Full-Time Workers Aged 18 to 64, by Educational Attainment, Family Income, Geographic Characteristics, and Past Month Illicit Drug
Use: Numbers in Thousands, Annual Averages Based on 2002-2004

EAP = Employee Assistance Program.

*Low precision; no estimate reported.

¹ Illicit Drugs include marijuana/hashish, cocaine (including crack), heroin, hallucinogens, inhalants, or prescription-type psychotherapeutics used nonmedically.

² Definitions for county type are based on 2003 Urban Influence Codes (UIC), which are provided as a service by the United States Department of Agriculture (USDA). These estimates are not comparable with estimates by county type published in other NSDUH reports. MSA refers to metropolitan statistical area and MiSA refers to micropolitan statistical area. Noncore is defined as a nonmetro area that does not contain an urban cluster of 10,000 or more residents.

Table 4.21SWorkplace Provides Educational Information, Prepares a Written Policy, or Maintains an EAP concerning Drug or Alcohol Use among
Full-Time Workers Aged 18 to 64, by Educational Attainment, Family Income, Geographic Characteristics, and Past Month Marijuana
Use: Numbers in Thousands, Annual Averages Based on 2002-2004

EAP = Employee Assistance Program.

*Low precision; no estimate reported.

¹ Definitions for county type are based on 2003 Urban Influence Codes (UIC), which are provided as a service by the United States Department of Agriculture (USDA). These estimates are not comparable with estimates by county type published in other NSDUH reports. MSA refers to metropolitan statistical area and MiSA refers to micropolitan statistical area. Noncore is defined as a nonmetro area that does not contain an urban cluster of 10,000 or more residents.

¹ Illicit Drugs include marijuana/hashish, cocaine (including crack), heroin, hallucinogens, inhalants, or prescription-type psychotherapeutics used nonmedically. ² Definitions for county type are based on 2003 Urban Influence Codes (UIC), which are provided as a service by the United States Department of Agriculture (USDA). These

estimates are not comparable with estimates by county type published in other NSDUH reports. MSA refers to metropolitan statistical area and MiSA refers to micropolitan statistical area. Noncore is defined as a nonmetro area that does not contain an urban cluster of 10,000 or more residents.

NOTE: Dependence or abuse is based on the definition found in the 4th edition of the *Diagnostic and Statistical Manual of Mental Disorders* (DSM-IV).

¹ Definitions for county type are based on 2003 Urban Influence Codes (UIC), which are provided as a service by the United States Department of Agriculture (USDA). These estimates are not comparable with estimates by county type published in other NSDUH reports. MSA refers to metropolitan statistical area and MiSA refers to micropolitan statistical area. Noncore is defined as a nonmetro area that does not contain an urban cluster of 10,000 or more residents.

Table 6.258Employees' Feelings toward Working for Employers Who Conduct Drug Testing before Hiring concerning Drug or Alcohol Use among
Full-Time Workers Aged 18 to 64, by Educational Attainment, Family Income, Geographic Characteristics, and Past Month Heavy Alcohol
Use: Numbers in Thousands, Annual Averages Based on 2002-2004

*Low precision; no estimate reported.

¹ Heavy Alcohol Use is defined as drinking five or more drinks on the same occasion (i.e., at the same time or within a couple of hours of each other) on each of 5 or more days in the past 30 days.

² Definitions for county type are based on 2003 Urban Influence Codes (UIC), which are provided as a service by the United States Department of Agriculture (USDA). These estimates are not comparable with estimates by county type published in other NSDUH reports. MSA refers to metropolitan statistical area and MiSA refers to micropolitan statistical area. Noncore is defined as a nonmetro area that does not contain an urban cluster of 10,000 or more residents.
