

Which Toy for Which Child

**A Consumer's Guide for Selecting
Suitable Toys**

**U.S. Consumer Product
Safety Commission
Washington, D.C. 20207**

**AGES
BIRTH
THROUGH
FIVE**

Pub. No. 285

Developed under Contract CPSC-C-85-1089 by Dr Barbara Goodson, Developmental Psychologist, Abt Associates, Inc , Cambridge, Massachusetts, and Dr Martha Bronson, Educational Psychologist, Cambridge, Massachusetts

Play is a natural activity for every young child. Play provides many opportunities for children to learn and grow—physically, mentally and socially. If play is the child's work then toys are the child's tools, and appropriate toys can help children do their work well.

Young children explore objects in their environment by "mouthing" them. Children can choke to death on such items. These items include toys (such as balloons and small balls), and household and food items (such as hot dogs, peanuts, popcorn, coins, batteries, etc.). Although toys intended for young children should be free of small parts that could cause a choking incident, toys intended for older children may find their way into the hands of younger children. **Reminder: Be sure to keep ALL small items out of the hands of children who mouth objects, especially children under the age of three. Remind three and four year olds to keep such items out of their mouths. Instruct older children to keep these items out of reach of younger children.**

This booklet offers suggestions for selecting suitable toys for children **birth to 5 years of age**. It was prepared by the U S Consumer Product Safety Commission, the government agency that is charged with protecting the public against unreasonable risks of injury associated with consumer products.

A parent or friend choosing a toy for a child must consider several things. A good toy should be

- safe for that child's age, well constructed, and durable;
- appealing and interesting to the child;
- suited to the child's physical capabilities, and
- suited to the child's mental and social development.

This booklet provides some guidelines to help in selecting toys that meet these criteria. The suggestions in this booklet are based on three sources (1) review of reference works on child development, (2) observations of children at play, and (3) product analyses of toys to determine which characteristics are most critical in defining the appropriate ages of the intended users.

This booklet is organized in the following way. Brief outlines of childrens' **ABILITIES AND INTERESTS** are followed by categorized **TOY LISTS** for each of five age groups.

The five age groups are
Young infants (birth to 6 months)
Older infants (7 to 12 months)
Young toddlers (1 year olds)
Older toddlers (2 year olds)
Preschoolers (ages 3, 4 and 5)

ABILITIES AND INTERESTS sections list physical, mental and social abilities and interests for each age that are particularly relevant to selecting appropriate toys. Note that these lists indicate average development—the age range at which the “average” child can be expected to achieve a particular skill or develop a specific interest. The ages in the text are only approximate. Children develop skills at uneven rates—any one child may be “above average” in one skill and “below average” in another skill. For an individual child, the parent is the best judge of the child’s abilities and interests at any point in his or her development, and should select toys suitable for that child’s profile of capabilities.

TOY LIST sections give toy suggestions in six major categories with subcategories under each to help in finding a particular toy type. The major categories and subcategories are listed on the following page. Note that these sections do not constitute a comprehensive list of all toy products that might be suitable for a particular age. They do suggest general toy types suitable for that age group. This booklet does **not** judge the play value or benefits of specific toys. For example, suitable types of projectile toys are described in the **TOY LISTS**, although the potential safety hazards of these toys lead many in the field to recommend against them.

ALL TOYS (a general category orienting the consumer to special features of toys that are relevant to the particular age group).

ACTIVE PLAY

- Push and Pull Toys
- Ride-On Toys
- Outdoor and Gym Equipment
- Sports Equipment

MANIPULATIVE PLAY

- Construction Toys
- Puzzles
- Pattern-Making Toys
- Manipulative Toys
- Dressing, Lacing and Stringing Toys
- Sand and Water Play Toys

MAKE-BELIEVE PLAY

- Dolls
- Stuffed Toys
- Puppets
- Role Play Materials
- Play Scenes
- Transportation Toys
- Projectile Toys

CREATIVE PLAY

- Musical Instruments
- Art and Craft Materials
- Audio-Visual Equipment

LEARNING PLAY

- Games
- Specific Skill Development Toys
- Books

TOY SAFETY. Major areas of consideration for all toys are safety and durability. Toys should be constructed to withstand the uses and abuses of children in the age range for which the toy is appropriate.

