INTRODUCTION

Consumer Sentinel Leading Partners & Data Contributors

Consumer Sentinel is a secure automated consumer complaint database developed by the Federal Trade Commission (FTC), in cooperation with its law enforcement partners, to collect and make available investigative information about consumer fraud and deception. Currently, the Consumer Sentinel database includes over **4.3 million** complaints received by the FTC and other data contributors. The collected investigative information is accessible to federal, state, and local law enforcement agencies in the United States, Canada, and Australia through a secure, password-protected Web site. Between January 1999 and December 2007, more than 125 organizations contributed data to Consumer Sentinel. More information on this joint project is available at www.consumer.gov/sentinel.

During calendar year 2007, Consumer Sentinel received over **835,000** complaints – 258,000 identity theft complaints and 577,000 fraud-related complaints. Fifteen percent of the fraud-related complaints were cross-border fraud-related. The following are a series of statistical reports from the Consumer Sentinel database presenting information about cross-border fraud-related complaints. For the purposes of this report, a fraud complaint is “cross-border” if: (1) a U.S. consumer complained about a company located in Canada or another foreign country; (2) a Canadian consumer complained about a company located in the U.S. or another foreign country; or (3) a consumer from a foreign country complained about a company located in the U.S. or Canada. Company location is based on addresses reported by the complaining consumers and, thus, likely understates the number of cross-border complaints. In some instances the company address provided by the consumer actually may be a mail drop in the consumer’s country rather than the physical location of the company in a foreign country, and in other cases, the consumer does not know whether the location is in the U.S. or abroad. Please also note that we continue to add data provided by various organizations, which may contain complaint data from previous months. This may retroactively change some totals and percentages on our graphs and charts.

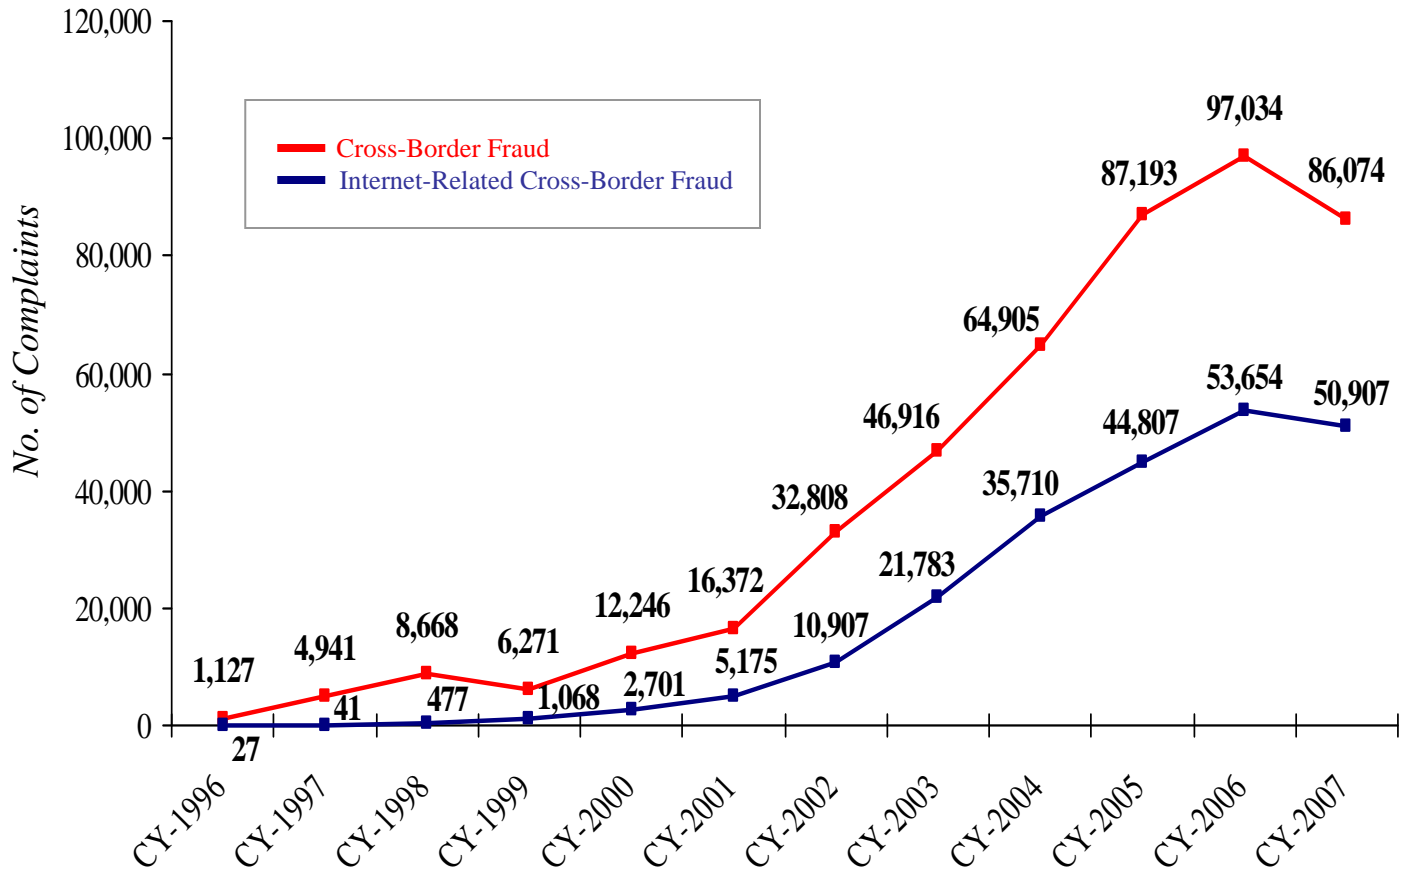

Please note: This report is not based on a survey; the complaint figures presented are derived from self-reported and unverified consumer complaints contained in the FTC's database.

