Dear Mr. Chairman:

The American Recovery and Reinvestment Act of 2009, Public Law 111-5 (the Recovery Act), was designed to stimulate economic growth by creating millions of jobs through investments in infrastructure improvements and expanding energy research in an effort to lead the way toward energy independence for our country. On March 20 and April 28, 2009 the Department submitted its initial plans to implement the Recovery Act identifying specific military construction and facility sustainment, restoration, and modernization (FSRM) projects that improve facilities and energy efficiency.

At that time, the Department indicated that it would amend the plans if significant changes occur during implementation. On September 14 and December 24, 2009, the Department notified the Congress of Recovery Act plan revisions; this letter notifies the Congress of additional FSRM program changes affecting the Army National Guard and the TRICARE Management Activity. This revision:

- Cancels 52 projects and identifies 22 replacement projects (enclosure 1)
- Adds 21 projects funded from bid savings (enclosure 2)
- Corrects 3 project titles and locations (enclosure 3), and
- Corrects 7 project locations (enclosure 4)

A revised state summary is provided in enclosure 5. The Department appreciates the continued support of the Congress for Defense facility and infrastructure programs. Similar letters have been sent to the chairmen and ranking members of the Senate Armed Services Committee and the Committees on Appropriations of the House and Senate.

Sincerely,

A handwritten signature in cursive script that reads "Robert F. Hale".

American Recovery and Reinvestment Act of 2009 Facilities Sustainment, Restoration, and Modernization Project Replacement List

Consistent with efforts to track and efficiently allocate funds from the American Recovery and Reinvestment Act of 2009, the projects which have been accomplished through other funding or otherwise are no longer required have been listed below with replacement projects. Replacement projects remain within the same state and appropriations category.

Projects removed denoted in gray: 52

Projects added: 22

Existing projects are denoted in blue: 5

The following projects are being dropped from the original plan for the following reasons: Project Numbers (PNs) 754, 755 & 788 were part of other building renovations funded with non-Recovery Act funds; PNs 783 & 784 were funded with non-Recovery Act funds to make urgent fixes to system failures; PN 786 was executed by non-Recovery Act funds because urgent tenant (Department of Energy) work could not wait for a cooperative agreement signature; PNs 787 & 789 were completed prior to the enactment of the Recovery Act and the project was proposed as an ARRA project in error; and PNs 791 & 792 were funded by non-ARRA funds because the State IDIQ contract expiration would occur before the State could sign the cooperative agreement. * The State is increasing the scope of work on existing ARRA projects (PNs 777, 778 and 779) so that all Annual Training barracks on Fort Chaffee will be renovated to the same standard.

All projects, except PN 1280, are canceled because the State's FY10 budget was not passed until mid-October and did not have sufficient funds to support the State match requirement. The replacement projects have the proper type of State match - state capital funds which are secure, versus the state Backlog of Maintenance and Repair funds which were not included in the signed appropriations bill. PN 1280 is canceled because it is being accomplished as part of other Recovery Act Fort Indiantown Gap energy management system projects. The Fort Indiantown Gap replacement project will enable the Army directed regional Battle Command Training Center to become "fully operational."

Revised Project Title:					
73	Aberdeen Proving Ground	MD	Repair/Replace Electrical Components, Kirk Army Health Clinic	1,040	E
PN 71 and 73 project titles are updated to accurately reflect the name and location of the benefiting clinic. The name and location of the parent command responsible for funds execution was identified in the original plan; however, the intent has always been to perform the work and modernize the medical facilities at Aberdeen, the subordinate activity. This change accurately reflects the name of the benefiting clinic and its location.
