To whom it concerns:

As a leading broadcast automation and advertising technology and software developer who has provided technologies and services for over 10 years to both Internet and Terrestrial broadcasters. The importance of our participation in the upcoming CRB hearings we believe is very vital to our own company's future. Not to mention the future of webcasting/internet broadcasting in general.

Many individuals and companies who currently webcast rely upon our and other similar companies' software technologies and services for their day to day operations as well as the very technologies and services that help monitor and provide reporting functionality for accountability of music and other relevant content performances.

It is our hope and desire that our participation may assist in the process of determining that there is a reasonable and effective royalty rate moving forward that will also allow the industry to positively grow and mature while assuring that all artists/musicians are indeed fairly compensated.

We understand that it is of the utmost importance and urgency that a royalty rate that is set be one that supports industry growth in a positive light for webcasters/broadcasters as well as sufficiently compensate all artists/musicians.

If an unbalanced or unaffordable rate is set that in turn creates a potential negative outcome for webcasters/internet broadcasters and or that rate also then inevitably forces many webcasters/broadcasters out of business. This of course in turn will more than likely directly and negatively impact us as a company and others like us, as we rely and depend on these very broadcasters currently as a significant source of our income. Not to mention a loss of potential additional royalties that would go towards compensating artists/musicians. None of which we wish to see happen.

With currently 25 employees whose very future could indeed rely upon the outcome of the upcoming CRB hearing. Spacial Audio Solutions wishes to respectfully submit our intent to participate in the upcoming CRB, which is to set to determine the royalty rate for 2011-2015.

Respectfully,

A handwritten signature in black ink that reads "Bryan Payne". The signature is written in a cursive style with a large, looped initial "B".
