May 7, 2012 – Maintenance release of AHRQ Quality Indicators Software for Windows V4.3a

The Agency for Healthcare Research and Quality (AHRQ) has released V4.3a of the Quality Indicators (QI) software for Windows (WinQI), a maintenance release of WinQI V4.3 that can be downloaded here. This release provides the following updates:

- It includes Version 29 of the 3M™ APR-DRG Limited License Grouper. This grouper replaces the Version 28 3M™ APR-DRG Limited License Grouper included in V4.3 and corrects the issue described on the AHRQ QI website here.
- It allows users to calculate area-level indicators for years 2010 and 2011, correcting an issue previously identified in V4.3.
