Rep. Turner On Health Care:

- ★ There is no issue that affects Americans more deeply than access to affordable health care.
- ★ Access to reliable medical care is so important to all Americans and their families, that we must protect the ability of patients to select the doctor and health care plan of their choice.
- ★ Quality and affordable health care should:
 - Prohibit insurers from limiting coverage based on pre-existing conditions.
 - Invest in medical research to bring healthcare costs under control.
 - Make health insurance portable from job-to-job.
 - Allow small businesses to band together to negotiate for better health insurance rates for their employees.
 - Limit frivolous lawsuits which force doctors and hospitals to raise operating costs.
 - Allow for the deductibility of health insurance premiums.
 - Allow individuals to put tax-free dollars into Health Savings Accounts that may be used for lifetime medical expenses.
