- 0334 Computer Specialist Series, Removed and replaced by 2210Information Technology Management series, per John Hanson. 6/10/02
- 5201 Diving Equipment Worker added per Brooke Larson, WASC. 11/19/01

NOAA COMPETITIVE LEVEL HANDBOOK Revised 03/02

INTRODUCTION

The purpose of this handbook is to provide a uniform framework for the consistent identification, establishment and application of competitive levels within NOAA. Although the revised content is little different from that in the previous handbook, this revision has been undertaken to incorporate changes prompted by the March, 1998, implementation of a Demonstration Project described in the Federal Register Notice dated December 24, 1997. In addition, any new competitive level codes which have been added since 1995 are incorporated into this edition of the handbook. All changes are shown in boldface type.

As defined in the Part 351 of the Code of Federal Regulations (revised January 13, 1995) a competitive level consists of all the positions in a competitive area that are in the same grade (or occupational level) and classification series and that are similar enough in duties, qualification requirements, pay schedules, and working conditions so that an agency may reassign the incumbent of one position to any of the other positions in the level without undue interruption. Consequently, the determination of "like" jobs is critical to determining "first round competition" whenever a reduction-in-force is undertaken.

A competitive level under the Demonstration Project is similar to that described above except that grade levels are replaced by pay bands. The concept of grouping "like" jobs is retained.

Although position classification specialists have the principal responsibility for assigning competitive level designations, this responsibility should be exercised in close coordination with

staffing specialists who are familiar with qualification requirements and recruiting practices. Care and thought is needed in assigning positions to competitive levels which are neither too broad nor too narrow, are defensible and are based on valid decisions on common duties, responsibilities or other job related requirements. Although this handbook establishes a framework for assigning individual positions to particular competitive level codes, it is intended that additional competitive levels be established and used as warranted, a matter which will be covered more thoroughly under GENERAL INSTRUCTIONS below.

GENERAL INSTRUCTIONS

Competitive level codes must be applied to each NOAA position upon allocation or whenever there is sufficient substantive change in the duties and responsibilities of a position to require a decision on the continuance or modification of a competitive level code. Primarily, their use is for properly identifying and grouping "like" positions for purposes of "first round" competition in a reduction-in-force. However, they may also be useful for providing statistical information on employment, promotion, career development patterns or other occupational or organizational trends and anomalies.

Substantial and careful thought should be exercised in establishing and defining competitive levels which provide for the valid, rational, and defensible grouping of positions based on common and closely related characteristics. Specialization, ascending grade level (or equivalent), series or occupational characteristics (301 series jobs for instance) may require narrower and more definitive competitive levels based on decisions and in some instances documentation that interchangeability is infrequent, improbable or inappropriate because of the differences and variability of job content or function. On the other hand, there should be very little rationale for assigning different competitive levels to Clerk Typist GS-322-4 positions or to some positions in the accounting series or technical positions in a "production" or assembly line environment where job requirements and content are repetitive and invariable: i.e., "every job looks alike." Generally, decisions about assignment to a competitive level fall between these extremes and must be made on a position-by-position basis. In many instances, several positions will probably be assigned to a given competitive level.

A. Functional Codes

Functional Codes contained in Appendix 2 (Functional Classification for Scientists and Engineers) of the Introduction to the Position Classification Standards shall be recorded (as appropriate) on each CD-516, and in item 48 of the SF-52 and SF-50 B. These codes may also aid in establishing and defining competitive levels for professional positions in the scientific and engineering fields.

B. <u>Basic Competitive Level Structure</u>

As indicated in the Introduction to this handbook, when each position is allocated, it should be assigned a specific competitive level code based on a determination that the qualifications requirements, duties, pay schedule, grade (or equivalent pay band), series, occupational or functional specializations, and working conditions are so similar to other positions in the competitive level that all of these positions are considered interchangeable and can be performed equally well by any one of the incumbents *without undue interruption*.

Competitive levels in this handbook are first outlined for given pay schedules, specifically: <u>General Schedule</u> (including GM positions), <u>Wage Grade/Printing</u>, and <u>Wage Marine</u>.

Competitive levels for pay schedules under the Demonstration Project are found under their equivalent General Schedule or Wage Grade pay schedule. Within each pay schedule, series (with occupational titles) are listed in ascending order from the lowest numbered series to the highest. Under each series, a four digit number, followed by descriptors or definitions, defines a particular competitive level within that series. As each new and/or different competitive level is identified, it is defined and assigned the next succeeding, appropriate and available four digit competitive level code.

