¹ Data for the United States and Canada are based on the 2002 North American Industry Classification System (NAICS). ² Break in series between 2000 and 2010. ³ Includes hunting. ⁴ Includes manufacturing, mining, and construction. ⁵ Transportation, communication, public utilities, trade, finance, public administration, private household services, and miscellaneous services. ⁵ Civilian employment as a percent of the civilian working-age population.

## Table 1371. Educational Performance: 2008 and 2009

[Tertiary-type A includes education leading to a BA, Master's, or equivalent degree, and advanced research programs. Performance figures were gathered from the Program for International Student Assessment (PISA), an internationally standardized assessment jointly developed by participating countries, which takes place in 3-year cycles. To implement PISA, each of the participating countries selects a nationally representative sample of 15-year-olds, regardless of grade level. Tests are typically administered to between 4,500 and 10,000 students in each country]

Country	reading,	erformance on the con scientific, and mathem teracy scales, 2009	Educational attainment of adult population and current graduation rates, 2008 (percent)		
	Mean score on the combined reading literacy scale 1	Mean score on the mathematical literacy scale <sup>2</sup>	Mean score on the scientific literacy scale <sup>3</sup>	Upper secondary or higher attainment (25 to 64 years old) <sup>4</sup>	Tertiary-type A attainment (25 to 64 years old) <sup>5</sup>
