

## International AIDS Assistance: G8/EC & Other Donor Governments, Commitments by Donor, 2008 (Excluding Funding for HIV/AIDS Research)

\*This graph understates the U.S. commitment because it does not include significant U.S. funding for research in the area of HIV/AIDS. In FY 2008, the United States provided nearly \$6.0 billion for global HIV/AIDS, TB, HIV/AIDS research, and contributions to the Global Fund to Fight HIV/AIDS, Tuberculosis and Malaria. If funding for bilateral TB programs is excluded, but the funding for international HIV/AIDS research is included, U.S. funding for bilateral HIV/AIDS programs and the Global Fund was approximately \$5.8 billion in FY 2008.

\*\* Percentages represent the portion of a country's HIV/AIDS commitments through the Global Fund or Bilateral Programs, respectively. Combined Bilateral and Global Fund percentages equal 100 for each country. Some countries' percentages are omitted from the graph for lack of space. Those include: Canada's Global Fund Contribution: 57%, the EC's Global Fund Contribution: 43%.

\*\*\* Global Fund contributions adjusted to represent estimated HIV share based on Global Fund grant distribution by disease to date (61% for HIV). UNITAID contributions adjusted to represent estimated HIV share based on distributions by disease to date (76% for HIV).

\*\*\*\* Bilateral funding includes HIV-earmarked multilateral funding but does not include the Global Fund or UNITAID.

**Notes:** U.S. bilateral commitment data correspond to obligations reported for the 2008 fiscal year (and therefore may differ somewhat from amounts appropriated by Congress in that year). U.S. Global Fund contributions correspond to amounts received by the Fund during the 2008 calendar year, regardless of which U.S. fiscal year such disbursements pertain to. U.K. and Canadian data are preliminary estimates. With the exception of the U.S., Italy, and the EC, disbursements used as proxy for commitments. Netherlands disbursement data differ from HGIS annual reports, due to exclusion of TB and malaria funding, imputed multilateral funding, and indirect administrative costs. "Other government" totals represent 2007 data reported to the OECD and by the Global Fund and UNITAID. Japan data represents final 2008 disbursements. See source for additional details on methodology.
