Notes

1. The letter ᱼ is used with “checked” (voiceless) consonants and indicates a change in pronunciation. It is written following four consonants only, the letters ᱩ, ᱫ, ᱮ, ᱪ, which are romanized *g*, *j*, *d*, and *b* respectively.
2. The mark [·] (a dot written above the line after a vowel) is used to indicate nasalization and is romanized as *ñ* after the vowel it modifies. Another mark, _· (written below the line after the vowel it modifies) is used to indicate low pitch and is omitted in romanization.

Other Marks Used in OI Script

1. The mark \sim , written over a letter, is used to indicate the prolongation of a vowel. It is omitted in romanization.
2. The mark $\bar{\text{~}}$ (similar to a hyphen) is used to separate “checked” consonants from other consonants or vowels. It is omitted in romanization.
