Prescription Lens Carrier with goggle connector (fits the Smith Optics Aegis spectacle and the Smith Optics Outside the Wire Goggle, when used with goggle connector)	Package of 25	ELRXKIT-25	6540-01-584-3916

The Smith Optics Aegis protective spectacle consists of a plastic frame (one size) with interchangeable polycarbonate lenses. The frame and lens assembly weighs 1.5 ounces. All lenses have been treated with a hard-coat on the exterior surface to reduce scratching and anti-fog coating on the interior surface to reduce fogging. The Smith Aegis provides ballistic-fragmentation protection, and meets all ANSI Z87.1-2003 optical and safety requirements. The lens material blocks 99.9% of all UVA and UVB light. An optional prescription lens carrier is available for those who require corrective lenses.

WARNING: Use of prescription lens configurations not listed on the Authorized Protective Eyewear List (APEL) for a specific APEL spectacle or goggle may result in serious injury. We strongly recommend that Soldiers use Army optometry clinics to obtain prescription (Rx) correction for APEL products approved for this purpose. Rx correction is available through garrison and deployed optometry clinics at no cost to the Soldier. All APEL approved Rx configurations have been subjected to ballistic fragmentation testing for safety. Offers by vendors for unapproved Rx products via vendor website and/or through conferences should be avoided, as these items may not be safe or operationally suitable for use in a field environment.
