GSA/OGP/ MA	Not Assigned	Proposed Rule - Revising FPMR in the FMR - updates the policies to reflect GSA's change to Proposed Rule Supply and Procurement	April 30, 2013	GSA is proposing to amend the FPMR by revising coverage on Government property management policies, and moving it into the FMR at 41 CFR chapter 102. The rule updates the policies previously contained in the FPMR to reflect GSA's change to non-mandatory status for most of its products and services. Additionally, GSA has determined that there is no longer a need to address certain topics as many provisions in the FPMR describe how to perform certain functions, and the FMR and the Federal Acquisition Regulation now address current policies, previously addressed in the FPMR.	Reviewing what sections need to be retained; will propose to discard the rest.	No notes.

GSA/OGP/ MV	RIN 3090-AI81	GSAR Case 2008-G509, Rewrite GSAR Part 536, Construction and Architect-Engineer Contracts	March 31, 2013	Cost savings and reduced information collection burdens may be identified during current internal reviews of the draft proposed rule or through public participation. GSA will infuse additional advocacy into the rewrite team to ensure the requirements of E.O. 13563 and associated implementation guidance are satisfied.	An initial proposed rule was published on December 2, 2008, at 73 FR 73199. Since the initial publication in 2008, the draft rewrite of Part 536 has been revised extensively to address policy and clause requirements. Therefore, it will be necessary to republish this proposed rule to reflect the changes. The Part 536 rewrite effort encompasses both the GSAR and GSAM. Current internal discussions include the affect of OFPP Policy Letter 11-01 on A-E selection boards and the Construction Manager as Constructor (CMc) delivery method.	Planned analyses and discussions will include the PBS programs for Design Excellence, Construction Excellence, and Art-in-Architecture.

GSA/OGP/ MA	RIN 3090- A194	Final Rule - FTR Case 2009-306, Reporting Requirements for Relocation and Temporary Duty Travel	Placed in Pending Status	<p>This rule defines a process for collecting transaction-level data regarding relocation of Federal civilian employees. Specifically, this rule would require agencies that spend more than \$5 million per year on travel and relocation to send transaction-level data on relocation to GSA at least quarterly. GSA will store this data in a data warehouse that the agencies will be able to query to answer operational, managerial, and policy questions. In addition to the transaction-level reporting process, this proposed rule would also establish an annual reporting requirement for data regarding employee relocation and would modify the existing requirement for large agencies to collect and report data on TDY on an annual basis, instead of biennially.</p>	<p>This rule is placed in pending status as we work with agencies to determine the cost/burden of providing the required transaction-level data.</p>	No notes.

It contains updated regulatory policies originally found in the FPMR. All policy is being migrated from the FPMR to the FMR because the FMR coverage is written in plain language to provide agencies with updated regulatory material that is easy to read and understand. Placed in a pending status as we are currently going through Legal Counsel review to resolve conflict in definition of GFP between 40 USC and FAR.	No notes.