The U.S. Consumer Product Safety Commission (CPSC) has safety regulations for certain toys. Manufacturers must design and manufacture their products to meet these regulations so that hazardous products are not sold. In addition, many toy manufacturers also adhere to the toy industry's voluntary safety standards.

What the Government Does:

Mandatory Toy Safety Regulations

For All Ages

- No shock or thermal hazards in electrical toys
- Amount of lead in toy paint severely limited
- No toxic materials in or on toys
- Art materials used by children under 12 should be non-hazardous and indicate they conform with ASTM D-4236
- Latex balloons and toys and games with latex balloons must be labeled warning of the choking and suffocation hazards associated with pieces of and uninflated balloons

Under Age 3

- Unbreakable—will withstand use and abuse
- No small parts or pieces which could become lodged in the throat

- Infant rattles large enough not to become lodged in child's throat and constructed so as not to separate into small pieces
- No balls with diameters 1 75 inches or less

For Ages 3 through 6

- All toys and games with small parts must be labeled to warn of the choking hazard to young children

For 3 years and older

- The following toys must be labeled to warn of the choking hazard to young children
 - All balls and toys and games with balls with a diameter 1 75 inches or less, and
 - All marbles and toys and games with marbles

Under Age 8

- No electrically operated toys with heating elements.
- No sharp points on toys.
- No sharp edges on toys.

CPSC also can remove from the marketplace toys presenting hazards not covered by the regulations.

What the Industry Does:

Voluntary Standard for Toy Safety

- Puts age and safety labels on toys.
- Puts warning labels on crib gyms advising that

they be removed from the crib when babies can push up on hands and knees (to prevent strangling)

- Makes squeeze toys and teethingers large enough not to become lodged in an infant's throat
- Assures that the lid of a toy chest will stay open in any position to which it is raised and not fall unexpectedly on a child.
- Limits string length on crib and play pen toys to reduce the risk of strangulations

What a Parent Can Do:

Reduce Choking Risk

- Look for and read age and safety labels. Any toy that is age labeled for children three years and older should be kept away from children under the age of three — such toys **may** have small parts and **could** cause choking if placed in the mouth.
- Keep uninflated balloons and broken balloon pieces away from children.
- Rounded and oval objects (e.g., balls, marbles etc.) that fit easily into a child's mouth may be difficult to remove from a throat and could cause choking.

Reduce Strangulation Risk

- Crib toys with strings, cords, ribbons, etc. (used

to hang toys across a crib or to the side of a crib) present a strangulation risk when babies are just starting to push up on hands and knees, usually about 5 months of age. **REMOVE ALL CRIB TOYS WHICH ARE STRUNG ACROSS CRIB OR PLAYPEN AREA WHEN BABIES BEGIN TO PUSH UP ON HANDS AND KNEES OR ARE 5 MONTHS OF AGE, WHICHEVER OCCURS FIRST.**

General Toy Safety

- Keep toys intended for older children away from younger children — such toys may injure young children.
- Check all toys periodically for breakage and potential hazards — damaged or dangerous toys should be repaired or thrown away immediately.
- Store toys safely — teach children to put toys away so they are not tripping hazards. Check toy boxes and shelves for safety.

Where to Find Toys Suitable For Your Child:

- If your child is an infant age 6 months or younger, go to page 6.
- If your child is an infant between 7 and 12 months, go to page 9.
- If your child is a 1 year old, go to page 13.
- If your child is a 2 year old, go to page 19.
- If your child is a preschooler age 3, 4 or 5 years, go to page 24.

ABILITIES AND INTERESTS

Young Infants 0 to 6 Months

PHYSICAL

- visual focus matures—follows objects with eyes.
- learns to localize sounds and turns to see.
- gains control of hands—learns to bat, then reach and grasp objects.
- discovers feet—brings feet to mouth and explores with feet.
- begins to sit with support.
- large muscle play may include rolling, scooting, rocking, bouncing.

