[X] Approved under the Civil Service Retirement System, 5 USC 8336(c)

[X] Approved under the Federal Employees Retirement System, 5 USC 8412(d)

Category of Coverage: Secondary/Administrative (FF)

Bureau: Bureau of Indian Affairs – Bureau wide

Classification Title: Range/Forestry Technician

Organization Title: Fire Prevention Technician

Position Number: F319-BIA Series and Grade: GS-0455/0462-04/05/06

**RECOMMENDATION FOR COVERAGE REVIEW:**

Secondary administrative coverage under both CSRS and FERS is recommended for this position.

The position has administrative duties in an organization having a firefighting mission. The primary purpose of the position is to participate in the management and operation of a Fire Prevention Program, including conducting preliminary fire investigation on wildland fires. Assists in the development and maintenance of Wildland Fire Prevention Planning and Analysis Program. Position requires knowledge of fire suppression strategy, tactics, fire behavior, fuels models, fire weather, ISC and firefighting tools and equipment.

The position requires prior firefighting experience and is clearly in an established career path.

This position is being restructured to the lower grade indicated above to permit planned training and progression in the duties and responsibilities set forth in the attached full performance level position description.

Incumbent serves in a training capacity and may not be expected to perform the entire scope of duties as described. Assignments are given to prepare the incumbent to eventually acquire the knowledge expected at the full performance level. They will typically combine productive work with on-going training and instruction as appropriate and will relate to the objective of attaining full performance on the job. Incumbent will be given less responsibility at first and work will be more closely reviewed. The more difficult assignments may be screened by the supervisor so that lesser degree of judgment is expected of the incumbent. Complexity of work may be increased by the supervisor and supervisions received may gradually decrease as experience and competence are developed by the incumbent.

Performance will be evaluated with the appropriate status of training in mind.

NOTE: At the discretion of management, incumbent may be non-competitively promoted to the established next higher level provided: 1) the target position is still properly classifiable to its present title, series, and grade at the time of the proposed promotion, 2) the incumbent is certified in writing to have advanced to and to be performing at the level appropriate to the high grade, and 3) the incumbent meets all regulatory and qualification requirements for such promotion.

(Fire Prevention Technician)

## STANDARD POSITION DESCRIPTION

### INTRODUCTION

This is a standardized wildland fire management position description intended for use in the Bureau of Indian Affairs (BIA). The position is located in an initial attack fire suppression organization where the incumbent performs a variety of staff, technical and administrative duties relating to fire suppression activities and the support of fire management programs. The primary purpose of this position is to serve as a Fire Prevention Technician within the Bureau of Indian Affairs Fire Management Program. Primary responsibilities are a combination of fire prevention, fire investigation, public fire education, hazard mitigation, training, suppression and prescribed fire. ←

During suppression of wildfires and prescribed fires both within and outside the agency jurisdiction, the incumbent assists in the direction of fire line activities of a number of ground and possibly air units assigned to the incident. The incumbent participates in the management and operation of the Fire Prevention Program, conducts preliminary fire investigation on wildland fires within the agency boundaries and performs incidental duties on project work assignments. ←

Prior wildland firefighting experience is required to carryout the duties and responsibilities of this position. ←

### MAJOR DUTIES (55%)

Assists in the development and maintenance of the Wildland Fire Prevention Planning and Analysis Program. Assures the plan is reviewed and updated as appropriate to meet the objectives of the local unit.

While on prevention patrols or assigned to a fixed station, establishes contact with forest and rangeland users, visitors, and local residents. Appraises on fire danger, advises on precautions to take to prevent occurrence of destructive fires, and explains pertinent laws and regulations. Inspects permitted use areas, recreation areas, dumps, timber harvest areas, construction sites, and other locations having concentrations of people and activities where person-caused fire ignitions are most probable. Ensures compliance with applicable Federal, Tribal and local government fire laws and regulations. Requires corrective actions, prepares written reports of observed hazardous conditions, and reports instances of non-compliance to the supervisor.

When not performing fire prevention duties, performs work in support of wildland fire management and resource management activities.

Other (45%)

Responsible for preparing routine day-to-day work plans. Issues campfire, debris, welding and other miscellaneous burning permits.

Distributes and explains fire prevention literature, posts signs, issues permits for allowed uses requiring permits. Enforces use restrictions and area closures during critical fire periods. Participates in investigations of man-caused fires. Collects and preserves evidence and information for use in apprehension and conviction of violators.

FACTORSFactor 1, Knowledge Required by the Position

Prior firefighter experience as gained by substantial service as a wildland firefighter is a mandatory prerequisite.

