

## 2007 MODEL YEAR VEHICLES

This section contains the fuel economy values for 2007 model year vehicles. Additional information for alternative fuel vehicles can be found on pages 17–19. Alternative fuel vehicles are highlighted with a green bar, and those that can use two kinds of fuel, such as flexible fuel vehicles, have an entry for each fuel type. The most fuel-efficient automatic and manual vehicles per class are listed in black boldface type and highlighted by a gray bar. The most efficient vehicle in each class is marked with a black pointer (▶).

## DIESEL VEHICLES

Diesel-powered vehicles typically get 30–35% more miles per gallon than comparable vehicles powered by gasoline. Diesel engines are inherently more energy efficient, and diesel fuel contains 10% more energy per gallon than gasoline. In addition, new advances in diesel engine technology have improved performance, reduced engine noise and fuel odor, and decreased emissions of harmful air pollutants. New ultra-low sulfur diesel fuels available beginning in 2006 will help reduce emissions from these vehicles even more.

Annual fuel costs below are estimated assuming 15,000 miles of travel each year (55% city and 45% highway) and a diesel fuel cost of \$2.65 per gallon.
