

Webinar FAQs
5th Meeting of the Dietary Guidelines Advisory Committee
April 13 and 14, 2010

1. Why is this meeting of the Dietary Guidelines Advisory Committee (DGAC) being held as a Webinar instead of an in-person meeting?

The work of the DGAC is far-reaching and the 2010 Dietary Guidelines will impact people and programs across the nation. It is important that the deliberations of the DGAC be transparent to the public. This transparency allows interested parties to follow the evaluation of the science supporting the 2010 Dietary Guidelines.

For DGAC meetings in the past, only a limited number of people have been able to observe the deliberations of the Committee, because traveling to Washington, DC in person for the meetings was required. The Webinar format allows many more people from across the nation to access the meeting without incurring costs. In addition, the Webinar is recorded and archived for later viewing; allowing for even greater reach to the public, as well as continued access to meeting proceedings.

2. What is a Webinar?

A Webinar is a way to hold a meeting via the internet where the DGAC members share documents and presentations and have meeting discussions. As an observer of the DGAC Webinar, you will log on from your computer to hear the proceedings and view the presentations as they are given.

3. What will I see during the Webinar? Will I be able to see the Dietary Guidelines Advisory Committee members?

During the Webinar you will see the PowerPoint slides as they are presented. You will hear the Committee, but they will not be visible to you. The Webinar technology will allow you to identify who is speaking. The Committee members will be asked to announce themselves when they speak to aid the public in following the deliberations.

4. Is there a cost to the viewer associated with the Webinar?

No, there is no cost for viewing the Webinar.
