QUICK REFERENCE TO UNDERSTANDING HMDA EDITS

HMDA edits are divided into three types: Syntactical, Validity, and Quality. Each edit questions specific reported data that should be thoroughly checked in order to ensure the data are reported accurately. These edits are defined as follows:

1. **Syntactical (S)** - The loan applications will not be loaded to the FFIEC database. If they should be included on the FFIEC database, the data must be corrected. Some examples are incorrect activity year used in your submission; or initial LAR data (T2 record) already on file, which indicates that a LAR with a duplicate loan application number was submitted.
2. **Validity (V)** - The specified data are reported incorrectly and must be corrected. The most common example is an incorrect census tract.
3. **Quality (Q)** - The data in question do not agree with an expected standard (value). Review for correctness and change only if erroneous data has been reported. An example is reported income that is less than or equal to \$9 thousand.

In addition, any data containing Validity errors that are not corrected will often result in an erroneous disclosure statement. Loan applications with Syntactical edits, if not corrected, will not be represented on the disclosure statement at all. Data with Quality edits, if not corrected when inaccurate, will cause an incorrect disclosure statement.

2010 HMDA EDIT CHANGES:

➤ REVISED EDITS

Transmittal Sheet & Loan/Application Register

- S010 (pg 1) Edit test modified to verify the first record identifier in the file = 1 (TS) and the second and all subsequent record identifiers = 2 (LAR).
- S040 (pg 1) Edit test modified to check for unique Application/Loan Number.
- V570 (pg 7) Application date removed due to Regulation C amendment.
- V575 (pg 7) Application date removed due to Regulation C amendment.

Transmittal Sheet

- S100 (pg 1) Edit test language modified to check for valid activity year.
- S028 (pg 1) Edit test adjusted to include timestamp format.

Macro Quality Edits

- Q029 (pg 17) Edit test modified to exclude the depository panel verification.

➤ NEW EDITS

Transmittal Sheet & Loan/Application Register

- S011 (pg 1) The HMDA file must contain at least one loan/application record (record identifier = 2).

Transmittal Sheet

- Q130 (pg 9) The number of loan/application records received in this transmission file per respondent does not = the total number of loan/application records reported in this respondent's transmission or the total number of loan/application records in this submission is missing from the transmittal sheet.
- Q012 (pg 9) The reported Tax ID number on the transmittal sheet of your HMDA data file does not match the Tax ID number reported in the previous calendar year submission.

Loan/Application Register

- Q067 (pg 11) If applicant ethnicity, race and sex = 4, 7, and 4, respectively, and co-applicant ethnicity, race and sex = 4, 7, and 4 or 5, 8, and 5, respectively, then applicant income should = NA.

Macro Quality Edits

- Q070 (pg 15) If action taken type = 1 or 6, purpose of loan = 1 or 3, property type = 1 or 2, loan type = 1; and if the percentage of these loans that are sold to Fannie Mae or Freddie Mac in the current year is less than the percentage of the same type of loans sold to Fannie Mae or Freddie Mac in the prior year, then the percentage difference between the two years should be less than 10%; or if the number of these loans for the current year is $\geq 10,000$, then the percentage of these loans sold to Fannie Mae or Freddie Mae for the current year should be $> 20\%$.
- Q071 (pg 15) If action taken type = 1 or 6, purpose of loan = 1 or 3, property type = 1 or 2, loan type = 2; and if the percentage of these loans that are sold to Ginnie Mae in the current year is less than the percentage of the same type of loans sold to Ginnie Mae in the prior year, then the percentage difference between the two years should be less than 10%; or if the number of these loans for the current year is ≥ 200 , then the percentage of these loans sold to Ginnie Mae for the current year should be $> 30\%$.
- Q072 (pg 16) If action taken type = 1 or 6, purpose of loan = 1 or 3, property type = 1 or 2, loan type = 3; and if the percentage of these loans that are sold to Ginnie Mae in the current year is less than the percentage of the same type of loans sold to Ginnie Mae in the prior year, then the percentage difference between the two years should be less than 10%; or if the number of these loans for the current year is ≥ 100 , then the percentage of these loans sold to Ginnie Mae for the current year should be $> 30\%$.
- Q073 (pg 16) If 250 or greater loans are reported with purpose of loan = 1, action taken type = 1 or 6, property type = 1 or 2, and loan type = 2 or 3, then of these loans, the percentage of loans sold should be $> 20\%$.
- Q074 (pg 16) If 250 or greater loans are reported with purpose of loan = 3, action taken type = 1 or 6, property type = 1 or 2, and loan type = 2 or 3, then of these loans, the percentage of loans sold should be $> 20\%$.
- Q075 (pg 16) If 750 or greater loans are reported with purpose of loan = 1, action taken type = 1 or 6, property type = 1 or 2, then of these loans, the difference between the percentage of loans that are sold in the current year and the percentage of the same type of loans sold in the prior year should be less than (+ or -) 20%.
- Q076 (pg 17) If 750 or greater loans are reported with purpose of loan = 3, action taken type = 1 or 6, property type = 1 or 2, then of these loans, the difference between the percentage of loans that are sold in the current year and the percentage of the same type of loans sold in the prior year should be less than (+ or -) 20%.