MENTAL

- explores world with eyes and ears and begins to explore with hands and feet and mouth.
- enjoys creating effects in the environment by own actions.
- begins to recognize familiar people, objects and events—then to anticipate them.
- becomes aware of novelty and strangeness in

people, objects and events.

- develops definite preferences for certain people, objects and events.
- may imitate simple movements if in own repertoire.
- does one thing at a time.

SOCIAL

- special interest in people (faces and voices especially).
- begins to smile at faces, voices and mirror image.
- quits crying when sees face or hears voice.
- begins to seek attention and contact with people.
- distinguishes among familiar people and has preferences.
- begins to coo and gurgle, babble and laugh aloud, play with sounds.
- listens to voices and may imitate sounds already in own repertoire.

TOYS FOR YOUNG INFANTS—0 TO 6 MONTHS

ALL TOYS	ACTIVE PLAY	MANIPULATIVE PLAY
<p>Toys for this age are primarily for looking, listening, sucking, or fingering.</p> <p>Infants 0-2 months enjoy seeing and hearing interesting things.</p> <p>Infants 2-6 months show growing interest in touching, holding, batting, turning, shaking, kicking, mouthing and tasting objects.</p> <p>Infants like to see</p> <ul style="list-style-type: none"> • bright primary colors. • high contrast. • simple designs. • clear lines and features. • human face features (esp. eyes). • bull's eye pattern. <p>Infants enjoy watching hanging objects or 'mobiles' that move by wind, wind-up action, or infant's own activity.</p> <p>Toys for watching should be suspended only 8-14 inches (200-360 mm) from the infant's eyes and angled toward his/her eyes, then moved up out of reach when he/she can touch them.</p>	<p>Push and Pull Toys <i>not suited to age group</i></p> <p>Ride-On Toys <i>not suited to age group</i></p> <p>Outdoor or Gym Equipment infant swings (with adult supervision).</p>	<p>Construction Toys <i>from about 4 months</i></p> <ul style="list-style-type: none"> • soft blocks. <p>Puzzles <i>not suited to age group</i></p> <p>Pattern Making Toys <i>not suited to age group</i></p> <p>Manipulative Toys <i>from about 6-8 weeks</i></p> <ul style="list-style-type: none"> • simple rattles. • teethers. • light, sturdy cloth toys. • squeeze toys. • toys suspended above or to the side of infant for batting and grasping. <p><i>from about 4 months</i></p> <ul style="list-style-type: none"> • disks, keys on ring. • interlocking plastic rings. • small hand-held manipulables. • toys on suction cups. • crib gyms (children who can push up on hands and knees can strangle on crib gyms — be sure to remove crib gym from crib or playpen at this time).

TOYS FOR YOUNG INFANTS—0 TO 6 MONTHS (Cont'd)

ALL TOYS	ACTIVE PLAY	MANIPULATIVE PLAY
<p>Toys for watching are more appealing if they move and make noise (but movement should be slow and noise not too loud or sudden).</p> <p>Infants enjoy variety.</p> <p>Infants enjoy producing effects on toys by their own activity.</p> <p>Toys for holding should be light and easy to grasp.</p> <p>Mouthable toys should have all safety features recommended for infants</p> <ul style="list-style-type: none"> • no sharp points or edges • no small parts to be lodged in throat, ears, nose. • no electrical parts. • nontoxic materials. • no glass or brittle plastic. • no parts to entrap fingers, toes, hands. • no long strings. 	<p>Sports Equipment <i>from about 6-8 weeks</i></p> <ul style="list-style-type: none"> • clutch balls. • texture balls. • soft squeeze balls. <p>(All balls given to this age group should be at least 1-3/4 inches (44 mm) in diameter, however if any object appears to fit easily in the child's mouth keep it away from the child)</p>	<p>Dressing, Lacing, Stringing Toys <i>not suited to age group</i></p> <p>Sand and Water Play Toys <i>not suited to age group</i></p>

