✓ 12-26-83 - Collins called and said #2 pump at
MOQ will not come on automatic. But will
come on by hand. JRS

✓ 12-26-83 - A.S. White street over head tanks
over flowed - attitude valve did not work. JRS

12-26-83 - TT - 1545 - TT-2 school main water
break TT-4B. Emerg. Maint notified.

12-26-83 - 1600 - Steam plant operator at M.P. reported he had
only 30 lbs of pressure and that he was afraid he was going to have
to shut down steam plant. Campbell went to M.P. first thing
and reported to me that pressure at plant was normal and
that he could not find any leaks between plants. At 1815 I got
a call from Mr. Williams Central heating and he said his men
at M.P. said he was down to 22 PSI and would soon have to
shut down. Went to M.P. with Campbell - checked water plant
and it was ok (Elevated tank nearly full) went to steam
plant - they had 30 PSI and were running both softeners
full blast. I believe they were using about all the water they
could get through the lines.

Campbell was more worried about IT's water. They have
many small leaks in the ceiling of the Q's. I do
not know of any major leaks but with having^{with} TT-67 they
are having a problem. Campbell will keep me apprised of
any change.

MAY 1.2 1984 - Campbell reported that L. PARKER told him that the TT pool had been overfilled. He said he turned fill valve off at 1500. Campbell said pool had filled and run over instead of running out over flow (Mr. Campbell said over flow is too high.) Emergency maint called at 1630 and said they had reports of pool overflowing. I informed them we were aware of it and had taken care of the problem. (SP)
