Collection Summary

Title: Francis W. Reichelderfer Papers

Span Dates: 1918-1983

Bulk Dates: (bulk 1939-1967)

ID No.: MSS61564

Creator: Reichelderfer, Francis W. (Francis Wilton), 1895-1983

Extent: 3,150 items; 9 containers; 3.6 linear feet

Language: Collection material in English

Repository: Manuscript Division, Library of Congress, Washington, D.C.

Abstract: United States naval officer and meteorologist. Correspondence, memoranda, agendas, notes, speeches, writings, transcripts of radio broadcasts, interviews, biographical material, clippings, printed matter, photographs, and other papers pertaining primarily to Reichelderfer's career in meteorology as chief of the United States Weather Bureau.

Selected Search Terms

The following terms have been used to index the description of this collection in the Library's online catalog. They are grouped by name of person or organization, by subject or location, and by occupation and listed alphabetically therein.

Personal Names

Reichelderfer, Francis W. (Francis Wilton), 1895-1983.

Organizations

United States. Weather Bureau.

World Meteorological Organization.

Subjects

Meteorological satellites.

Meteorological services.

Meteorology--Research--United States.

Military meteorology.

Rain-making.

Typhoons--Thailand.

Weather.

Occupations

Meteorologists.

Naval officers.

Administrative Information

Provenance:

The papers of Francis W. Reichelderfer, United States naval officer and meteorologist, were given to the Library of Congress by his son, Bruce A. Reichelderfer, in 1983.

Processing History:

The papers of Francis W. Reichelderfer were arranged and described in 1991. The finding aid was revised in 2009.

Copyright Status:

The status of copyright in the unpublished writings of Francis W. Reichelderfer is governed by the Copyright Law of the United States (Title 17, U.S.C.).

Access and Restrictions:

The papers of Francis W. Reichelderfer are open to research. Researchers are advised to contact the Manuscript Reading Room prior to visiting. Many collections are stored off-site and advance notice is needed to retrieve these items for research use.

Preferred Citation:

Researchers wishing to cite this collection should include the following information: Container number, Francis W. Reichelderfer Papers, Manuscript Division, Library of Congress, Washington, D.C.

Biographical Note

<i>Date</i>	<i>Event</i>
1895, Aug. 6	Born, Harlan, Ind.
1917	A.B. in science, Northwestern University, Evanston, Ill.
1918	Ensign, United States Navy; stationed at the naval air station in North Sydney, Nova Scotia
1919	Served in Lisbon, Portugal, as naval meteorologist; provided weather information and forecasts for naval aircraft making the first transatlantic flights
1920	Promoted to lieutenant Married Beatrice Hoyle
1922-1928	Officer in charge, Naval Aerological Service, Washington, D.C.
1928-1931	Served on airship <i>Los Angeles</i> , Lakehurst, N.J.
1931	Postgraduate study at the Bergen Geophysical Institute, Norway
1936	Executive officer, naval air station at Lakehurst, N.J.; served as observer on German airship <i>Hindenburg</i>
1938	Promoted to commander Appointed chief, United States Weather Bureau, Washington, D.C.
1939	Retired from United States Navy
1940-1941	President, American Meteorological Association
1942-1945	Assisted in the organization of the Joint Meteorological Committee of the Joint Chiefs of Staff for wartime operations
1944-1947	President, American Geophysical Union
1951-1955	President, World Meteorological Organization
1963	Retired from United States Weather Bureau

1983, Jan. 25 Died, Washington, D.C.

Scope and Content Note

The papers Francis Wilton Reichelderfer (1895-1983) span the years 1918-1983, with the bulk of the papers concentrated from 1939 through 1967. The collection primarily pertains to Reichelderfer's career in meteorology as chief of the United States Weather Bureau. Also included are records concerning his naval career and his speeches and writings. The collection is divided into two series: [Speeches and Writings](#), and [Subject File](#).

In the years prior to his death in 1983, Reichelderfer weeded his papers and destroyed thousands of items of personal and official correspondence, reports, memoranda, desk reminders, and other valuable materials relating to his meteorological work. Although he selected items to serve as "representative samples" of his lifelong work in meteorology, the collection lacks comprehensive documentation of his activities as a naval meteorologist and the programs and policies enacted during his tenure as chief of the Weather Bureau. The information contained in the [Subject File](#) is fragmentary at best, but Reichelderfer kept many of his speeches and writings, and materials pertaining to some of his most significant achievements in the field of meteorology can be found scattered throughout the collection. The miscellaneous notes in the [Subject File](#) contain information regarding the kinds of materials Reichelderfer discarded.

The [Speeches and Writings](#) series is comprised of notes, drafts, final copies, and printed versions of addresses, remarks, lectures, articles, and papers by Reichelderfer primarily concerned with the Weather Bureau and its policies, plans, and programs. Other papers pertain to weather and wartime operations, forecasting methods, and weather control and modification, including artificial rainmaking. Of special note is Reichelderfer's 1932 paper, entitled *Norwegian Methods of Weather Analysis*, a study based on Norway's innovative air mass method of weather analysis and polar front theory. As early as 1922, Reichelderfer began adapting Norway's methods of weather analysis to the distinctive American weather system, thereby producing a new meteorological standard for the United States.

The [Subject File](#) contains correspondence, memoranda, reports, notes, photographs, and other material primarily pertaining to Reichelderfer's work as chief of the United States Weather Bureau. Included are files relating to the first weather satellites, weather forecasting and its effect on wartime operations, and early private meteorological services. The series also includes excellent biographical materials, records documenting his work as American representative of the World Meteorological Organization's mission to typhoon-ravaged Thailand in 1966-1967, and early naval reports regarding European forecasting methods. General and personal correspondence in the [Subject File](#) is meager and mostly concerns Reichelderfer's writings, his work at the Weather Bureau, and personal family matters.

Arrangement of the Papers

This collection is arranged in two series:

- [Speeches and Writings, 1925-1982](#)
- [Subject File, 1918-1983](#)

Description of Series

Container

BOX 1-2

Series

Speeches and Writings, 1925-1982

Manuscripts in various stages of preparation, including notes, drafts, final copies, and printed versions of speeches, lectures, radio broadcasts, interviews, articles, statements, editorials, and papers by Reichelderfer. Arranged alphabetically by type of material and chronologically thereunder. A partial index is filed at the end of the series.

BOX 3-9

Subject File, 1918-1983

Correspondence, memoranda, reports, working notes, lists, certificates, newspaper clippings, agendas, printed matter, and photographs relating to Reichelderfer's career and interests as a meteorologist. Arranged alphabetically by topic or type of material and chronologically thereunder.
