# Notes and Brief Reports 

## Family Benefits in Current-Payment Status, June 30, 1962*

During the year ended June 30, 1962, the number of families receiving monthly benefits under the old-age, survivors, and disability insurance program increased about 1.2 million. At the end of the fiscal year, monthly benefits were being paid to at least one person in 12.8 million families (table 1 ).
Retired-worker families, which made up 73 percent of the total, numbered 9.3 million-about

[^0]934,000 more than a year earlier. The number of survivor families increased 189,000 to 2.7 million and represented 21 percent of all beneficiary families. These increases are partly attributable to the 1961 amendments to the Social Security Act, which provided benefits, effective August 1961, for men aged 6264 and liberalized the insured-status requirements. The liberalization in the earnings test, effective retroactively to January 1961, also contributed slightly. An increase of 121,000 brought the number of disabled-worker families to 679,000 at the close of the fiscal year.

Generally, average family benefits at the end of June 1962 showed moderate increases from the corresponding averages a year earlier. The reasons were (1) the growing proportion of bencfits computed on the basis of earnings after 1950, (2) the

larger number computed under the provisions of the 1954 amendments that permit, in the computation of the average monthly wage, the dropping out of as many as 5 years of lowest covered earnings and, in addition, any period of total disability, (3) the increasing number of beneficiaries for whom higher maximum creditable earnings were possible, as provided by the 1950, 1954, and 1958 amendments, (4) the 1961 legislation increasing by 10 percent widow's, widower's, and-when only one parent is entitled-parent's benefits, and (5) the 1961 legislation raising the minimum primary insurance amount and sole survivor benefit from $\$ 33$ to $\$ 40$.
Payments to retired workers without dependents also receiving benefits averaged $\$ 81.70$ for men and $\$ 62.40$ for women. Among families consisting of a retired worker and his aged wife, the average was $\$ 127.10$. The average benefit for aged-widow families was $\$ 65.40$, and for families consisting of a widowed mother and two children it was $\$ 191.40$.
The average benefits being paid to disabled workers who had no dependents also receiving benefits were $\$ 91.40$ for men and $\$ 77.90$ for women. For families consisting of a disabled worker, a young wife, and one or more children, the average benefit was $\$ 191.70$.

Families with benefits computed on the basis of earnings after 1950 had considerably higher average benefits than those whose benefits were based on earnings after 1936 (table 2). Among retired-
worker families whose benefits were based on post1950 earnings, the average benefits being paid were $\$ 89.90$ for a man with no dependents, $\$ 68.30$ for a woman with no dependents, and $\$ 135.20$ for a retired worker and his aged wife. At the end of June 1962, about 73 percent of all retired-worker families were receiving benefits based on earnings after 1950 . This proportion will undoubtedly increase, since earnings after 1950 were used for about 83 percent of the old-age benefits awarded in the fiscal year 1961-62, and higher percentages are expected among the awards of future years.

For survivor families, the average benefits based on earnings after 1950 were $\$ 76.50$ for agedwidow families and $\$ 212.70$ for families consisting of a widowed mother and two children. Only 47 percent of the aged-widow families were receiving benefits based on earnings after 1950. This low proportion reflects the large number of benefits payable to (1) widows aged 62 or over whose husbands had died before April 1952 and (2) widows of men who had retired as old-age beneficiaries before April 1952 and who died with no employment after March 1952. Benefits cannot be based on earnings after 1950 in either case.

Among disabled-worker families, the average benefits based on post-1950 earnings were $\$ 96.60$ for a man with no dependents, $\$ 82.20$ for a woman with no dependents, and $\$ 200.70$ for a disabled worker, his young wife, and one or more children.
