APR 2 0 1987

From: Commanding Officer, Marine Corps Air Station, New River

To: Commanding General, Marine Corps Base, Camp Lejeune, North Carolina

(Attn: Public Works Officer)

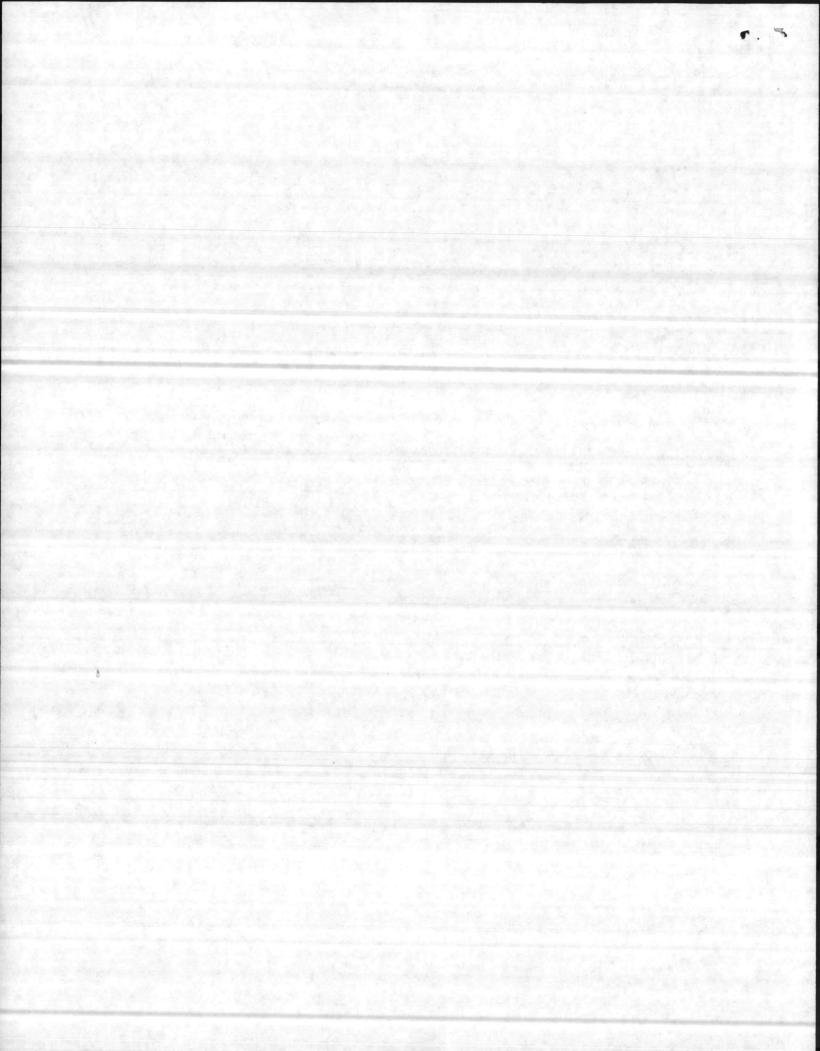

Subj: EXCESSIVE MOISTURE IN BUILDING AS-207

Ref: (a) COMCABEAST/MARCORBASE, Camp Lejeune support agreement for MCAS, New Eiver revised April 1985

- 1. Your assistance is requested, in accordance with the reference, in evaluating a moisture problem at AS-207 and providing recommendations and cost estimates for resolutions.
- 2. AS-207 is a covered recquerball facility. The roof and ventilation system were installed in 1982 under contract number 82-4605. The moisture problem began with the completion of that project. Special Services indicates that they have installed drain pipes on three sides without success.
- 3. Point of contact for additional information is Mr. F. E. Acosta, extension 6686 or Mr. Don Moore, extension 6229.

W. L. DRYER By direction
