

F is for Forest Communities

Project Plan Guide

Name _____

My Tasks

Students will learn about forest communities and the plants and animals that live in different forest communities in our National Parks. Students will create a picture on the computer identifying a plant or animal found in the forest of a National Park.

My Worksheets to Complete

___ What Am I?

___ I Belong in the Forest

Project Option

You will create a forest scene using computer drawing software. Your scene will include a forest background. You will include one plant or animal that you chose from the Yosemite National Park website. To finish your project, your teacher will help you import your completed forest picture into a template. You will label the plant or animal by writing its name and identifying it as a plant or animal.