TOYS FOR YOUNG INFANTS—0 TO 6 MONTHS

MAKE-BELIEVE PLAY	CREATIVE PLAY <i>(arts crafts, music)</i>	LEARNING PLAY
<p>Dolls</p> <ul style="list-style-type: none"> • soft baby dolls, soft-bodied dolls, or rag dolls—all with molded (not loose) hair. <p>Stuffed Toys</p> <ul style="list-style-type: none"> • small plush animals. • music box animals (operated and monitored for safety by adults). • grab-on soft toys. <p>Puppets</p> <ul style="list-style-type: none"> • soft hand puppets (held and moved by adults). <p>Role-Play Materials</p> <ul style="list-style-type: none"> • mirrors (large, unbreakable) fastened to crib, playpen or wall (peak interest in mirrors 4-6 months). <p>Play Scenes (Including Small Figures) <i>not suited to age group</i></p> <p>Transportation Toys <i>not suited to age group</i></p> <p>Projectile Toys <i>not suited to age group</i></p>	<p>Musical Instruments <i>not suited to age group</i></p> <p>Art and Craft Materials <i>not suited to age group</i></p> <p>Audio-Visual Equipment (Adult Operated)</p> <ul style="list-style-type: none"> • records tapes or CDs (gentle regular rhythms lullabies). • music boxes. 	<p>Games <i>not suited to age group</i></p> <p>Specific Skill Development Toys <i>not suited to age group</i></p> <p>Books may enjoy listening to a story being read.</p>

ABILITIES AND INTERESTS

Older Infants 7 to 12 Months

PHYSICAL

- begins to sit alone.
- begins to creep and crawl onto or into things.
- begins to pull to a stand, cruise (walk holding furniture), and walk alone (10–16 months).
- interest in moving about and practicing motor skills.
- develops “pincer” (thumb and finger) grasp and begins to hold objects with one hand while manipulating them with the other.
- with objects wants to bang, insert, poke, twist, squeeze, drop, shake, bite, throw, open/shut, push/pull, empty/fill, drag along.
- enjoys bath play—kicking and splashing.

MENTAL

- interest in appearing and disappearing (objects and people)—develops “object permanence” (looks for object out of sight at approximately 11 months).
- interest in container/contained relationship—likes to empty cupboards, drawers, and containers of objects.

- interest in letting go and dropping objects (will use string to pull back vanished objects).
- interest in exploration and likes many objects to explore.
- likes to operate simple mechanisms (open/shut, push/pull) and create effects.
- remembers people, objects, games, actions with toys—shows persistence and interest in novelty.
- beginning interest in picture books.

SOCIAL

- may fear strangers or react to change—plays best with familiar person nearby.
- watches and may imitate others.
- sensitive to social approval and disapproval.
- interest in getting attention and creating social effects.
- enjoys simple social games “peek-a-boo,” “bye-bye”.
- babbles and plays with language—may try to imitate sounds.
- recognizes own name and may begin to point to named objects or obey simple commands.

TOYS FOR OLDER INFANTS—7 TO 12 MONTHS

ALL TOYS	ACTIVE PLAY	MANIPULATIVE PLAY
<p>Infants 7-9 months interested in longer and more extensive exploration of toys. Infants of this age like to</p> <ul style="list-style-type: none"> • bang • insert • poke • twist • squeeze • drop • shake • bite • throw • open and shut • empty and fill <p>Infants 10-12 months show beginning interest in object mastery and like many objects to explore. Infants of this age like</p> <ul style="list-style-type: none"> • stacking. • putting in and taking out. • pouring out. • fitting one object into another. • opening and closing. • pressing levers. • turning things (not unscrewing yet). • pushing balls and cars. 	<p>Push and Pull Toys push toys without rods (simple cars, animals on wheels or rollers).</p> <p>Ride-On Toys <i>not suited to age group</i></p> <p>Outdoor or Gym Equipment infant swings (with adult supervision). soft low climbing platform for crawlers.</p>	<p>Construction Toys soft blocks. rubber blocks. rounded wood blocks.</p> <p>Puzzles <i>from about 10 months</i> brightly colored, lightweight crib and playpen puzzles (2-3 pieces).</p> <p>Pattern-Making Toys <i>not suited to age group</i></p> <p>Manipulative Toys teethers. light sturdy cloth toys. toys on suction cups. small, hand-held manipulables. disks/keys on rings. squeeze-squeak toys. roly-poly toys. activity boxes and cubes. pop-up boxes (easy operation). containers with object to empty and fill.</p>

