Entrepreneurial Parity Remains Elusive for Minority-Owned Businesses

Entrepreneurial parity for minority business has yet to be reached. Parity is defined as reaching proportionality between the adult minority population and business development measures such as numbers of firms, gross receipts and employees of Classifiable firms (excludes publicly held).

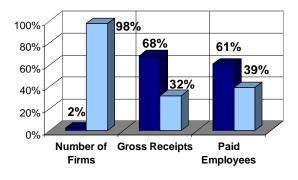

8.1

- The adult minority population represented 31 percent in 2007, but minorities held only 22 percent of all Classifiable firms. 9 percent of these firms' gross receipts and 10 percent of their employment.
- If minority firms' gross receipts reflected the 2007 adult minority population share, receipts would have amounted to \$3.4 trillion, about \$2.4 trillion more than the actual figure.
- Paid employment would have totaled 17.5 million—three times the actual employment.
- The number of minority firms would have been over 8.1 million firms, nearly 2.4 million additional firms.

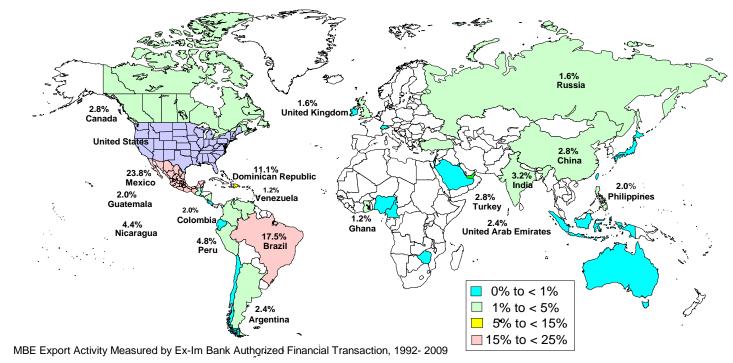

Minority-Owned Firms (\$1 Million and above in Gross Receipts), 2007

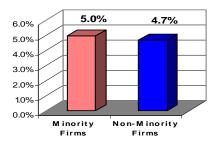

■ Minority Firms (\$1 million and above) ■ Minority Firms (Under \$1 million)

- While smaller in number, minority firms with receipts of \$1 million or more generate a much larger percentage of all minority revenues and paid employment than firms with receipts under \$1 million.
- There were over 141,000 minority-owned firms with receipts of \$1 million or more. These firms generated combined gross receipts of about \$700 billion and employed 3.5 million workers.
