## MIDWEST REGION CONSUMER PRICE INDEX – SEPTEMBER 2012 Prices in the Midwest up 0.3 percent in September and 1.9 percent higher over the year

The Consumer Price Index for All Urban Consumers (CPI-U) in the Midwest rose 0.3 percent in September, following a 0.7-percent advance in August the U.S. Bureau of Labor Statistics reported today. Regional Commissioner Charlene Peiffer noted that higher prices for motor fuel, up 2.7 percent, had the greatest upward impact on the index. Overall, energy costs rose 1.6 percent over the month. Food prices edged down 0.1 percent and the index for all items less food and energy was 0.2 percent higher in September.

The CPI-U for the Midwest rose 1.9 percent from September 2011 to September 2012. The energy index, which includes motor fuel and household fuels, was up 2.2 percent, and food prices advanced 1.2 percent. Excluding food and energy, the CPI-U increased 2.0 percent over the year. (See chart 1.)

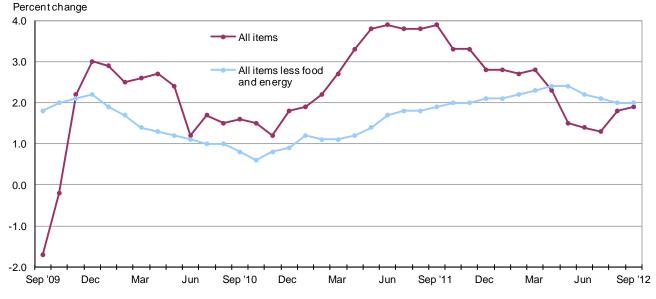

Chart 1. Over-the-year changes in consumer price indexes, Midwest Region, September 2009–September 2012

Source: U.S. Bureau of Labor Statistics

#### Food

Food prices were virtually unchanged (-0.1 percent) in September following a 0.2-percent gain in the preceding month. Lower costs for food at home (-0.3 percent) slightly outweighed higher prices for food away from home (0.2 percent).

From September 2011 to September 2012, food prices rose 1.2 percent, the smallest over-the-year advance since August 2010. Rising costs for food away from home (2.6 percent) led the increase though higher prices for food at home (0.4 percent) also contributed. The annual rate of increase in food prices has slowed each month since late 2011.

### Energy

The energy index for the Midwest increased 1.6 percent in September. The rise was attributable to a 2.7-percent advance in motor fuel prices. In contrast, costs for electricity fell 0.2 percent and utility (piped) gas service turned down 0.3 percent.

Energy costs rose 2.2 percent from September 2011 to September 2012. Motor fuel prices advanced 7.7 percent during this period and were responsible for the increase. Moderating the overall rise in energy costs, utility (piped) gas service prices dropped 11.4 percent and electricity costs fell 0.8 percent from September a year ago.

### All items less food and energy

The index for all items less food and energy was up 0.2 percent in September due to offsetting movements within the index. Among the components registering higher prices over the month were apparel (4.3 percent), shelter (0.1 percent), and education and communication (0.5 percent). In contrast, expenditure categories posting lower prices over the month included used cars and trucks (-2.3 percent), recreation (-0.3 percent), and household furnishings and operations (-0.3 percent).

The index for all items less food and energy was up 2.0 percent from September 2011 to September 2012. Higher costs for shelter (2.1 percent), medical care (4.6 percent), and recreation (1.9 percent) led the advance.

The Midwest Consumer Price Index for All Urban Consumers (CPI-U) stood at 221.125 in September 2012. A typical market basket of goods and services that cost \$100.00 in the 1982-84 base period cost \$221.13 in September 2012. Because regional CPI data are not adjusted for seasonal price variation, consumers and businesses should be cautious in drawing conclusions about long-term retail price trends from short-term changes in the regional indexes.

#### Table A. Midwest Region CPI-U monthly and annual percent changes (not seasonally adjusted)

### **CPI-W**

In September, the Midwest Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) was 217.940, up 0.4 percent over the month. The CPI-W increased 2.0 percent over the year.

# The October 2012 Consumer Price Index for the Midwest region is scheduled to be released on Thursday, November 15, 2012.

## **Technical Note**

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 88 percent of the total population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers approximately 29 percent of the total population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 87 urban areas across the country from about 4,000 housing units and approximately 26,000 retail establishments--department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date (1982-84) that equals 100.0. An increase of 16.5 percent, for example, is shown as 116.5. This change can also be expressed in dollars as follows: the price of a base period "market basket" of goods and services in the CPI has risen from \$10 in 1982-84 to \$11.65. For further details see the CPI home page on the Internet at www.bls.gov/cpi and the BLS Handbook of Methods, Chapter 17, The Consumer Price Index, available on the Internet at www.bls.gov/opub/hom/homch17\_a.htm.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. NOTE: Area indexes do not measure differences in the level of prices between areas; they only measure the average change in prices for each area since the base period.

The Midwest region is comprised of Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; TDD message referral phone number (Federal Relay Service): 1-800-877-8339

<sup>1</sup> This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator. <sup>2</sup> Index is on a December 1982=100 base. <sup>3</sup> Indexes on a December 1997=100 base.

<sup>4</sup> Special index based on a substantially smaller sample.

<sup>5</sup> Indexes on a December 1993=100 base.

Data not available.

Regions defined as the four Census regions. Midwest includes Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

NOTE: Index applies to a month as a whole, not to any specific date.

<sup>1</sup> This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator. <sup>2</sup> Index is on a December 1984=100 base. <sup>3</sup> Indexes on a December 1997=100 base.

<sup>4</sup> Special index based on a substantially smaller sample.
<sup>5</sup> Indexes on a December 1993=100 base.

- Data not available.

Regions defined as the four Census regions. Midwest includes Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin. NOTE: Index applies to a month as a whole, not to any specific date.