EXPLANATION OF VALIDITY EDITS 285, 295, & 300

Regulation C (Home Mortgage Disclosure Act) requires financial institutions reporting NA in the metropolitan statistical area/metropolitan division (MSA/MD) field to either enter NA or to enter correct geographic information in the other three property location fields (state, county, census tract) of the HMDA-LAR for the property in question. The reported geographic data will be verified for its validity.

Purpose: Validity edits 285 and 295 were added to the HMDA edits to comply with Regulation C. These edits are intended to verify the validity of the property location information when the MSA/MD field is reported as NA or a numeric code.

Validity edit 300 was modified to verify the validity of the census tract for the state/county combination reported regardless of what is reported in the MSA/MD field.

Further Explanation: When MSA/MD is NA or a valid metropolitan statistical area/metropolitan division number and the state (V285), state/county (V295), or state/county/census tract (V300) combinations are provided, there must be verification that the combinations are valid. Below are examples of the geographic combinations that may be used if it is valid for a respondent to report an MSA/MD as NA.

NA/51/NA/NA*	- State
NA/51/059/NA	- State/County
NA/51/059/4154.00**	- State/County/Census Tract
NA/NA/NA/NA***	- State/County/Census Tract

*Though this example is an acceptable entry and will pass all validity edits (provided a valid numeric state code is entered), the preference is for the institution to provide a valid state/county combination or a valid state/county/census tract combination. In the majority of cases, an institution should be able to provide the state/county/census tract combination since every state and county has a code and the 2000 Census assigned census tract numbers to all areas.

**For the State/County/Census Tract combination, a reported census tract will always be verified. This combination is used when the property is located in a Micropolitan Statistical Area and the institution meets all the reporting criteria and is thus required to report all mortgage lending activity. (NA will always be reported in the MSA/MD column because HMDA does not use Micropolitan Statistical Area numbers). In addition, where the county is classified as small it is acceptable for a lender to code census tracts on properties in small counties as NA on the HMDA-LAR form. (If MSA/MD is reported using the valid metropolitan statistical area or metropolitan division (as appropriate) number, then all other property fields must be coded with the valid state/county/census tract combination.)

***This example is acceptable in specific cases. For instance, lenders may report NA in the property location fields associated with requests for preapprovals that are denied or if lenders opt to report preapprovals approved but not accepted. In addition, the NA combination can be reported on property located outside the metropolitan statistical area/metropolitan division in which an institution has a home or branch office, or outside any metropolitan statistical area/metropolitan division. **Note, however, that if you are a bank or savings association that is also required to report CRA data, you must fully geocode the property location on your HMDA data. NA is not valid except in those cases where the property is located in a Micropolitan Statistical Area or is not located in any Metropolitan or Micropolitan Statistical Area; and in those examples, NA would only be reported in the MSA/MD column and the appropriate state, county, and census tract numbers would be reported.**

Any combination of the property location reported when the MSA/MD is NA, other than those aforementioned, are incomplete; therefore, those combinations will not be valid.

EXPLANATION OF VALIDITY EDITS 285, 295, & 300 (continued)

In comprehending the logic of these Validity edits, it may be useful to begin at the census tract. If the census tract is reported by a lender, then the county and state **MUST** also be reported. If a county is reported, then a state **MUST** also be reported. A state may be reported by itself, with a county, or with a county and census tract. In reverse order, if an MSA/MD equals NA, then the acceptable combinations in the majority of cases are state only, state/county, or state/county/census tract.
