NOTE: Veteran may report more than one health condition. The total "Responding on Item" is larger than the sum of the groups because some veterans did not indicate their age. * Low precision and/or sample size for the denominator between 30 and 59 ; N/A: Standard Errors not available when estimate is equal to $0 \%$ or $100 \%$

NOTE: Veteran may report more than one health condition. Priority groups were determined by classifying the self-reported data of all respondents according to VA health care enrollee criteria and are not limited to actual VA enrollees. The total "Responding on Item" is larger than the sum of the groups because insufficient data were available to determine a priority group for some respondents. * Low precision and/or sample size for the denominator between 30 and 59
