## Highlights of Boston-Worcester-Manchester National Compensation Survey - October 2010

Workers in the Boston-Worcester-Manchester metropolitan area earned an average of $\$ 26.76$ per hour in October 2010, according to the National Compensation Survey (NCS), the U.S. Bureau of Labor Statistics (BLS) reported today. Regional Commissioner Denis M. McSweeney noted that wage data were reported for workers in a wide range of occupational groups, including average hourly earnings of $\$ 41.93$ for computer and mathematical science occupations and $\$ 37.01$ for health practitioner and technical occupations. Another occupational group, business and financial operations, had a mean hourly wage rate of $\$ 33.08$. The NCS data available for the Boston area included earnings for 21 major occupational groups with additional detail for selected occupations within those groups. (See table 1.)

Computer systems analysts, part of the computer and mathematical science occupational group, earned $\$ 42.41$ per hour. Within the healthcare practitioner and technical occupations group, registered nurses averaged $\$ 41.48$ per hour. Accountants and auditors, an occupation within the business and financial operations occupations group, registered an average hourly wage of $\$ 28.79$.

Broad coverage of selected occupational characteristics is available from NCS for the local area. Fulltime workers averaged $\$ 28.72$ per hour while their part-time counterparts earned $\$ 14.95$. Union workers averaged $\$ 30.03$ and non-union workers, $\$ 26.15$. Workers in establishments with 1-99 workers averaged $\$ 22.15$ per hour, those in establishments with $100-499$ workers $\$ 26.33$, and those in establishments with 500 or more employees earned $\$ 35.65$.

The occupational wage data available from NCS may be used by business for establishing pay plans, making decisions concerning plant relocation, and in collective bargaining negotiations. Individuals may use such data to help choose potential careers. NCS results also include the work level and respective earnings for occupations determined by a point factor leveling process. The four occupational leveling factors are: knowledge, job controls and complexity, contacts, and physical environment. Details on the NCS are available at www.bls.gov/ncs/home.htm.

The NCS data reported here covered 841 establishments with one or more workers in private industry and State and local governments. Agricultural establishments, private households, the self-employed, and the Federal Government were excluded from the survey. This sample of establishments represented $2,814,800$ workers in the Boston-Worcester-Manchester, MA-NH Combined Statistical Area which is
comprised of Essex, Middlesex, Norfolk, Plymouth, and Suffolk, and Worcester Counties in Massachusetts; and Belknap, Hillsborough, Merrimack, Rockingham, and Strafford Counties in New Hampshire.

## Survey Availability

Complete survey results are obtained in the Boston-Worcester-Manchester, MA-NH National Compensation Survey October 2010 which is available on the Internet in both text and PDF formats at www.bls.gov/ncs/ocs/compub.htm.

With the enactment of the Federal Government's 2011 budget, the Locality Pay Survey (LPS) portion of the National Compensation Survey (NCS) was eliminated. The final set of LPS products are now published which include the National Bulletin, Nine Census Summaries, Occupational Pay Relatives, and the LPS locality wage estimates. These products will not be produced in the future but we would like to develop methodologies, resources permitting, so that similar estimates can be modeled in the future. For further information, see: http://www.bls.gov/ncs/ocs/\#notices

For personal assistance or further information on the National Compensation Survey data, as well as other Bureau data, contact the New England Information Office by calling (617) 565-2327 from 8:30 a.m. to 12:00 p.m. and 1:30 p.m. to 4:00 p.m. ET.

| Packers and packagers, hand .......................... | - | - | 11.96 | 6.0 | - | - |

1 Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

2 Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35 -hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40 -hour week is the minimum full-time schedule.

Workers are classified by occupation using the 2000 Standard

Occupational Classification (SOC) system
4 The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate.