TOYS FOR YOUNG INFANTS—7 TO 12 MONTHS (Cont'd)

ALL TOYS	ACTIVE PLAY	MANIPULATIVE PLAY
<p>Generally, infants in this age range are interested in</p> <ul style="list-style-type: none"> • operating simple mechanisms. • containers and the container/container relationship. • appearing and disappearing objects. <p>As at earlier ages infants enjoy producing effects by their own actions.</p> <p><i>Toys for infants</i></p> <ul style="list-style-type: none"> • safe for mouthing. • non-toxic materials. • no sharp points or edges. • nonbreakable, no glass or brittle plastic. • no small parts to be lodged in throat, ears, nose. • no parts to entrap fingers toes, hand. • no long strings. 	<p>Sports Equipment transparent balls chime balls flutter balls action balls</p> <p>(All balls given to this age group should be at least 1-3/4 inches (44 mm) in diameter, however if any object appears to fit easily in the child's mouth, keep it away from the child.)</p>	<p>large rubber or plastic pop beads. simple nesting cups. stacking ring cones (<i>few rings and safe stick</i>). graspable (unbreakable) mirror toys which can be held and played with. loses interest in crib gyms and toys suspended above when can sit up and move about (crib gyms can create a strangulation hazard stop using when child can push up on hands and knees at about 5 months of age).</p> <p>Dressing, Lacing, Stringing Toys <i>not suited to age group</i></p> <p>Sand and Water Play Toys activity boxes for bath. simple floating toys.</p>

TOYS FOR YOUNG INFANTS—7 TO 12 MONTHS

MAKE-BELIEVE PLAY	CREATIVE PLAY (arts crafts music)	LEARNING PLAY
<p>Dolls</p> <ul style="list-style-type: none"> • soft baby dolls soft-bodied dolls, or rag dolls—all with molded (not loose) hair. <p>Stuffed Toys</p> <ul style="list-style-type: none"> • small plush animals. • music box animals (operated and monitored for safety by adult). • grab or soft toys. • big soft toys for hugging and roughhousing. <p>Puppets</p> <ul style="list-style-type: none"> • soft hand puppets—child may handle but must be operated as puppets by adult <p>Role Play Materials low wall-mounted mirrors to see self sit, creep, crawl, etc.</p> <p>Play Scenes (Including Small Figures) <i>not suited to age group</i></p> <p>Transportation Toys simple push cars (one-piece).</p> <p>Projectile Toys <i>not suited to age group</i></p>	<p>Musical Instruments</p> <ul style="list-style-type: none"> • rubber or wood blocks that rattle or tinkle. <p>Art and Craft Materials <i>from about 12 months</i></p> <ul style="list-style-type: none"> • large paper. • large crayons for scribbling. <p>Audio-Visual Equipment (Adult Operated)</p> <ul style="list-style-type: none"> • records, tapes, or CDs (simple songs, lullabies, music with simple rhythms). • music boxes. 	<p>Games <i>not suited to age group</i></p> <p>Specific Skill Development Toys <i>not suited to age group</i></p> <p>Books</p> <ul style="list-style-type: none"> • cloth books. • plastic books. • small cardboard books. <p><i>Note Some children enjoy “lap reading” (being read to) from this age onward. When adult-held, paper picture books are appropriate.</i></p>

ABILITIES AND INTERESTS

Young Toddlers (1 Year Olds)

