PUBLIC ASSISTANCE

BUREAU OF PUBLIC ASSISTANCE

The liquidation of the Civilian Conservation Corps and changes in the character or magnitude of other public aid programs have necessitated several changes in the statistical series relating to the public assistance and Federal work programs in the United States. These changes, described below, are effective beginning July 1942.

Because of a drastic reduction in its appropriation, the Farm Security Administration will not make subsistence payments in the current fiscal year to balance farm and home plans of families accepted for rehabilitation loans. Subsistence payments will be made only to families in need because of natural disasters. It is possible, therefore, that in many months no payments will be made. Consequently, data on subsistence payments are dropped from the series.

The Civilian Conservation Corps is in process of liquidation as directed by the Congress. Data on

enrollees and earnings during the period of liquidation will be included in the time series as reports become available, but State data for this program will no longer be shown.

The out-of-school work program of the National Youth Administration is now focused on the training of inexperienced youth for war industry. Need is not a criterion for enrollment on work projects. Consequently, this program is dropped from the series.

Data for Public Works Administration and other Federal agency projects financed from emergency funds are discontinued, because they are of negligible importance even in the few States in which such projects are still in existence.

Since November 1940, data on regular Federal construction projects have been excluded from the totals of the series on public assistance and Federal work programs but have been presented in the last

Chart 1.—Public assistance and Federal work programs: Payments to recipients and earnings of persons employed in the continental United States, January 1933–July 1942 1

¹ Partly estimated and subject to revision. For 1933 data, see the Bulletin, February 1941, p. 66; for January 1934-June 1941, see the Bulletin, February 1942, pp. 20-27. For definitions of terms, see the Bulletin, September 1941, pp. 60-52; see also footnotes 4, 6, and 7.

2 Effective July 1, 1942, the term "general relief" has been changed to "general sasistance," but coverage of program has not been changed.

4 Data from the FSA.

4 Data from the CCC. Beginning July 1941, earnings of persons enrolled estimated by the CCC by multiplying average monthly number of persons enrolled by average of \$67.20 for each month for enrollees other than Indians and \$60.50 for Indians.

4 Data from the NYA.

Data from the WPA. Beginning July 1942, represents expenditures (approved vouchers) for labor during month.
 Data from the Bureau of Labor Statistics. Beginning October 1941, represents carnings on projects financed from PWA funds only; data not available for other Federal agency projects financed under Emergency Relief Appropriation acts, but latest available reports showed total monthly earnings of approximately \$100,000.
 Excludes earnings of Indian enrollees for which data are not available; latest available reports showed total monthly earnings of approximately \$303,000.
 See text for changes in series.

[†] Through January 1942, an area represents a city, county, or group of counties; beginning with February 1942, an area represents a county or city.

^{*} Includes recipients of 3 special types of public assistance and of subsistence payments from the FSA; recipients of, and those eligible for, general assistance; persons certified as in need of assistance and employed on or awaiting assignment to projects financed by the WPA. Includes for 1 area (Shawne, Okla.) some low-income families having weekly income of less than \$19.50 who have been eligible to participate since October 1939.

[·] Preliminary.

¹ For definitions of terms, see the Bulletin, September 1941, pp. 50-52. Effective July 1, 1942, the term "general relief" has been changed to "general assistance," but coverage of program has not been changed.
¹ Partly estimated; does not represent sum of State figures, because an estimated number of cases receiving medical care, hospitalization, and/or burlal only and total payments for these services in 3 States have been excluded, and data on cases aided in Oklahoma estimated to exclude duplication.
¹ Decrease of less than 0.05 percent.
¹ Beate program only; excludes program administered by local officials.
¹ Includes unknown number of cases receiving medical care, bospitalization, and/or burlal only, and total payments for these services.
² Excludes assistance in kind and cases receiving assistance in kind only and, for a few counties, cash payments and cases receiving cash payments. Amount of payments shown represents approximately 70 percent of total expenditures.
¹ Estimated.
¹ Represents assistance to employables in New Orleans and a small amount

Extimated.

Represents assistance to employables in New Orleans and a small amount in scattered parishes; State-wide program discontinued as of June 30, 1942.

No change.

Includes cases receiving medical care only; number believed by State agency to be insignificant.

Represents 2,055 cases aided under program administered by State board of public wellare, and 4,047 cases aided by county commissioners; amount of duplication believed to be large; average per case and percentage change in number of cases cannot be computed. Report incomplete for some countles.

Partly estimated.

Comparable data not available.

for estimating the unduplicated number of households and persons benefitting from the programs have been derived from special studies and periodic statistical reports of the agencies included in the series. These factors are no longer adequate for purposes of making monthly estimates, and accordingly they are discontinued.

Public assistance and earnings under the Federal

¹ See footnotes to table 1.

³ Figures in italics represent programs administered under State laws from State and/or local funds without Federal participation.

⁴ Partly estimated; does not represent sum of State figures, because total payments for medical care, hospitalization, and burial in 3 States have been excluded.

⁴ Includes data for South Carolina, where amount of cash grant payments canceled during month exceeded by \$11,894 amount of cash grant payments issued.

State program only; excludes program administered by local officials.
 Includes total payments for medical care, hospitalization, and/or burial.
 I.ess than \$500.
 Data represent approximately 70 percent of total expenditures; exclude assistance in kind and, for a few counties, cash payments.
 Partly estimated.
 Estimated.
 Decrease in payments in June 1942 resulted from shortage of funds.

Security Board in both years, the number of persons receiving old-age assistance in July 1942 was larger than in July 1941; the number receiving aid to the blind increased in 26 of these States.

In contrast, the number of families receiving aid to dependent children decreased in 30 States. Arkansas was the only State to report an increase in the number of cases receiving general assistance.

¹ See footnotes to table 2.

3 Figures in italies represent programs administered under State laws from State and/or local funds without Federal participation.

4 Partly estimated; does not represent sum of State figures, because an estimated number of cases receiving medical care, hospitalization, and/or burial only in 3 States has been excluded, and data on cases aided in Oklahoma have been estimated to exclude duplication.

4 Total includes data for South Carolina, where number of eash grant payments canceled during month exceeded by 285 number of cash grant payments issued.

Issued.

*State program only; excludes program administered by local officials.

<sup>Includes unknown number of cases receiving medical care, hospitalization, and/or burial only.

Excludes cases receiving assistance in kind only and, for a few countles, cash payments.

Partly estimated.

Estimated.

Includes cases receiving medical care only; number believed by State agency to be insignificant.

Includes cases receiving medical care only; number believed by State board of public welfare, and 6,431 cases aided by county commissioners; amount of duplication believed to be large.</sup>
