

DWIGHT D. EISENHOWER LIBRARY
ABILENE, KANSAS

FURNAS, CLIFFORD COOK:
Papers, 1918-1969

Accession 71 – 35

Processed by: JAW

Date Completed: February 14, 1972

The papers of Clifford Cook Furnas, educator, engineer, Assistant Secretary of the Department of Defense for Research and Development, were deposited in the Eisenhower Library in October 1970, by Mrs. Sparkle M. Furnas. In April 1970, Mrs. Furnas executed an instrument of gift for these papers.

Linear feet shelf space occupied: 7.6
Approximate Number of pages: 15,200
Approximate number of items: 7,650

Literary rights in the unpublished writings of Clifford C. Furnas in these papers in the Eisenhower Library are dedicated to the people of the United States.

By agreement with the donor the following classes of documents will be withheld from research use:

1. Papers relating to the family and private business affairs.
2. Papers relating to the family and private business affairs of other persons who have had correspondence with Clifford C. Furnas.
3. Papers relating to investigations of individuals or to appointments and personnel matters.
4. Papers containing statements made by or to Dr. Furnas in confidence unless in the judgment of the Director of the Dwight D. Eisenhower Library the reason for the confidentiality no longer exists.
5. All other papers which contain information or statements that might be used to injure, harass, or damage any living person.

SCOPE AND CONTENT NOTE

The papers of Clifford Cook Furnas span the years 1926 to 1969, but the bulk and most significant parts cover the years 1952 to 1969, when Dr. Furnas was associated with various Department of Defense research activities.

The pre-Eisenhower Administration portion of the papers consists of speeches and articles written for various professional organizations, as well as business and social meetings. The subjects of these papers usually concern problems in chemical engineering techniques, procedures, and the role of science and technology in society.

Two-thirds of the papers concern Dr. Furnas' activities on various Defense Department science advisory panels and committees. This series of files includes correspondence, reports, Congressional testimony, minutes of meetings, along with speech and article files maintained while he was serving as Assistant Secretary of Defense for Research and Development, 1955-1957. They also pertain to his activities on various science advisory boards, as Chairman of the Defense Science Board, and as science advisor to the House of Representatives. This portion also includes some correspondence, reports, speeches, and articles concerning the activities of the National Academy of Engineering and other professional organizations.

Subjects in these papers include the role of science and technology in the Department of Defense; the impact of science and technology on regional development; problems in aircraft construction; a study of Department of Defense in House Labs; the appointment of Frank Newbury as Furnas' successor as Assistant Secretary of Defense; the relationship of the National Academy of Engineering to the National Research Council and the National Academy of Sciences; and various scientific and technological problems within the Department of Defense arsenals and laboratories. Correspondents include George B. Kistiakowsky, James R. Killian, Elwood P. Quesada, Donald A. Quarles, Senator Henry M. Jackson, T. Keith Glennan, Lt. General Arthur G. Trudeau, Thomas Gates, Lawson McKenzie, Major General Leslie E. Simon, Lt. General Don A. Prett, Edward L. Glodeck, Congressman Emilie Q. Daddaris, Dr. Chauncy Starr, Frederick Seitz, and Eric Walker.

Dr. Furnas was still actively engaged in the Defense Department science advisory programs after January 1961, and the correspondence after that date contains additional information on their activities and functions.

Approximately one hundred photographs and eight printed items received with the collection were separated and transferred to the Audio-Visual and Book collections of the Eisenhower Library.

BIOGRAPHICAL SKETCH

Born: October 24, 1900 at Sheridan, Indiana

Died: April 27, 1969 at Amsterdam, Holland

Married: Sparkle Moor Furnas

Education:

B.S., with honors, Purdue, 1922

Ph.D., University of Michigan, 1926

Honorary Doctor of Engineering, Purdue, 1946

Honorary Doctor of Engineering, University of Michigan 1957

Honorary Doctor of Laws, Alfred University, 1958

Honorary Doctor of Science, Thiel College, 1960

Degree Honoris Causa, University National de Asuncion, 1963

Olympic Games, Antwerp, 1920

Big 10 Conference Medal, 1922, for best combined scholastic and athletic record

Academic Career:

1922-1924 Teacher of Mathematics, Shattuck School, Minnesota

1924-1925 Research Chemist, U.S. Steel Corporation

1926-1931 Physical Chemist, U.S. Bureau of Mines

1931-1941 Associate Professor of Chemical Engineering, Yale University

1941-1942 National Defense Research Committee, technical aide

1943-1946 Director of Curtiss-Wright Aeronautical Research Laboratory at Buffalo, New York

1946-1954 Director and Executive Vice President of Cornell Aeronautical Laboratory

1954-1962 Chancellor, University of Buffalo

1962-1966 President, State University of New York at Buffalo

1962-1966 President, Western New York Nuclear Research

1966-1969 President Emeritus, State University of New York at Buffalo

Government Career:

1952-1953 Chairman, Guided Missile Commission, Research and Development Board

1954-1957 Chairman, Department of Defense Advisory Panel on Aeronautics

1954-1969 Member, U.S. Army Science Advisory Panel

1955-1957 Member National Advisory Committee for Aeronautics

1955-1957 Assistant Secretary of Defense for Research and Development

1956-1957 Chairman, Air Navigation Development Board

1957-1969 Member, Defense Science Board

1958-1969 Member, Naval Research Advisory Committee

1961-1965 Chairman, Defense Science Board

1961-1969 Chairman, New York Advisory Council, Industrial Research and Development

1968-1969 Vice-Chairman, National Research Council

Author:

*America's Tomorrow (1932)

*The Unfinished Business of Science (1935)

*The Next Hundred Years (1936)

*Man, Bread and Destiny (1937)

Technological Trends and National Policy, section on metallurgy (1937)

*The Storehouse of Civilization (1939)

*The Individual and the World (1940)

*Excerpts from Our Intellectual World Sections 9-13, Division II of The Individual and the World (1940)

*Research in Industry (1948)

The Engineer (1966)

* In the Book Collection of the Eisenhower Library

DESCRIPTION OF SERIES

Box No. Series

1-14 Organizations, 1952-1969, 14 containers.

Letters and reports sent and received, alphabetically arranged by title of the government agency or professional organization. Committees and subcommittees are filed in alphabetical order under the agency or organization concerned with their work. Since most of Furnas' work was concerned with the Department of Defense, the Defense agencies, such as the Department of the Army, the Department of the Navy, and the Department of the Air Force have been listed as separate entries. Only when an agency, such as the Defense Science Board, is concerned with the whole Department of Defense is that agency listed under "Department of Defense." In most cases, the correspondence, in chronological order, is listed first and is followed by the reports of the agency, committee, or subcommittee.

15-18 Speeches, 1936-1969, 4 containers

Correspondence, copies of the speech, and, when present, printed/published copies of the speech, filed in chronological order.

19 Articles, 1926-1969, 1 container.

Chronologically arranged file of published articles. These articles are primarily concerned with chemical engineering techniques and problems, American missile development, and the role of science and research in society. At the end of the series there is a folder containing a biography and obituary of Dr. Furnas.
