Platform Strategy

The question is no longer, “Which do we develop for, native **or** mobile web?” but...

“How do we develop solutions to handle **both** mobile web & native **now** as well as the devices of the future?”

A poor representation of the ideal platform strategy...

apps.usa.gov • EyeNote is a mobile device application to denominate Federal Reserve Notes (U.S. paper currency) as an aid for the blind or visually impaired to increase accessibility.

Using EyeNote, a user can have the denomination of a note scanned and communicated back to the user. EyeNote works on the iPhone 3G and 3Gs, the iPhone 4, the 4th Generation iPod touch, and the iPad 2.

This application does not authenticate a note as either real or counterfeit. Please refer to the license agreement on the iTunes App Store.
