## Table 693. Money Income of Households-Number and Distribution by Race and Hispanic Origin: 2009

[Households as of March of the following year. (117,538 represents 117,538,000). Based on Current Population Survey, Annual Social and Economic Supplement (ASEC); see text, this section and Section 1, and Appendix III. The 2009 CPS allowed respondents to choose more than one race. Data represent persons who selected this race group only and excludes persons reporting more than one race. See also comments on race in the text for Section 1]

## Table 694. Share of Aggregate Income Received by Each Fifth and Top 5 Percent of Households: 1970 to 2009

[Households as of March of the following year, (64,778 represents 64,778,000). Income in constant 2009 CPI-U-RS-adjusted dollars. The shares method ranks households from highest to lowest on the basis of income and then divides them into groups of equal population size, typically quintiles. The aggregate income of each group is then divided by the overall aggregate income to derive shares. Based on the Current Population Survey, Annual Social and Economic Supplement (ASEC); see text, this section and Section 1, and Appendix III. For data collection changes over time, see <http://www.census.gov/hhes/www/income/data /historical/history.html>]
