Summary Information For Banks in State

This page displays statewide peer group averages for Summary Ratio information similar to that found on page 1 of the UBPR.

Four different peer groups appear on this page. First, all banks are combined into a statewide peer group. Then banks are grouped into one of three asset-based statewide peer groups. The asset ranges are: less than \$25M, \$25M to \$100M and over \$100M.

Statewide peer group average data is not designed to be a replacement for nationwide peer group information, but as a supplement to provide insight into possible local trends.

The averaging process follows that used for the nationwide peer groups in that banks above the 95th percentile and below the 5th percentile are excluded from the average.

UBPR Trust Page 1A

Page 1A displays an analysis of income and losses on fiduciary accounts. Additionally gross loss, recovery and net loss rates are calculated for each type of account. To provide a basis for analysis of bank information, average ratios are calculated for a peer group of comparably sized banks. Please see section II for details on peer group composition and a description of the averaging process. Finally, a percentile ranking or relative position is developed for each income and loss ratio. Please note that, all fiduciary income and loss data as reported on RC-T items 12 through 23 and memorandum item 4 are considered confidential. While confidential information is provided to regulatory users it is **not** made available on the public UBPR website. Individual banks should contact their respective federal bank supervisor for access to confidential information.