Competitive levels are no longer automatically distinguished by supervisory or non-supervisory status (see 5 CFR Part 351 changes dated January 13, 1995). However, NOAA has determined that positions coded as full supervisors or managers (supervisory code 2), should be placed in a separate competitive level based upon the qualifications required for satisfactory performance and the fact that these supervisors receive special training that cannot be obtained within 90 days (e.g., the NOAA Leadership Training Program). Rather than change the competitive level coding structure, the retention register applications program will place such supervisors in a unique competitive level. Likewise, positions in the competitive and excepted service are sorted on the retention register without use of specific competitive level codes.

C. Basic Requirements

Competitive level definitions or descriptors do not serve as titling criteria. Prescribed position classification titling practices, including the use of options or specializations, should be followed. Although specific position titles developed in general occupational areas (e.g., 301, 501, 801 series positions) can aid in determining competitive level codes, further distinctions may warrant the use of different or finer and more specific competitive level definitions.

Whenever possible, positions should be assigned a specific competitive definition rather than a "general" or "catchall" definition. Nevertheless such distinctions must not be made so finely or narrowly that each and every position is assigned a separate competitive level code and a pragmatic grouping of jobs based on legitimate similarities is ignored.

Generally, competitive level definitions and distinctions should follow the specializations stated or implied in OPM classification standards. In some areas, (notably for scientific research, engineering, and some higher level technical or general schedule positions), functional codes and program, organizational, project or other functional requirements may dictate finer distinctions than immediately apparent. In each case, however, such determinations should be carefully reviewed, and documented before submission for final approval.

D. Coding Practices

1. <u>General</u>. For each competitive level definition (or set of descriptors), there is a four digit alpha-numeric competitive level code. The <u>first digit</u>, beginning from <u>left to right</u>, was used to describe supervisory or managerial functions required in the position.

However, effective January 13, 1995, supervisory status is no longer a basis for establishing separate competitive levels. Therefore, the first digit should be coded "0." The second digit from the left may be used to describe other general functions or activities. The remaining two digits are used to define specialization(s) of the position to the degree necessary. When no other alpha-numeric code is applicable to any one of the four digits, the digit will be coded 0.

2. <u>Specific Code Structure</u>: The following table provides a summary of the coding structure to be applied, the "X"symbol being used to indicate that any other alpha or numeric code could appear in that digit.

- 0000 Clerical Positions(See definition below)
- 01XX Developmental (Trainee) Positions (See definition below)
- 02XX Stenographer Positions (See definition below)
- 03XX Typist/Office Automation Positions (See definition below)
- 07XX Research/ADP Positions (See definition below)
- 08XX ADP Positions (See definition below)
- 09XX Research Positions (See definition below)
- a. <u>Clerical Positions</u> (X000) Clerical positions at the GS-3 level and below in the 200, 300, 500, 2000 or other groups which do not require typing, or stenography, and which are so little differentiated in terms of knowledge or skill requirements that little training or experience is necessary to perform the duties of the position.
- b. <u>Developmental (Trainee) Positions</u> (X1XX) Positions which are filled by employees in formally designated trainee or developmental programs meeting the criteria outlined in 351.702 (e) (1) through (4) of Part 351:
 - 1. The program must have been designed to meet the agency's needs and requirements for the development of skilled personnel;
 - 2. The program must have been formally designated, with provisions made known to employees and supervisors;
 - 3. The program must be developmental by design, offering planned growth in duties and responsibilities, and providing advancement in recognized lines of career progression; and
 - 4. The program must be fully implemented with the participants chosen through standard selection procedures.
- c. <u>Stenography Positions</u> (X2XX) Positions which require a fully qualified stenographer in order to fully perform all the duties of the position.
- d. <u>Typing/Office Automation Positions</u> (X3XX) Positions which require a fully qualified typist in order to fully perform all the duties of the position. This

includes all types of machines used (e.g., typewriter, word processor, personal computer).

