CDS Announcement

SEEDING MDS-SERIALS RECORDS WITH ISSN-L

Subscribers to MDS-SERIALS will receive an increased number of updated records beginning with volume 37, issue 50 (Dec. 15, 2009) and lasting for several months. The records are being updated by OCLC, Inc. to add linking ISSNs (MARC 21 field 022 \$1) based on data from the ISSN International Centre in Paris. It is expected that approx. 500,000 MDS-Serials records may be updated as part of this process.

Questions regarding these records should be directed to:

John Levy, Automated Operations Coordinator
U.S. and Publisher Liaison Division
