Dampening Roller Tubing

General Characteristics

The tubing is to be made of seamless knit material, lint free, for covering dampening rollers on offset presses. It is to be made for use on 3-1/2" (89 mm) to 4" (102 mm) rollers. Its quality should be equal to Seamol Brand Tubing material.

Physical Characteristics

Flat Width----- Approx. 5-5/8" (143 mm)

Size----- Size 'C' (Seamol Brand Size)

Sample Requirement

A sample of 3.5 yards (3.2 meters) is required with the bid unless bidder is bidding on material previously approved.

Qualified Products

Seamol Tubing and Brand #1 or Locke Knitted Specialties of Philadelphia, PA.