PHYSICAL

- endless exercise of physical skills.
- likes to lug, dump, push, pull, pile, knock down, empty and fill.
- likes to climb—can manage small indoor steps.
- manipulation is more exploratory than skillful.
- active interest in multiple small objects.
- by 2 years, can kick, catch a large ball.
- by 2 years, can string large beads, turn knob, use screw motion. (All beads given to this age group should be at least 1-3/4 inches (44 mm) in diameter, however, if any object appears to fit easily in the child's mouth, **keep it away from the child.**)

MENTAL

- interest in causing effects.
- interest in mechanisms and objects that move or can be moved—prefers action toys.
- combines objects with other objects—makes simple block structures, uses simple stacking toys, does simple puzzles.

- very curious—constant experimentation with objects.
- interest in hidden-object toys.
- at 1½ to 2 years, groups/matches similar objects—enjoys simple sorting toys.
- identifies objects by pointing—can identify pictures in book.
- enjoys water, sand play.
- makes marks on paper, scribbles spontaneously.
- first imitative play—imitation of adult tasks, especially caretaking and housekeeping tasks.

SOCIAL

- most solitary play—relates to adults better than to children.
- tries to do adult tasks.
- expresses affection for others—shows preference for certain soft toys, dolls.
- likes being read to, looking at picture books, likes nursery rhymes.
- by 1½, enjoys interactive games such as tag.

TOYS FOR YOUNG TODDLERS—1 YEAR OLDS

ALL TOYS	ACTIVE PLAY	MANIPULATIVE PLAY
<p>Children prefer action toys, toys that produce movement or sounds by child's own efforts</p> <ul style="list-style-type: none"> • toys need not be highly detailed but should be realistic looking. • toys should be lightweight for easy lifting carrying • bright colors preferred. <p>In play child always on the move—large muscle activities such as running, climbing dominate over small muscle activities such as exploring objects constructing.</p> <p>Child beginning to combine put together objects.</p> <p>Beginning of imitative play.</p>	<p>Push and Pull Toys</p> <ul style="list-style-type: none"> • push toys with rods (rods with large handles on ends). • toys to push on floor—simple sturdy with large wheels. • special noise and action effects. • for steady walkers pull toys on strings (broad-based to tip less easily). <p><i>from about 1½</i></p> <ul style="list-style-type: none"> • simple doll carriages. • wagons — low open big enough for child to get in. • small rocking horses—confined rocking arc, stout handles rather than reins knee height on child. <p>push/pull toys filled with multiple objects.</p> <p>Ride-On Toys</p> <ul style="list-style-type: none"> • ride-ons propelled by pushing with feet—no pedals • stable ride-ons—4 or more wheels wheels spaced wide apart child's feet flat on floor when seated. • ride-ons with storage bins. • ride-ons that make noise, look like animals 	<p>Construction Toys</p> <ul style="list-style-type: none"> • small lightweight stacking blocks (15–25 pieces). <p><i>before 1½ most interlocking mechanisms are too difficult</i></p> <p><i>from around 1½</i></p> <ul style="list-style-type: none"> • solid wooden unit blocks (20-40). • large hollow building blocks. • large plastic bricks (2–4 inches or 50–100 mm) to press together. <p>Puzzles</p> <ul style="list-style-type: none"> • simple pre-puzzles or form boards — 2–3 pieces each piece a familiar shape. <p><i>from around 1½</i></p> <p>3-5 piece puzzles with knobs easier to use (knobs firmly attached).</p> <p>Pattern-Making Toys</p> <p>peg board with a few large pegs.</p> <p>Manipulative Toys</p> <ul style="list-style-type: none"> • activity boxes attached to crib or playpen or freestanding—simple action mechanisms (doors, lids, switches). • hidden object toys. • simple pop-up toys operated by pushing a button or knob. • nesting cups—round shape few pieces. • simple stacking toys—few pieces no order necessary. • shape sorters—a few common shapes.