Knowledge of fire suppression strategy, tactics, fire behavior, fuels models, fire weather, Incident Command System, and firefighting tools and equipment. ←

Knowledge of the Wildland Fire Prevention and Planning Analysis Program.

Knowledge of standard range or forestry practices and methods in order to carry out technical assignments in fire prevention.

Knowledge of the more commonly applicable fire prevention laws and regulations in order to observe infractions and take appropriate corrective action.

Knowledge of fire prevention plans in order to adjust operations in conformance with plans which differ as the fire danger changes.

Knowledge of investigative procedures in order to observe and preserve physical evidence of involuntary and voluntary fire ignitions and to obtain statements of witnesses.

Factor 2, Supervisory Controls

The work supervisor and fire prevention plan provide indication as to which activities need emphasis during the course of the fire season.

Most activities are accomplished with considerable independence, with decisions evaluated on the basis of resulting effectiveness, feedback from contacts made, and community acceptable of prevention effects.

Completed work is reviewed for technical adequacy and adherence to instructions.

### Factor 3, Guidelines

Written guidelines consist primarily of the fire prevention plan, supplemented by information on applicable laws and regulations, and by special instructions.

The employee is expected to use judgment in selecting the appropriate guides depending upon situations encountered. The employee must also use judgment in recognizing situations which should be referred to the supervisor.

### Factor 4, Complexity

The work includes a variety of fire prevention operations from acting purely as a host to advising public users of non-compliance with regulations.

Decisions as to what must be done depend, to a considerable degree, on the analysis of the situation and issues involved, with the selected course of action chosen from several options.

The work involves conditions and elements which must be identified and analyzed to discern interrelationships.

### Factor 5, Scope and Effect

The work involves tasks directly related to assuring user activities are in accordance with laws and regulations. This is accomplished through interpersonal contacts with individuals. The work directly affects the prevention of human-caused wildland fires.

### Factor 6, Personal Contacts

Contacts are with members of the general public who frequently are not aware of the role and authority of the employee.

### Factor 7, Purpose of Contacts

The purpose of the contacts is to encourage individuals to participate in the prevention of human-caused fires and to comply with a variety of rules and regulations. Persons contacted are generally cooperative and typically comply with rules and regulations when advised of potential or actual instances of non-compliance. The employee must use tact in approaching individuals in order to obtain desired positive effects.

### Factor 8, Physical Demands

The work varies from sedentary to physically demanding. Physical demands consist of walking or hiking in flat to rough and mountainous terrain. During times of fire emergencies long working hours may be required.

The incumbent must have the ability to deal effectively with individuals and groups representing widely diverse backgrounds, interests and points of view.

### Factor 9, Work Environment

The incumbent may be required to inspect going wild fires from the ground. Access to the fire may be by aircraft, truck or on foot. Air and ground travel around wild fires is at best hazardous and at times may involve a high degree of risk. Personal safety precautions as would normally be required in operating pickup trucks, walking in campgrounds or construction sites, etc. is involved.

Remarks (As appropriate, desk audit findings, or other considerations not previously documented which affect final grade):

This is a standard position description for a Range/Forestry Technician for use in the Bureau of Indian Affairs. The position is located in an initial attack fire suppression organization where the incumbent performs a variety of staff, technical and administrative duties relating to fire suppression activities and the support of fire management programs. The primary purpose of this position is to serve as a Fire Prevention Technician within the Bureau of Indian Affairs Fire Management Program. Primary responsibilities are a combination of fire prevention, fire investigation, public fire education, hazard mitigation, training, suppression and prescribed fire.

The Range/Forestry Technician, GS-455/462 series (TS III, 12/91) covers positions that primarily require a practical knowledge of the methods and techniques of range/forestry and other biologically based resource management fields. Range/Forestry technicians provide practical technical support in the scientific management, protection, and development of rangeland and forest resources. Range/Forestry Technicians are most commonly found in first level units and are principally concerned with performing work supporting the implementation of projects and program goals. Depending upon the primary vegetation of the unit, this position is interchangeable with either classification being appropriate. Therefore, the proper title and series are Range Technician, GS-455 or Forestry Technician, GS-462, dependent upon the type of terrain and vegetation. The organization title for this position is Fire Prevention Technician.

The range/forestry technician duties are evaluated by the Grade Level Guide for Aid and Technical Work in the Biological Sciences, GS-400, (TS-II, 12/91), which is in FES format.

Final Determination: Range/Forestry Technician, GS-455/462-06.
