5:30 pm	Meeting Wrap – up / Adjourn

Day 3, July 26, 2012

CurateCamp – South Ballroom; North 1; North 2; North 3

CurateCamp Processing: Processing Collections/Processing Data

Processing means different things to an archivist and a software developer. To the former, processing is about taking custody of collections, preserving context, and providing arrangement, description, and accessibility. To the latter, processing is about computer processing and has to do with how one automates a range of tasks through computation. When a cultural heritage organization's work is organized around processing digital objects, these two notions of processing intermingle. This CurateCamp unconference is intended to put these two notions of processing together in whatever ways can be imagined by the curators, archivists, librarians, scholars, software developers, computer engineers, and others that attend.

9:00 am	CurateCamp: Breakfast and Building the Agenda
10:00 am – 10:50 am	
11:00 am – 11:50 am	
Noon – 12:50 pm	Lunch and Open Sign Up Lightning Plenary Talks
