

# Weather Watchers Project Guide

Name: \_\_\_\_\_

## My Tasks

After recording temperatures, create a graph displaying the data and write an explanation of what you found.

- **Graph:** Your line or bar graph should display all the temperature data you collected and clearly show the temperature patterns for each location you studied.
- **Written Explanation:** Your explanation should include temperature trends you noticed, connections between temperature and weather in each location, predictions for upcoming weather, and comparisons between the locations.

## My Worksheets to Complete

\_\_\_ Exploring National Sites

\_\_\_ Tracking Temperatures

## My Rubric

___/5	Graph includes all parts (title, axis labels, etc.)
___/5	Graph clearly shows temperatures in each location.
