Prescription Lens Carrier with goggle connector (fits the Revision Sawfly spectacle and the Desert Locust Goggle, when used with goggle connector)	Package of 10	4-0133-9100	<b>6540-01-527-4056</b>

The Revision Sawfly protective spectacle consists of a plastic frame (two sizes, Regular & Large) with interchangeable polycarbonate lenses. The frame features adjustable telescoping arms for improved fit/comfort. The frame and lens assembly weighs 1.2 ounces. All lenses have been treated with a hard coat to reduce scratching and maximize resistance to chemicals, such as DEET, on both inner and outer surfaces of the lens. The Revision Sawfly provides ballistic- fragmentation protection, and meets all ANSI Z87.1 optical and safety requirements. The lens material blocks 99.9% of all UVA and UVB light. An optional prescription lens carrier is available for those who require corrective lenses.

**WARNING:** Use of prescription lens configurations not listed on the Authorized Protective Eyewear List (APEL) for a specific APEL spectacle or goggle may result in serious injury. We strongly recommend that Soldiers use Army optometry clinics to obtain prescription (Rx) correction for APEL products approved for this purpose. Rx correction is available through garrison and deployed optometry clinics at no cost to the Soldier. All APEL approved Rx configurations have been subjected to ballistic fragmentation testing for safety. Offers by vendors for unapproved Rx products via vendor website and/or through conferences should be avoided, as these items may not be safe or operationally suitable for use in a field environment.