ABILITIES AND INTERESTS

Older Toddlers (2 Year Olds)

PHYSICAL

- skilled at most simple large muscle skills.
- lots of physical testing—jumping from heights, climbing, hanging by arms, rolling, galloping, somersaults, rough-and-tumble play.
- throws and retrieves all kinds of objects
- pushes self on wheeled objects with good steering.
- by 2½ to 3 years, good hand and finger coordination.
- lots of active play with small objects—explores different qualities of play materials.

MENTAL

- interested in attributes of objects—texture, shape, size, color.
- can match a group of similar objects.

- plays with pattern, sequence, order of size.
- first counting skills.
- first creative activities (drawing, construction, clay)—process still more important than final product.
- beginning to solve problems in head.
- imaginative fantasy play increases—continued interest in domestic imitation.
- fantasy play alone or with adult—child also makes toys carry out actions on other toys.

SOCIAL

- main interest still in parents, but begins to play cooperatively with other children (especially 30 to 36 months).
- uses language to express wishes to others.
- engages in game-like interactions with others—also some pretend play with others.
- enjoys hearing simple stories read from picture books, especially stories with repetition.
- strong desire for independence—shows pride in accomplishment.

<p>Role-Play Materials</p> <ul style="list-style-type: none"> • dress-ups and costumes. • equipment should be realistic-looking. • child-sized equipment — stove, cooking board, refrigerator. • doll equipment. • all housekeeping equipment — cleaning sets, pots and pans, bath and laundry. • toys that can be pushed — vacuum, lawnmower, shopping cart. • full-length mirror. <p>Play Scenes</p> <ul style="list-style-type: none"> • familiar, realistic-looking scenes — farm, garage, airport. • scenes with multiple pieces but not highly detailed. • preference for moving parts, parts that make noise. • interior of scenes easily accessible. • vehicle sets with figures. <p>Transportation Toys</p> <ul style="list-style-type: none"> • small, realistic cars (not metal). • vehicles with moving parts. • large trucks (metal too heavy) -- moving parts, parts operated by large lever (with knob on end). • cars, trucks with removable figures, accessories. • small trains with simple coupling mechanism — no tracks. <p>Projectile Toys <i>not suited to age group</i></p>	<p>Audio-Visual Equipment</p> <ul style="list-style-type: none"> • operated by adult, tapes, records, CDs. • hand-cranked music box if crank is large and easy to turn. 	<p>Books</p> <ul style="list-style-type: none"> • sturdy books with heavy paper, cardboard pages. • short simple stories with repetition and familiar subjects. • simple pictures with clear color, few details. • pop-up books. • <i>hidden picture</i> books. • dressing books.

ABILITIES AND INTERESTS

Preschoolers 3,4 and 5 Years

PHYSICAL

- runs, jumps, climbs, balances with assurance — by 5, gross motor skills are well developed.
- likes risks, tests of physical strength and skill — loves acrobatics and outdoor equipment.
- increasing finger control — can pick up small objects, cut on a line with scissors, hold pencil in adult grasp, string small beads (Most children in this age group can begin using toys with smaller components. If child is still mouthing objects, select toys without small parts.)
- expert builder — loves small construction materials and also vigorous activity with big blocks, large construction materials.
- by 5, rudimentary interest in ball games with simple rules and scoring.

MENTAL

- familiar with common shapes, primary colors.
- interest in simple number activities, alphabet play, copying letters, matching/sorting.
- by 5, sorts and matches using more than one quality at a time.

- around 4, begins to be purposeful and goal-directed, to make use of a plan.
- interest in producing designs, including puzzles, and in constructing play worlds.
- first representational pictures.
- prefers realism.
- interest in nature, science, animals, time, how things work.
- peak interest in dramatic play — recreates adult occupations, uses costumes and props.

SOCIAL

- beginning to share and take turns, learning concept of fair play.
- by 5, play is cooperative, practical, conforming.
- interested in group pretend play.
- not ready for competitive play because hates to lose.
- enjoys simple board games based on chance, not strategy.
- more sex differentiation in play roles, interests.
- enjoys looking at books and listening to stories from books.