- e. <u>Research/ADP Positions</u> (X7XX) Positions which meet the criteria for ADP positions and research positions.
- f. <u>ADP Positions</u> (X8XX) Positions in series <u>other than</u> the GS-326,332, 334, 335, 356, and 1550 which require sufficient ADP skills and knowledges that "selective factors" are necessary in qualifying individuals for selection and assignment to such positions.
- g. <u>Research Positions</u> (X9XX) Positions which meet the criteria of the Research Grade Evaluation Guide.
- h. <u>Student and Other Positions</u> Another of the distinctions used in establishing competitive levels is the type of appointing authority. Although separate competitive level codes had previously been developed and implemented for many of the student and other excepted service appointing authorities, such competitive level codes are unnecessary. The appointment authority is itself a primary basis for establishing the competitive level and can be supplemented by assigning an appropriate competitive level code from this handbook.

E. Coding of Student and Other Positions

Another of the distinctions used in establishing competitive levels is the type of appointing authority. The following codes may be used for coding student and other positions with excepted service Schedule A 213.3102 and Schedule B 213.3202 appointments, respectively.

Schedule A 213.3102	<u>Type of Appointment</u>	<u>Code</u>	
(t) authority	mentally disabled		0222
(u) authority	physically disabled		0777
(ii) authority	Presidential		0095
	Management Interns		
	-		

Schedule B 213.3202	Type of Appoint	t <u>ment</u>	<u>Code</u>
(a) authority	Student Employment P	rogram	
Y1K	HS		0111
Y2K	Voc/Tech		0112
Y3K	Assoc		0113
Y4K	BA/BS	0114	
Y5K	Grad/Prof		0115

(b) authority	Student Career Experience Progr	am	
YBM	HS		0444
YGM	Voc/Tech		0888
Y3M	Assoc		0999
Y1M	BA/BS	0555	
Y2M	Grad/Prof		0666

F. Modification of Coding Structure

As the need arises, additional code designations might be developed and designated. However, when such changes are proposed, they should be developed in a manner which minimizes disruption of the present coding structure and practices and which avoids introducing anomalies which might lead to duplication, conflicting competitive level codes, or the inability to provide sufficient differentiation because of the limited number of digits available for coding.

G. Competitive Level Code Revisions

1. Competitive level codes may not be added, deleted or modified by Servicing Human Resources Officers until recommendations have been forwarded to the Programs & Plans Division of the Human Resources Management Office for review and coordination and approval has been obtained by the issuance of transmittal memoranda or by a revised edition of the handbook.

2. When it is apparent that the existing competitive level codes, descriptors or definitions are inadequate (e.g., a unique position requirement and selective placement factor are justified), a memorandum should be forwarded to the Programs & Plans Division which fully explains the nature and such reasons for any necessary changes.

3. It is also likely in some instances, (particularly during reduction-in-force) that the requirement for revised or supplemental competitive levels may be critical. In such instances, telephone approval for the changes may be obtained from the Programs & Plans Division after the request has been reviewed and any necessary coordination completed. Upon approval, the Programs & Plans Division will immediately issue a transmittal or a revised edition of the handbook which advises all Servicing Human Resources Offices of the changes which have been made.

PART 1 - GENERAL SCHEDULE POSITIONS

Meteorological Technician Series

- .0001 Trainee-Includes all Meteorological Aid & Technician Trainee positions.
- .0002 Meteorological Technician (Weather Service Specialist-Positions responsible for providing specialized or comprehensive weather services for the general public and special user groups such as: aerospace, agriculture, aviation, construction, industry, marine, public utilities, recreation, transportation, etc. Integrated positions with auxiliary data acquisition duties such as the operation of local use or long range weather radar, taking of surface or upper air weather observations are also included.)
- .0003 Meteorological Technician (Data Acquisition-Positions primarily concerned with data acquisition such as: surface weather observation, upper air observation-pibal, rawinsonde, rocketsonde, wiresonde, ozonesonde, etc.; long range weather radar observation.
- 0004 Meteorological Technician (Forecaster Aid-Positions performing one or more of the following duties: charting-manual or automatic communication, facsimile, APT operations, and compilation of statistical data.)
- .0005 Meteorological Technician (General)
- .0006 Meteorological Technician (Research Assistant-Positions primarily concerned with providing technical support to Research Scientists, and which require the application of atmospheric physics)
- .0007 Meteorological Technician (Satellite Operations)
- .0008 Meteorological Technician (Climatology-Positions primarily concerned with providing technical support to climatology programs)
- .0009 Meteorological Technician (Verification-Positions primarily concerned with the verification of weather data for correctness and consistency)
- .0011 Meteorological Technician (Program Management-Meteorological Technical staff positions which have a responsibility for executive or technical management and supervision of program areas)
- Geology Series .0001 Geologist
