs) which specifically "limit" or condition the operation of the facility such that it will not source under Title V, New Source Review or MACT.											
3	Minor sources are those with Potential to Emit levels of emissions below CAA major thresholds without special synthetic minor/FESOP permit conditions											
4	Universe data from OAR, OAR link to definitions and web sites for more info? OAR Footnote text needed											

**DRAFT (Final available by 9/2 COB)**  
**CAA Regulated Facility Universe Counts - Compilation of EPA Databases for the CAA Programs**

5	The Acid Rain Program affects electric utility units greater than 25 megawatts which were in operation as of November 15, 1990, and all units regardless of size that began operating after November 15, 1990. In addition, some have chosen to opt in to the Acid Rain Program. The numbers provided in the table are facilities at which at least one unit is affected. Not all majors are subject to Acid Rain provisions. The web link:
6	Many facilities emit both Criteria and HAPS, therefore, are counted twice. NEI web site for more information ( <a href="http://www.epa.gov/ttn/chief/eiinformation.html">http://www.epa.gov/ttn/chief/eiinformation.html</a> )
6	TRI web site for more information ( <a href="http://xxx.xxx/xxxxxx">http://xxx.xxx/xxxxxx</a> )
