

# INDUSTRIAL CONTROL SYSTEMS JOINT WORKING GROUP BIANNUAL FACE-TO-FACE MEETING

Control Systems  
Security Program/  
ICS-CERT

# ICSJWG

Oct 15-18 | Denver, Colorado, USA

# 2012 ICSJWG Fall Meeting

Grand Hyatt Denver, Colorado

*You Are Invited!*

## MEETING DETAILS

Fall is around the corner and ICSJWG is preparing for its next Biannual Face-to-Face Meeting! This no cost event provides an opportunity for asset owners and operators, government professionals, vendors, systems integrators, R&D, and academic professionals to discuss the latest initiatives impacting security of industrial control systems and interact with colleagues and peers who may be addressing the risk of threats and vulnerabilities to their systems.

After a very successful Spring Meeting with over 250 in attendance, ICSJWG is making every effort to incorporate attendee feedback in the next schedule of events. Plans include establishing an Event Subcommittee from the ICSJWG community of volunteers; developing track themes based on ICS level of expertise that emphasize technical case studies; vulnerabilities & mitigations; solutions, tools, and trends; and other current ICS topics of interest.

## AGENDA

- Monday, Oct 15 - Subgroup Meetings

### ICSJWG Meeting Starts on October 16!

- DAY 1 – Meeting kicks off (10/16) with plenary, track presentation, and panel sessions
- DAY 2 – Meeting concludes (10/17) with continued plenary, track presentation, and panel sessions

### List of Events on October 18

- International Partners Day
- Intermediate Cybersecurity for Industrial Control Systems Training (Lecture Only)

## REGISTRATION

[Click here to register](#) for the subgroup working sessions, ICSJWG Biannual Meeting, Intermediate Control Systems Training, and/or the International Partners Day. All are welcome to attend! (Individuals can register for any and all events electronically or register onsite.)

## TRAINING

The Intermediate Cybersecurity for Industrial Control Systems Training course provides technical instruction on the protection of industrial control systems using offensive and defensive methods. Students will understand how cyber attacks could be launched, why they work, and mitigation strategies to increase the cybersecurity posture of their control system.

## INTERNATIONAL PARTNERS DAY

The International Partners Day is open to international partners and ICSJWG members interested in learning about cybersecurity initiatives and issues facing critical infrastructure control systems around the world. The International Partners Day runs concurrent to the control systems training course on Thursday, October 18.

## TRAVEL

There is no cost to attend this event. Travel, accommodations, meals, beverages, and other incidental expenses are the responsibility of the event participants and will NOT be covered by ICSJWG or CSSP.

**We hope to see you in Denver!**
