*2010	N/A	N/A	N/A	N/A	N/A	N/A	N/A

\*Afghanistan Health Initiative (AHI) was PARTed/reassessed in 2008 and the United States-Mexico Border Health commission (BHC) was last PARTed in 2008. AHI and Health Diplomacy will be moving to CDC for FY 2010 and to be completed by FY 2011. OGHA has worked with OMB and has changed the performance measures to reflect more accurate measures and outputs and reflect program performance. Health Diplomacy Initiative Performance Targets are currently being developed.

# **United States-Mexico Border Health commission (BHC)**

The United States México Border Health Commission (USMBHC), established as a binational entity in 2000, provides international leadership to optimize health and quality of life along the United States—México border. Its primary goals are to institutionalize a U.S. domestic focus on border health, and create an effective binational venue to address the public health challenges that impact border populations in sustainable and measurable ways. The USMBHC facilitates identification of public health issues of mutual significance; supports studies and research on border health; and, brings together effective federal, state and local public/private resources by forming dynamic partnerships and alliances to improve the health of the border populations through creative, multi-sectoral approaches. The Office of Global Health Affairs is the Secretary's focal point of coordination for the USMBHC; and the HHS Secretary is the Commissioner for the U.S. Section.

The USMBHC promotes (1) sustainable partnerships which engage international, federal, state and local public health entities in support of annual initiatives around critical border health priorities that for 2010 that will focus on tuberculosis, obesity and diabetes and infectious disease as impacted by public health emergencies; (2) leads the development of a comprehensive border health research agenda that will inform policy makers, researchers and entities which fund research where research gaps, needs and

opportunities lay; (3) hosts the annual National Infant Immunization Week/Vaccination Week of the Americas (NIIW/VWA) that promotes the benefits of infant immunization in a regional and binational approach unmatched by any region anywhere in either country and the annual Border Binational Health Week events along the entire U.S.-México border, which bring together local communities for health screenings, health education interventions and other unique training and education forums. In FY 2009 for Border Binational Health Week, the USMBHC helped to host 120 events along both sides of the border, engaging over 300 partners, and providing over 43,000 free health screenings and educational opportunities to U.S. and México border residents (U.S. side nearly 21,000 and México side nearly 22,000), reflecting a composite of various resources (including financial and in-kind support) from federal, State, local and community stakeholders.