Appendix A1: The Sentinel Network

The Identity Theft Data Clearinghouse was launched in November 1999 and is the sole national repository of consumer complaints about identity theft. The Clearinghouse provides specific investigative material for law enforcement and broader reports that provide insight to both private and public sector partners on ways to reduce the incidence of identity theft. Information in the Clearinghouse is available to law enforcement members via Consumer Sentinel, the secure, password-protected government Web site. This access enables law enforcers to readily spot identity theft problems in their own backyards, and to coordinate with other law enforcement officers where the data reveals common schemes or perpetrators.

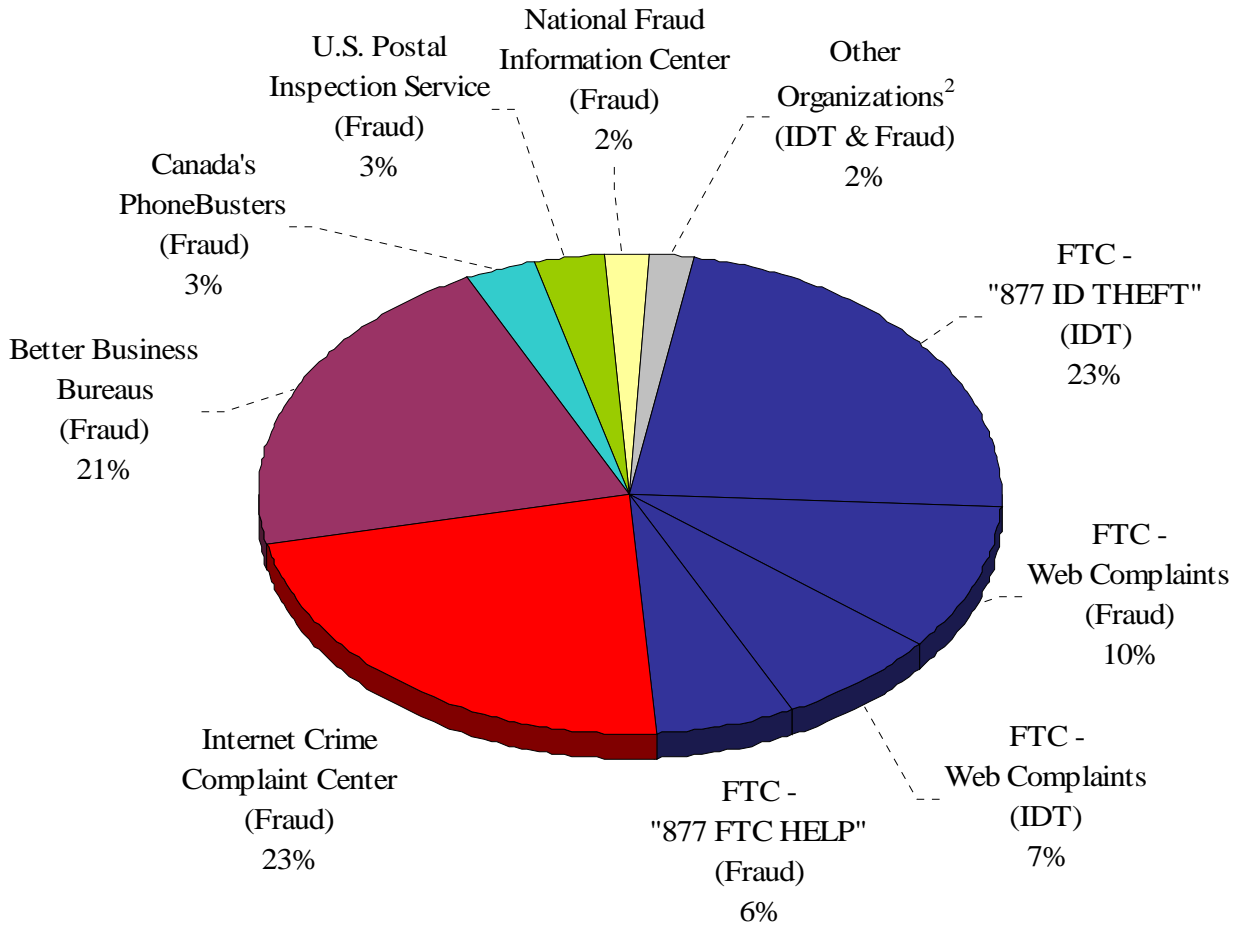

Econsumer.gov was created in April 2001 to gather and share cross-border e-commerce complaints in order to respond to the challenges of multinational Internet fraud, and enhance consumer confidence in e-commerce. The multilingual public Web site provides general information about consumer protection in all countries that belong to the International Consumer Protection and Enforcement Network, contact information for consumer protection authorities in those countries, and an online complaint form. All information is available in English, French, German, Korean, Polish, and Spanish. Using the existing Consumer Sentinel Network, the incoming complaints are shared through the government Web site with participating consumer protection law enforcers from 23 nations.

Military Sentinel, which was established in September 2002, is a project of the Federal Trade Commission and the Department of Defense to identify and target consumer protection issues that affect members of the United States Armed Forces and their families. Military Sentinel also provides a gateway to consumer education materials covering a wide range of consumer protection issues, such as auto leasing, identity theft, and work-at-home scams. Members of the United States Armed Forces can enter complaints directly into Consumer Sentinel. Through Consumer Sentinel, the secure password-protected government Web site, this information is used by law enforcement agencies, members of the JAG staff, and others in the Department of Defense to help protect armed services members and their families from consumer protection-related problems.
